Your Miroir Full HD Pro Projector

- A Battery Indicator Lights** - Lights flash in turn as the device charges. The battery is fully charged when all the lights illuminate and no longer flash.
- B Lens Cover** - Slide open to turn power on/off
- C Audio Out (3.5mm)** - (Optional) Connect an external speaker or headphones.
- D HDMI Video Input** - Connect an HDMI cable to a device that supports HDMI video output.
- E USB Power Output** - Connect a USB power cable to provide power to a HDMI streaming stick or to charge a smartphone battery. Cannot be used for video input.
- F USB-C Video/Charge Input** - Connect any compatible USB-C charge/video cable to a device that supports USB-C video output, or power adapter that supports charging. (USB-C cable not included)
- G Reset Button** - Press to reset projector.
- H Power Port** - Connect included AC Adapter/Charger for power. Fully charge battery before the first use (approx. 4-5 hours).
- I Mode Button** - Long press mode button to change from ECO to Normal Mode. Normal mode is maximum brightness but shorter battery life.
- J Controls** - Increase/decrease the volume output of the projector.
- K Focus Controls** - Turn wheel to adjust focus.
- L Rubber Foot Pads** - Provides stability and proper airflow to cooling vents.
- M Cooling Vent** - IMPORTANT: Do not cover or block airflow to the vent.

Connect To Your Apple Device Lightning

Connect To Your Device

Connect To Your MacBook USB-C

Connect To Your Laptop HDMI

IMPORTANT! Not all USB - C cables will support video.

Multi-media Play
Supported Format

Video: mp4,avi,mov,wmv,mkv,rm,rmvb,mpg,mpeg
1080P@30fps, 720P@60fps
Image: JPG 15360 x 8640 Up to 1024x768 for progressive format
PNG, 9600 x 6400 (Up to 1200x800 for interlace format)

Connect To Your Streaming Stick HDMI

Connect to the Network

Before upgrading or connecting to an Apple device via Wi-Fi network, you need to connect the projector to the network first.

- Steps 1: Turn on the projector and enter the wireless page, you will see the device name and password in the upper left corner.
- Steps 2: Set the Wi-Fi of your mobile device to connect to the projector.
- Steps 3: Open the web browser of your device and log on the URL 192.168.49.1 Set the projector to connect to the network. there will be a router icon in the upper right corner if connected to the network successfully.

OTA upgrading

Check the new URL 192.168.xxx.xxx in the projected screen, log on in your mobile device, then you can see the 'upgrade' button and do the OTA upgrading.

Wireless Connection to Android Devices

To connect your Android device to the projector by Smart view/Miracast

- Steps 1: Turn on the projector and enter the wireless page, you will see the device name and password in the upper left corner.
- Steps 2: Open the quick menu of Android device, and active Smart view/Miracast.
- Steps 3: The Projector named PRO-xxxxxx, find and connect it.

Note: You may need to check with your android device manufacturer to verify that your Android device supports video out..(In Samsung device, this function named Smart view)

Wireless Connection to Apple Devices

To connect your Apple device to the projector by Screen mirroring/Airplay.

- Steps 1: Turn on the projector and enter the wireless page, you will see the device name and password in the upper left corner.
- Steps 2: Set the Wi-Fi of your Apple device to connect to the projector.
- Steps 3: Open the quick menu of Apple device to active the screen mirroring, to look for the projector and connect it.

Note: If the projector and Apple device are connected to the same network, screen mirroring can also work. Some Streaming apps don't allow video output, such as Netflix...

Troubleshooting

The image is blurry

- Adjust the projected image's focus by rolling the focus wheel forwards or backwards.
- Check that the surface you are projecting on is smooth and non-reflective.
- Check that the projector's lens is clean and free of debris.

The image is not square

- Check that the projector's lens is parallel to your projection surface and that your projection surface is flat.

No sound

- Check the volume control on your source device to ensure the volume is turned up.
- Check the volume control on the projector to ensure the volume is turned up.
- If you are using an adapter, verify that the adapter supports audio.
- Check that the HDMI cable is fully plugged into the HDMI port.

No Signal Message

- Check that you are using the required cable and/or adapter.
- If you are using a digital AV adapter, check that the adapter is an authentic Apple adapter and is compatible with your model phone or tablet.
- If you are connecting via USB-C, check that you are using a USB-C cable that is labeled "USB-C Video". Some USB-C cables do not support video.
- If you are connected to a laptop or computer, check your computer display settings to ensure a multiple display option is selected (such as "mirror these displays").
- Check that your source device supports HDMI video out or USB-C video out.

Projector will not power on, or stay powered on

- Check the battery life of the projector by briefly pressing the power button on the projector. If one or fewer lights illuminate, charge the battery with the USB-C cable or power adapter.
