Innovative Accu-Timer Technology

Make morning toast the way you like it, from lightly browned to crispy dark and every shade in between. This toaster oven features exclusive Accu-Timer technology. With Accu-Timer, selecting the preferred shade is easy, simply turn the top knob to Toast and the bottom knob to the desired shade and toasting will begin. When your toast is ready, the toaster will beep and the power will turn off. No more guesswork to find your perfect shade of toast every time.

Convection Fan

The convection fan allows hot air to circulate throughout the oven. This results in even baking and browning. Food cooks faster with convection, and you can generally set the oven at a lower temperature. Use the convection setting for frozen pizzas, appetizers, and roasted chicken.

Easy to Clean

This toaster oven features a removable crumb tray and a non-stick interior surface. After the oven has cooled off, simply remove the crumb tray and wash in warm, soapy water. The interior can be cleaned with a damp cloth.
