Concrete wall anchor (NOT INCLUDED)

Concrete Wall Anchor
4pcs

Step 1 Assemble extension arms (07, 08) as picture shows, align the extension arm holes with the wall plate unit, then fasten it with bolt 03 by using Allen key 02.

Step 2 Wall plate installation: Option 1 Wall plate installation in wood stud

drywall with
wood stud

To avoid potential body injury or property damage:

1. Wall mount must be installed into wood stud's center, not drywall alone.
2. Drywall covering the wood stud must not exceed 16 mm (5/8 in.).
3. Minimum wood stud size: common 2 x 4 in (51 x 102 mm). Nominal 1 1/2 x 3 1/2 in (38 x 89mm)
4. The wall must be capable of supporting five times the weight of TV plus mount.
5. Make sure the **BOLT HEAD** on the wall plate is upward as the picture shows.
6. All lag bolts **MUST BE** firmly tightened to prevent unwanted movement of the wall plate.

Ensure the wall plate is securely fastened to the wall before continuing on to the next step.

Failure to follow this instruction will possibly lead to TV falling off from wall, and would possibly cause body injuries or property loss.

The wall plate fits for 8", 16" wood stud spacing, please choose corresponding holes in the wall plate for installation.

③

Place Mounting template **09** along the centerlines, level it, and use pencil to mark 4 hole locations on the wall.

④

Use 7/32" diameter drill bit to drill 4 pilot holes at marked positions to a depth of 2.5".

⑤

Make sure the **BOLT HEAD** on the wall plate is upward

Take down the Mounting template, put 4 lag bolts **01** into the drilled holes, and tighten each bolt by using a socket wrench to mount the wall plate securely. Before totally tightening the lag bolt please attach the bubble level on the wall plate to check whether it is level.

Option 2 Wall plate installation on concrete wall

Concrete wall

CAUTION

To avoid potential personal injury or property damage:

1. Make sure the **BOLT HEAD** on the wall plate is upward as the picture shows.
2. **Solid** concrete wall's thickness should be more than 100mm/4", and the wall must be capable of supporting five times the weight of the TV plus the mount.
3. All anchors/lag bolts **MUST BE** firmly tightened to prevent unwanted movement of the wall plate. Ensure the wall plate is securely fastened to the wall before continuing on to the next step.

①

put **09** on your desire position, adjust it make it level.

②

Use 3/8" diameter drill bit to drill 4 holes at marked positions to a depth of 2.5".

③

Make sure the **BOLT HEAD** on the wall plate is upward

Take down the Mounting template, put 4 Concrete Wall Anchors (not included in the package) into drilled holes, and tap each anchor flush with the wall by using a hammer. Then put 4 lag bolts **01** into the anchors, and tighten each bolt by using a socket wrench to mount the wall plate securely. Before totally tightening the lag bolt please attach the bubble level on the wall plate to check whether it is level.

Step 3 Select TV hardware (diameter / length / combination)

- ① Bolt diameter: hand thread bolts into threaded inserts on the back of TV to determine correct bolt diameter (M4, M5, M6, M8).
- ② Bolt length: verify adequate thread engagement with bolts or bolts/spacers combination. We recommend thread engagement by at least 5 turns.

- Too short will not hold the TV.
- Too long will damage the TV.

- ③ Bolt and spacer combination: spacers sometimes are needed to combine with bolts for several situations.

Add distance to wall Irregular back Inset holes Cables

(For detail bolts and spacers combination, please refer to Page 7)

Carefully lay your TV on a non-abrasive surface, or lay it with a padding underneath it so as not to damage the screen.

Step 4 Attach brackets to the back of the TV:

- ① For the TV with flat back, mount the brackets with bolt/washer/spacer combination.

Tips:

- Make sure the ends of TV brackets **06** with round holes are facing upward.
- Round hole is for upper VESA hole, and long slot hole for lower VESA hole. Please try best to locate brackets symmetrically (top & bottom) at the back of TV to avoid brackets stick out.
- Attention: Screw in bolts a bit, then pull upward brackets to reduce the gap between bolts and bolt holes to make two brackets parallel. Then fasten bolts.

Bolt/spacer/washer combination options (only for reference)

Tips: You have to remove the inner circle of 2.5mm washer (j) in order to fit the M8 (c) bolt.

Carefully lay TV on a non-abrasive surface, or with a padding underneath it so as not to damage the screen.

② For TV with inset mounting holes, mount the brackets with bolt/washer/spacer combination.

(Spacers are highly recommended to be added, thus enlarge the space between TV and brackets for better functionality.)

Tips:

- Make sure the ends of TV brackets **06** with round holes are facing upward.
- Round hole is for upper VESA hole, and long slot hole for lower VESA hole. Please try best to locate brackets symmetrically (top & bottom) at the back of TV to avoid brackets stick out.
- Attention: Screw in bolts a bit, then pull upward brackets to reduce the gap between bolts and bolt holes to make two brackets parallel. Then fasten bolts.

Bolt/spacer/washer combination options (only for reference)

Tips: You have to remove the inner circle of 2.5mm washer (j) in order to fit the M6 (e) or M8 (f) bolt.

Carefully lay TV on a non-abrasive surface, or with a padding underneath it so as not to damage the screen.

Step 5 Hang the pre-assembled TV unit onto the horizontal bars of the wall plate unit.

Step 6 Fasten the tube clips with brackets by using bolts **04** with a screwdriver.

Step 7 Make sure the TV unit is horizontal, you can adjust the TV plate a little bit (± 3 degrees) to level the TV, then fasten TV plate by leveling bolts with Allen key **02**.

Tip: If TV still not level after adjustment, please loosen bolts a bit, hold TV to adjust to level, then fasten bolts securely with Allen key.

Step 8 Adjust the tilting angle with spring loaded handle:

Hold the TV and adjust it to your desired position, and fasten the handle and the bolt opposite to the handle.

To fasten the handle:

Step A

Turn handle clockwise until stopped by mount.

Step B

Pull out the handle.

Step C

While holding handle away from mount, turn it counterclockwise.

Step D

Push and release the handle.

Step E

Turn handle clockwise to further fasten the mount. Repeat these steps until TV firmly tightened.

Tips: Keep handle parallel with wall. Handle not parallel with wall may be broke by hitting the wall while TV being pushed back to the wall.

Adjust the swivel angle:

Grab TV and slide it to your desired direction.

Step 9 Manage TV cables orderly and tie them with velcro cable ties.
