Completeness check of the product

Before installation of the outdoor panel, it is necessary to check that it is complete and all components are available.

Outdoor panel kit includes:

Outdoor panel	1 pc
Flush mount bracket	1 pc
Manual	1 pc
Set of wires with connectors for connection of power supply, lock, and additional modules	1 pc
A set of cups	1 pc
Set of screws with a wrench	1 pc

Electrical connection

After verifying the device's completeness, you can switch to the outdoor panel connection.

For connection you will need:

- An Ethernet UTP CAT5 or higher cable connected to a PoE network switch or regular switch/router.

Cable length recommendations

The maximum length of the UTP CAT5 cable segment should not exceed 100 meters, according to the IEEE 802.3 standard.

- Power supply at +12 V, 2 amps.
- Wires must be connected to connect the door sensor, the exit button and the two locks control module (optional).

Connection scheme of electromagnetic lock using third-party power supply

Connection scheme of electromechanical lock using third party power supply

Mechanical mounting

Before installation of the outdoor panel it is necessary to provide a hole or a recess into a wall with dimensions 143×353×61 mm (for flush mount) dimensions of the bracket (mounting box) = 141×351×60 mm.

It is also necessary to provide supply of a power cable, additional modules and the local network.

Attention: the hole at the bottom is designed to drain the water. Do not intentionally close it. Also it is necessary to make a drain for water at the bottom of the niche which will serve to divert water out.
