Important Safety Instructions

Read all instructions before using this heater.

When using electrical appliances, basic safety precautions should always be followed to reduce the risk of fire, electric shock, or injury to persons, including the following:

- This heater is hot when in use. To avoid burns, do not let bare skin touch hot surfaces. Keep combustible materials, such as furniture, pillows, bedding, papers, clothes, and curtains at least 0.9m from the front of the heater.
- Extreme caution is necessary when any heater is used by or near children and whenever the heater is left operating and unattended.
- Always unplug heater or use isolation switch when not in use.
- Do not operate any heater with a damaged cord or plug, or after the heater malfunctions, has been dropped, or damaged in any manner.
- This heater is not intended for use in bathrooms, laundry areas, or similar locations. Never locate heater where it may fall into a bathtub or other water.
- Do not run the cord under carpeting. Do not cover cord with throw rugs, runners, or similar coverings. Do not run the cord under furniture or appliances. Arrange cord away from traffic areas and where it will not be tripped over.
- Connect to properly grounded outlets only.
- To disconnect heater, turn controls off, then remove plug from outlet or use the isolating switch.
- Do not insert or allow foreign objects to enter any ventilation or exhaust opening as this may cause an electric shock, fire, or damage the heater.
- To prevent a possible fire, do not block air intakes or exhaust in any manner. Do not use on soft surfaces, like a bed, where openings may become blocked.
- Do not use it in areas where gasoline, paint, or flammable liquids are used or stored.
- Use this heater only as described in this manual. Any other use not recommended by the manufacturer may cause fire, electric shock, or injury.
- Always plug heaters directly into a wall outlet/receptacle. Never use with an extension cord or power board.
- Use only the voltage specified on the rating plate of this heater.
- Ensure that the appliance is not located immediately below a wall outlet.
- To avoid burns when the heater is operating, do not touch the hot surfaces of the appliance. Switch off and let the heater cool before touching.
- There is a risk of electrical shock or fire hazard if the appliance is used improperly. Remove the mains plug or turn off the isolation switch immediately and discontinue use. Do not try to repair the appliance yourself. Please contact the distributor.
- Remove the plug from the power outlet or turn off the isolation switch and wait until the appliance has cooled off before cleaning.

- Keep out of reach of children. To keep children from the dangers of electrical appliances, never leave them unsupervised with the heater. When selecting the location for your heater, do so in such a way that children do not have access to the heater.

Remote Control Instructions

	Up Arrow		Up one heating level
	Max		The heater goes directly to the highest heating level
	Down Arrow		Down one heating level
	On		To switch the heater on: Press ON. The heater will start at a reduced power setting. After 4 seconds, the heater will automatically switch to the last heating level used. The first time the remote is used, the heater will automatically switch to 100% power after 4 seconds.
	Off		To switch the heater off: Press OFF. The heater will switch to standby mode (the receiver indicator will light up).

Notice:

- Use 2 AAA size 1.5V batteries in the remote control. Remove the batteries when the remote will not be used for an extended period.
- Do not mix old and new batteries in the remote control.
- If the remote control is lost, contact the distributor for help if required.
- The remote control may not work if there is a barrier between the remote control and heater.
- Replace the batteries regularly to maintain normal function of the heater and remote control.

Operation Instruction

- Remove all packaging material and check the appliance, supply cord, and plug for signs of damage before use.
- Check the mounting location and all mounting material (dowels, screws) to ensure they are suitable for the weight of the appliance.
- Ensure that the minimum safe mounting distances and tilt angles shown in the figures below are followed.
 - There must be at least 1.8m clearance between the bottom edge of the appliance and the floor, shown in figure 2.
 - There must be at least 0.25m clearance between the appliance and the ceiling, roof, or other covers, shown in figure 2.
 - There must be at least 0.5m clearance to each side of the appliance, shown in figure 2.
 - Recommended degree to mounting surface is 45°. See figure 3.
- Fix the mounting bracket to the ceiling before attaching the appliance.
- Adjust the desired angle of the heater and attach all screws. Regularly check and tighten screws as required; vibration or oscillation due to wind or rain could lead to the screws loosening.
- Plug in the power source and operate the remote control (The 3kW Model must be installed by a suitably qualified electrician due to the requirement of a 15 Amp power outlet and must comply with local regulations and building codes). Observe that the heater functions normally during the first 10-15 minutes. Unplug and call the distributor if required.
- If the heater is not to be used for an extended period, remove the batteries from the remote.
