FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

The antennas used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located for operating in conjunction with any other antenna or transmitter.

How to connect device by App

Step 1: Use your mobile phone to scan the QR code below or search "Smart Life" from Apple store or Google play to download the App

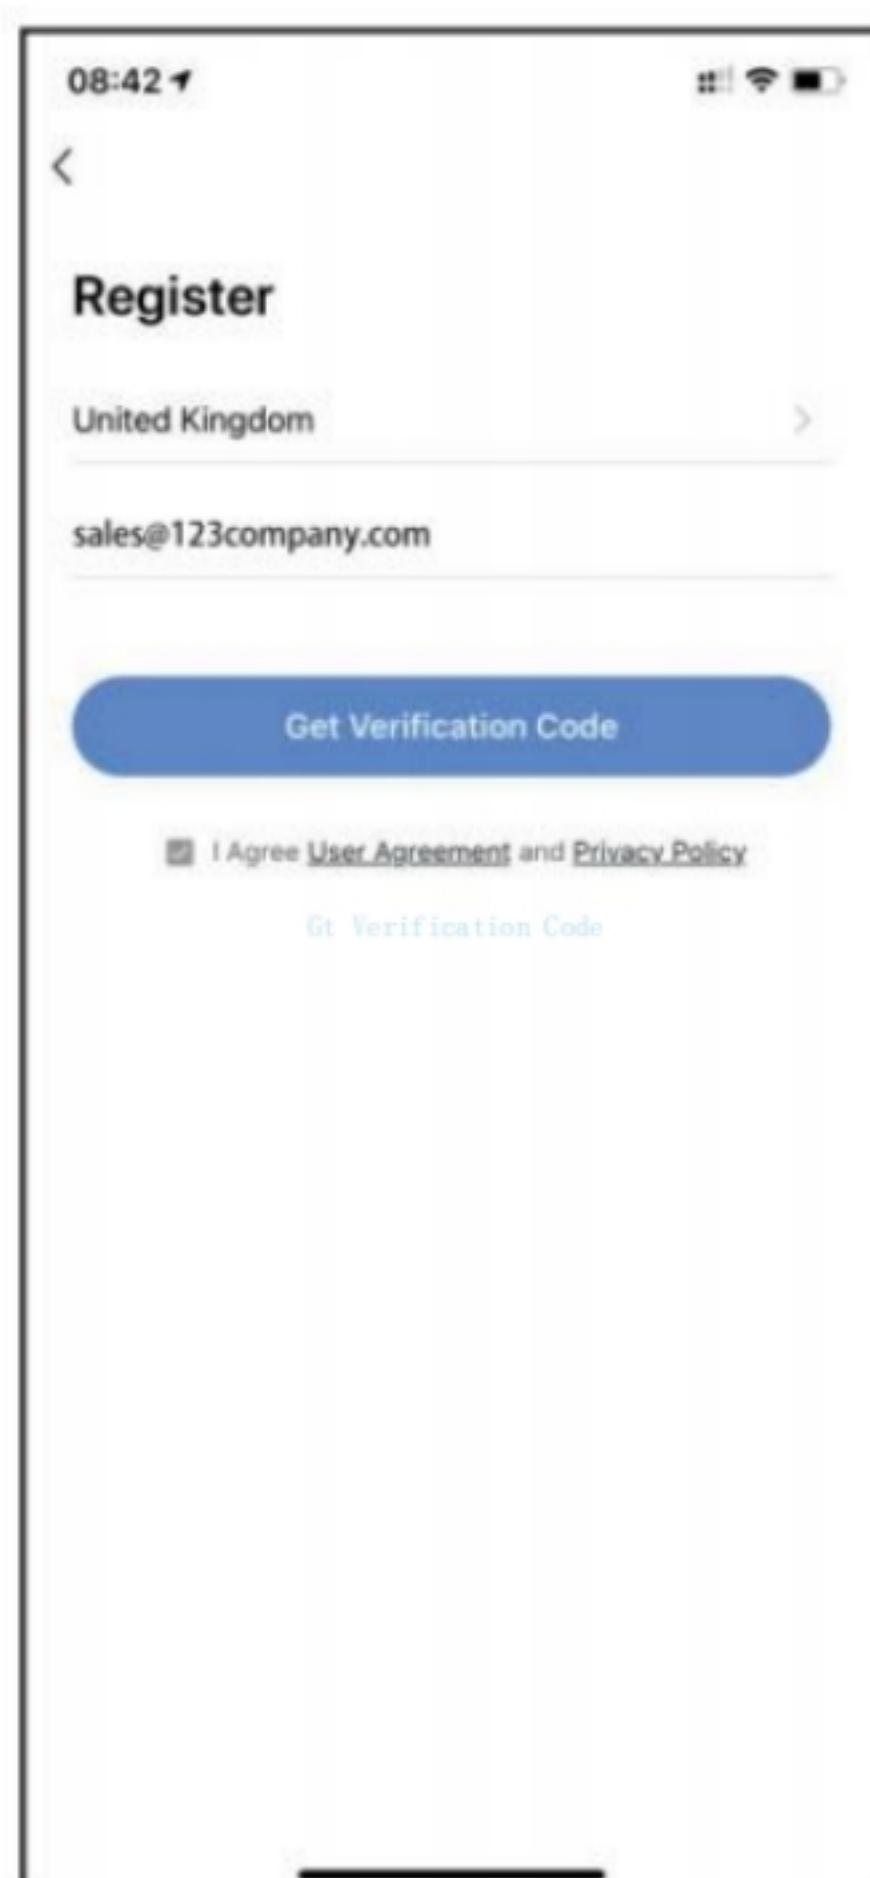

Input account name and password to log in.

If you don't have an account, please register an account first. System will auto identify your country. You can also select country by yourself. You can use mobile phone number or Email address as your account name.

-1-

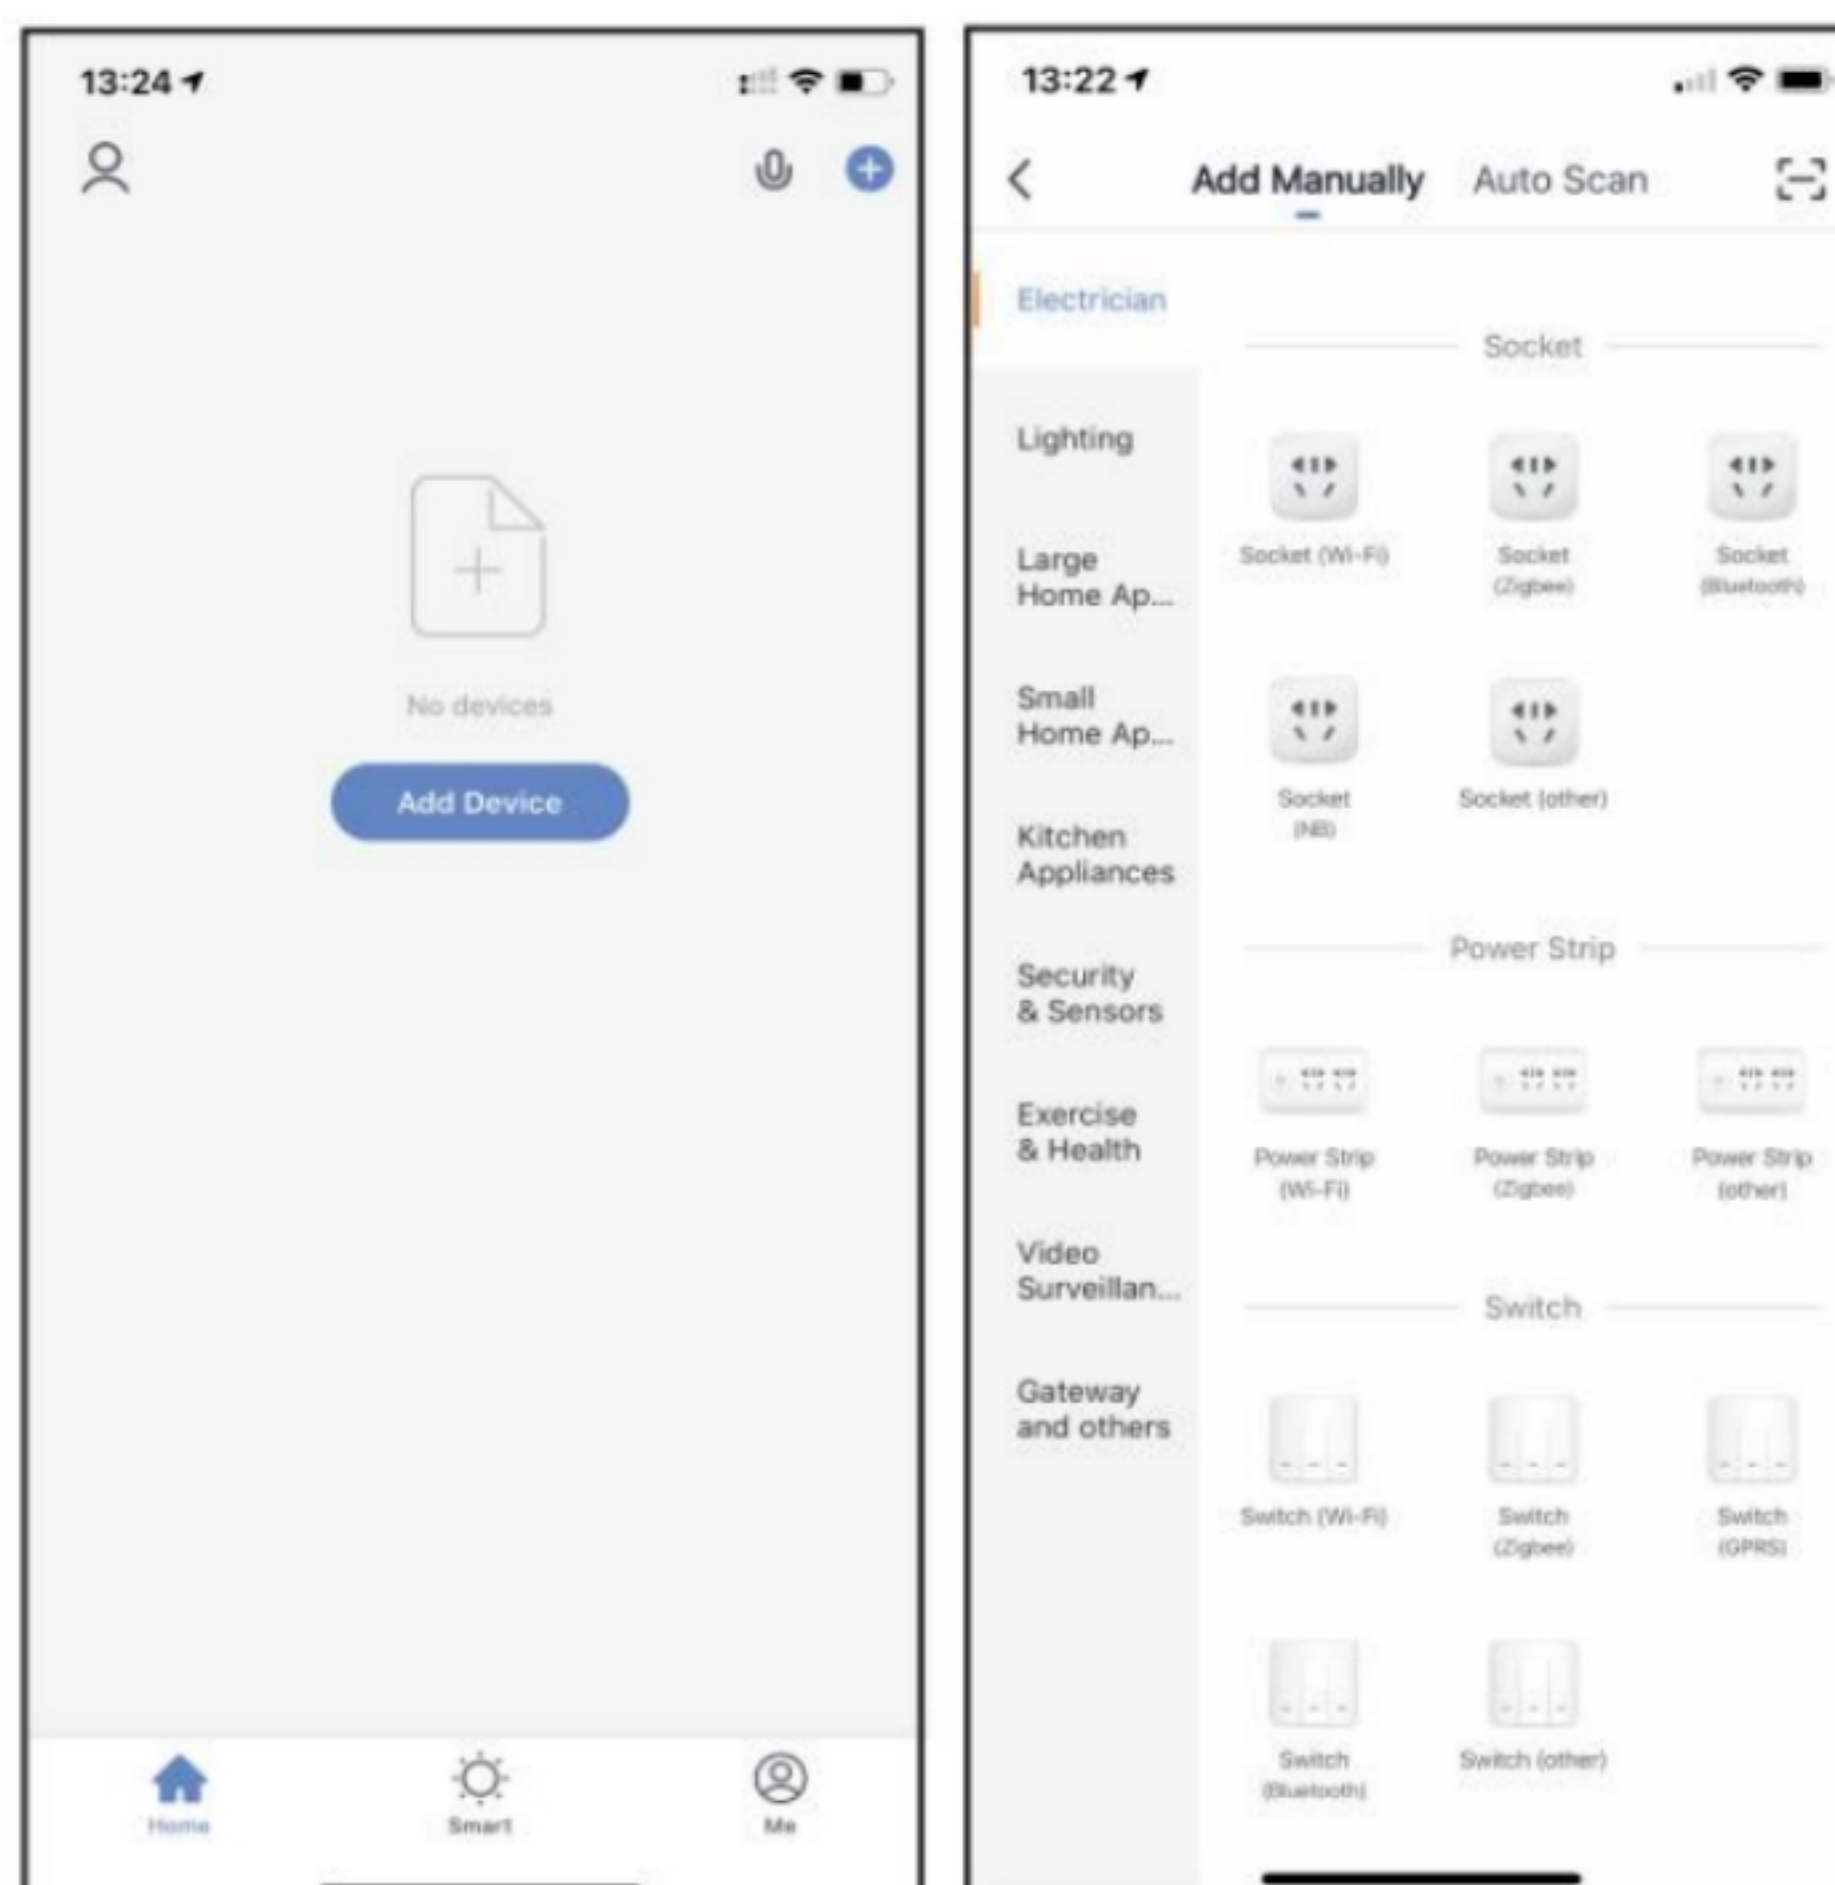

-2-

Tap on "Next" to get a verification code via SMS on your mobile phone. Enter a desired password. Tap on 'Confirm' to finish your registration.

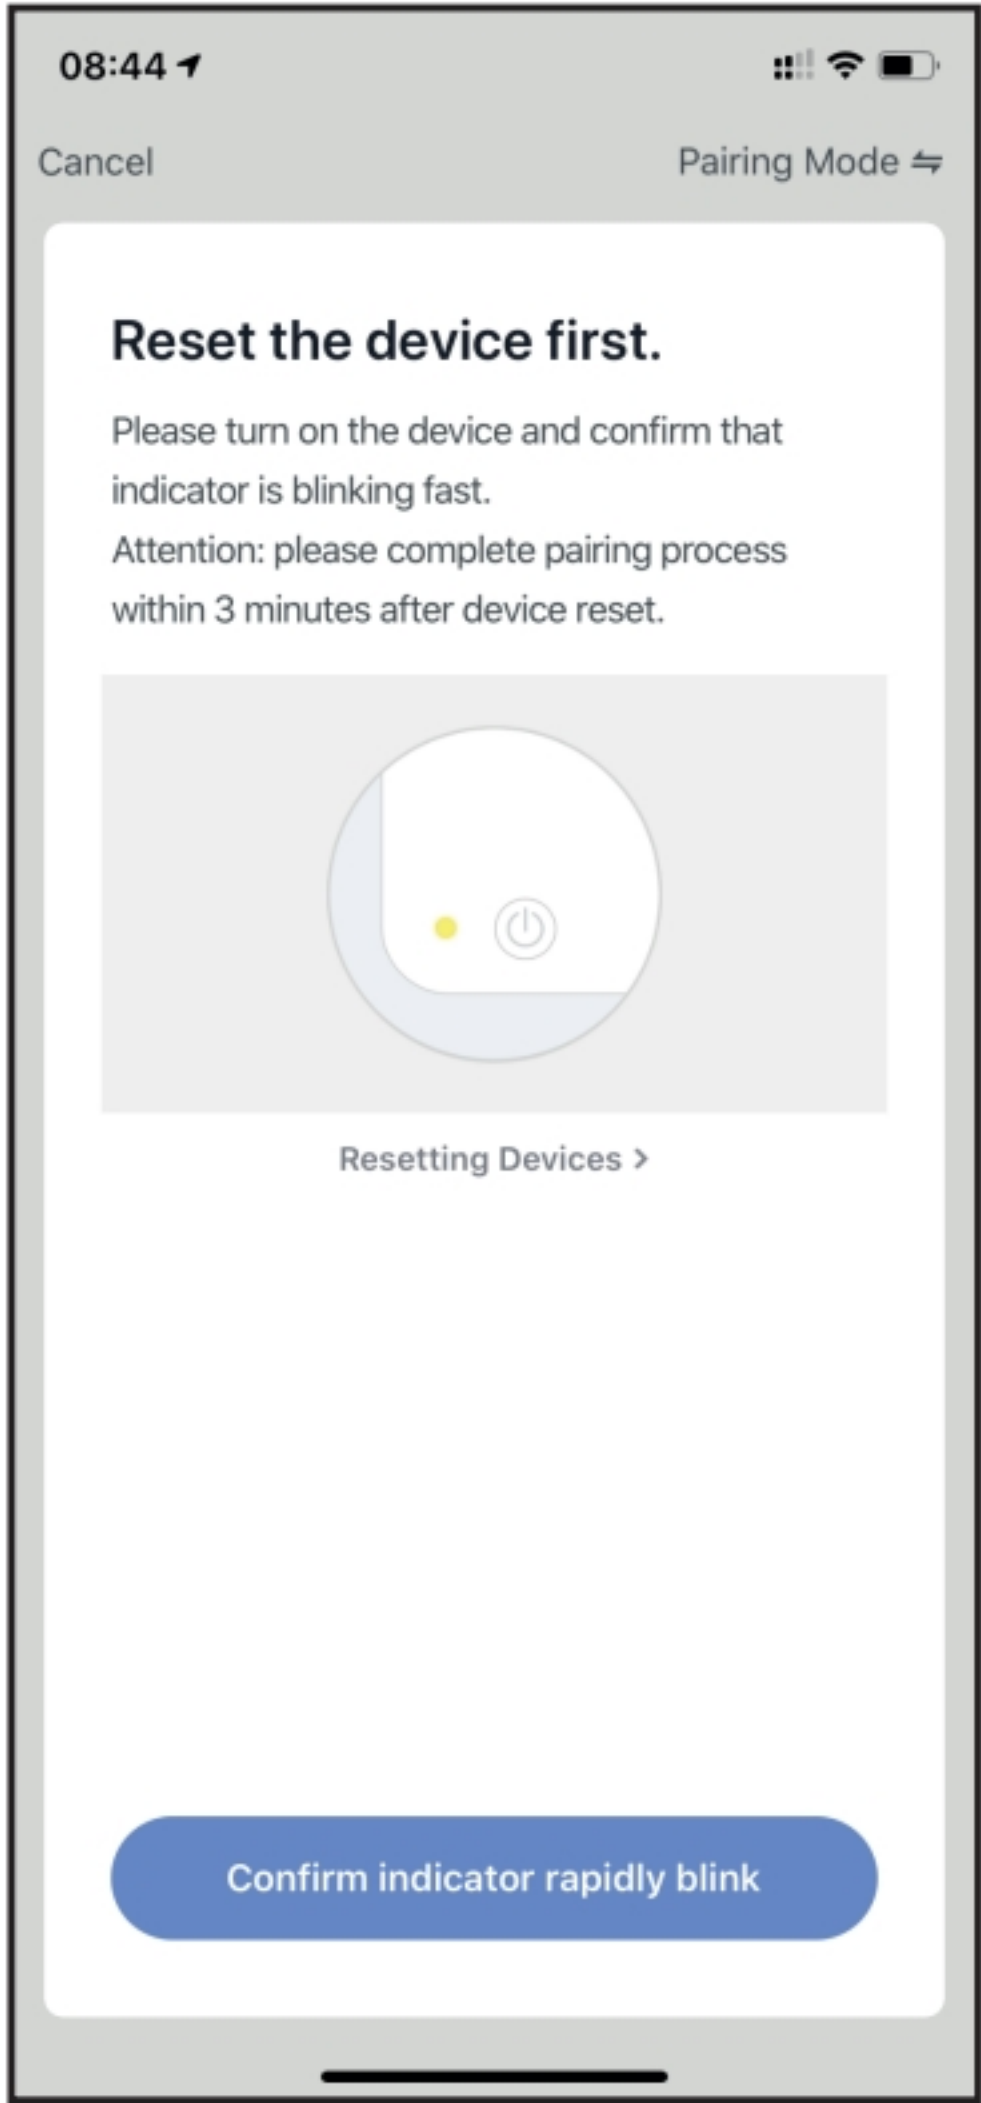

- 3 -

Make sure your mobile phone is connected to Wi-Fi of your home. Tap on "Add Device" or tap '+' on the upper right corner of the homepage. And select "Auto Scan" or select "swicth (Wi-Fi)" form the device type list.

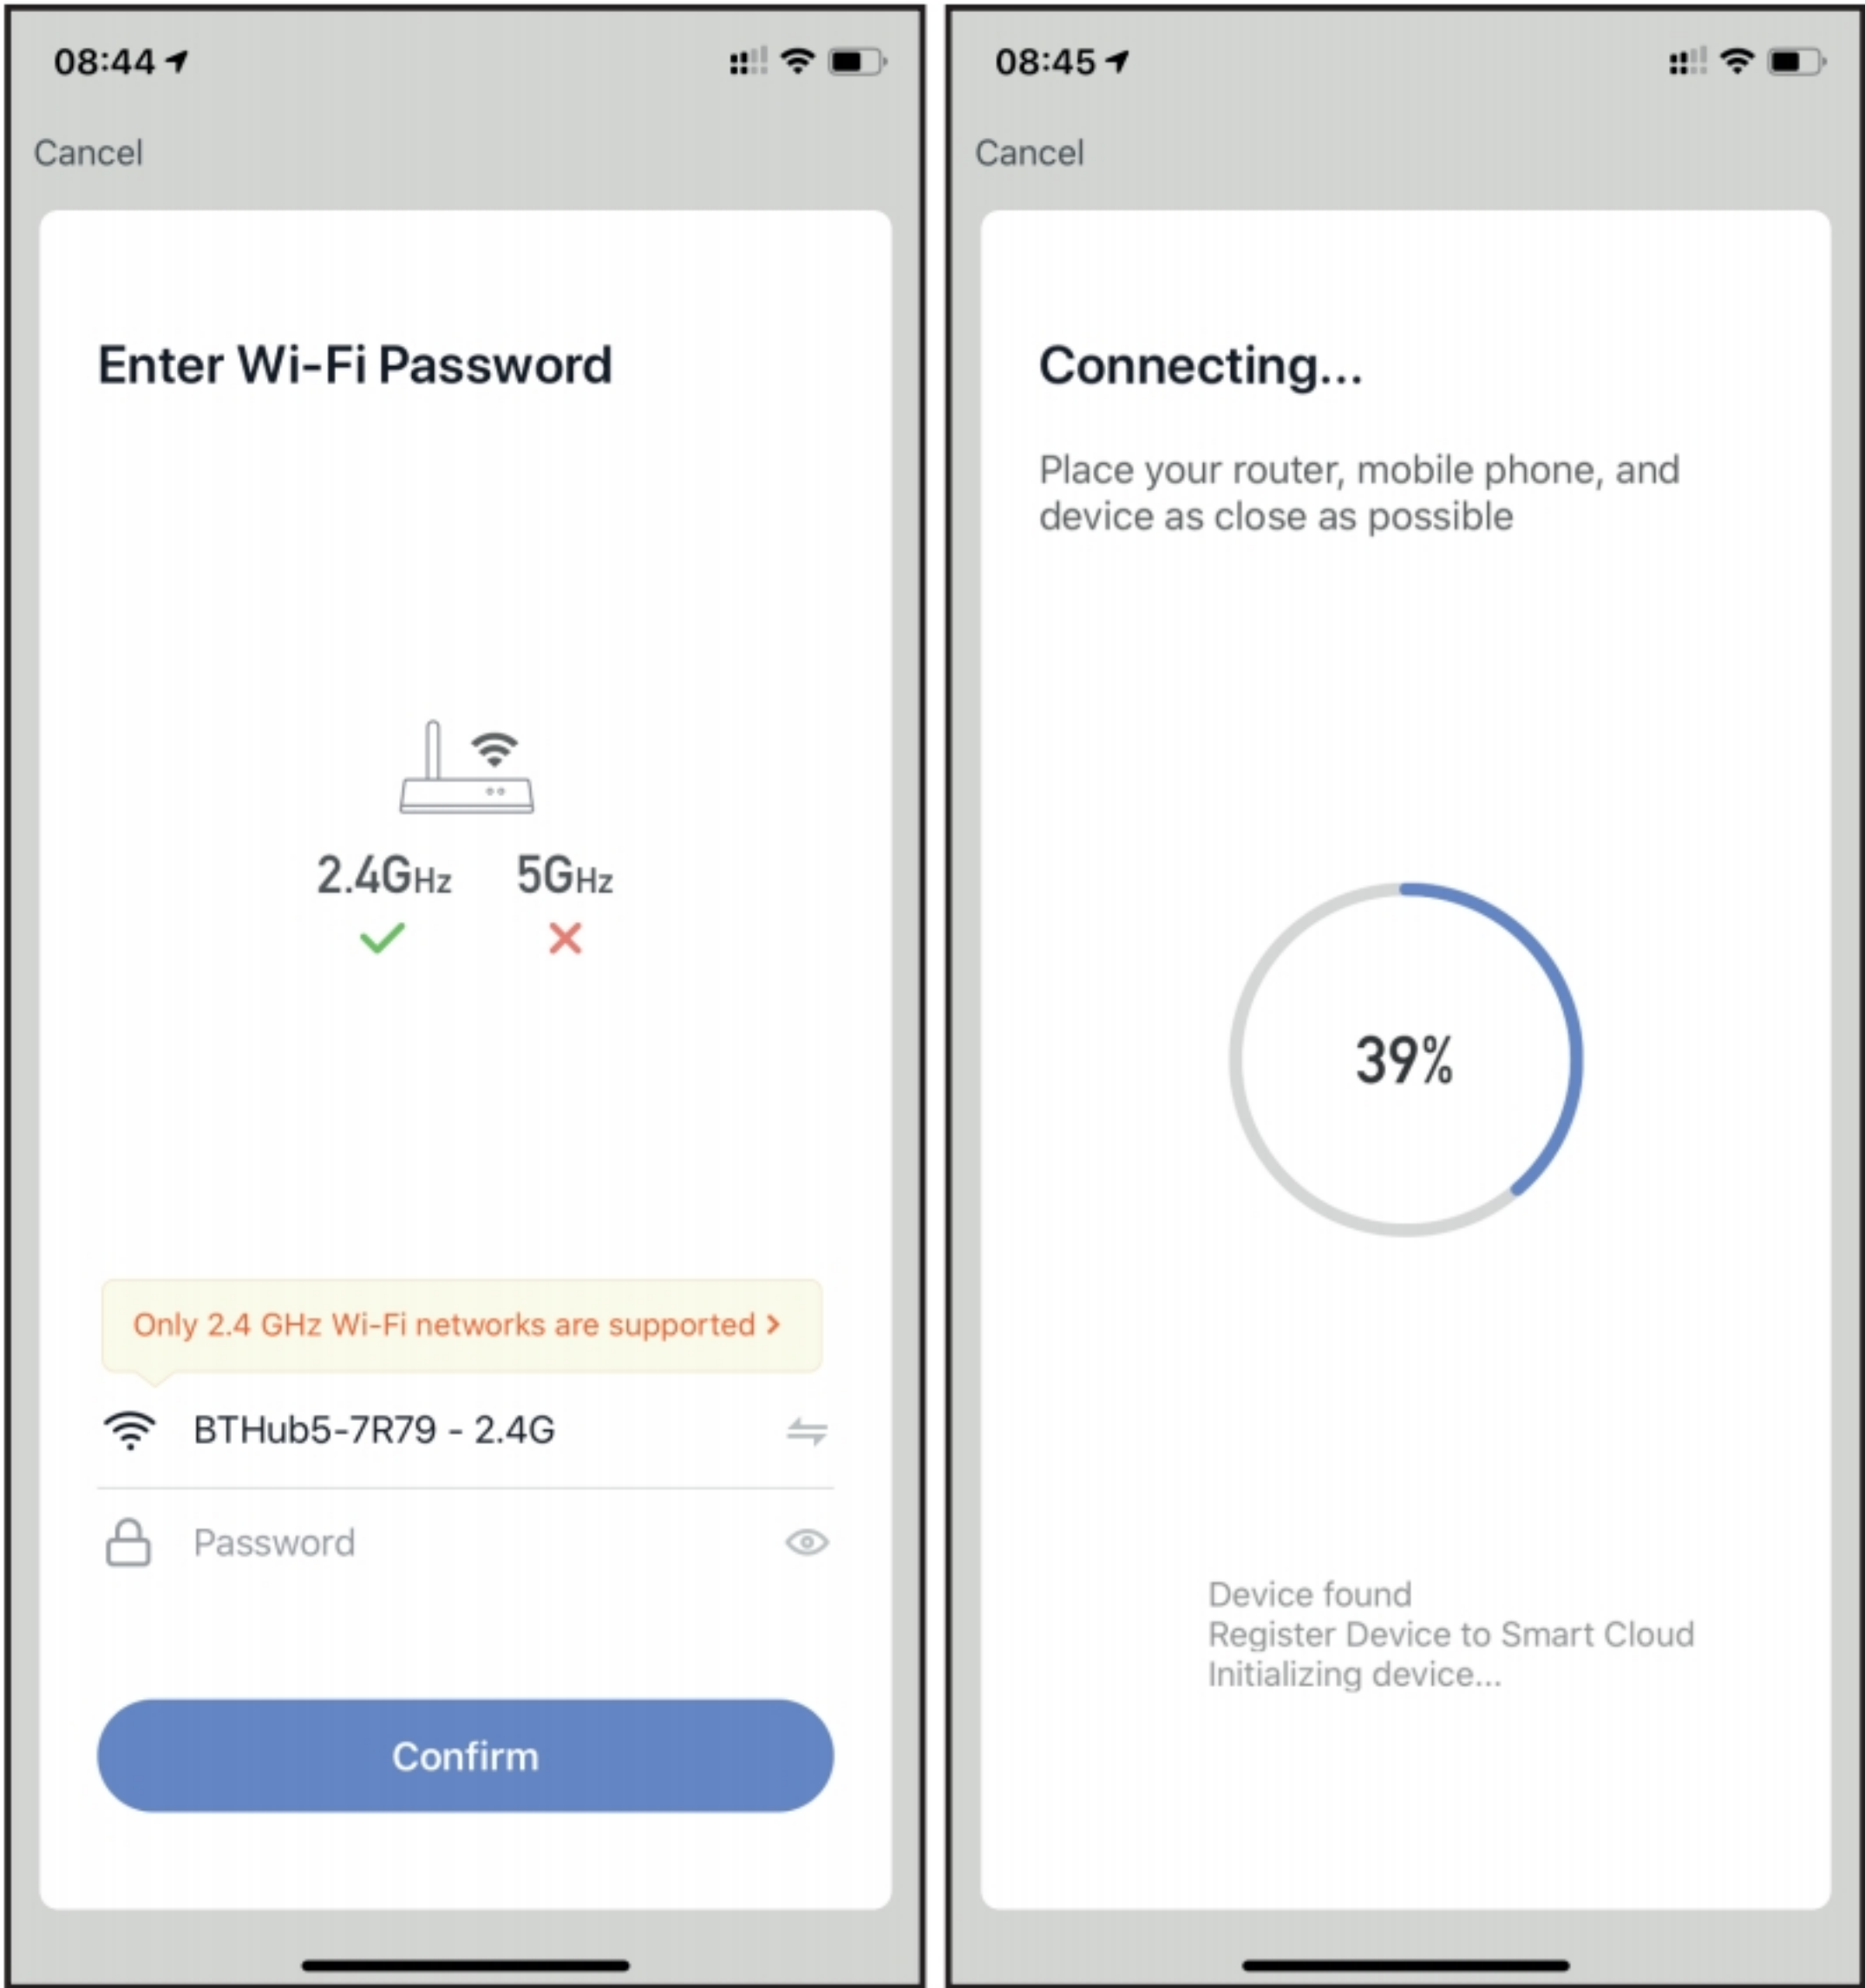

- 4 -

Step 2: Switch on power supply. The indicator light on the Wi-Fi dimmer switch will blink rapidly. If it does not blink, press the paring key for around 10 seconds. The indicator will flash from slow - fast - stay still. Then release when the indicator light is still. After 3 seconds, the indicator will blink rapidly (twice per second). Tap on “Confirm light rapidly blink” to continue.

- 5 -

Step 3: Select a network for your Wi-Fi dimmer switch and tap on “Confirm” to connect device.

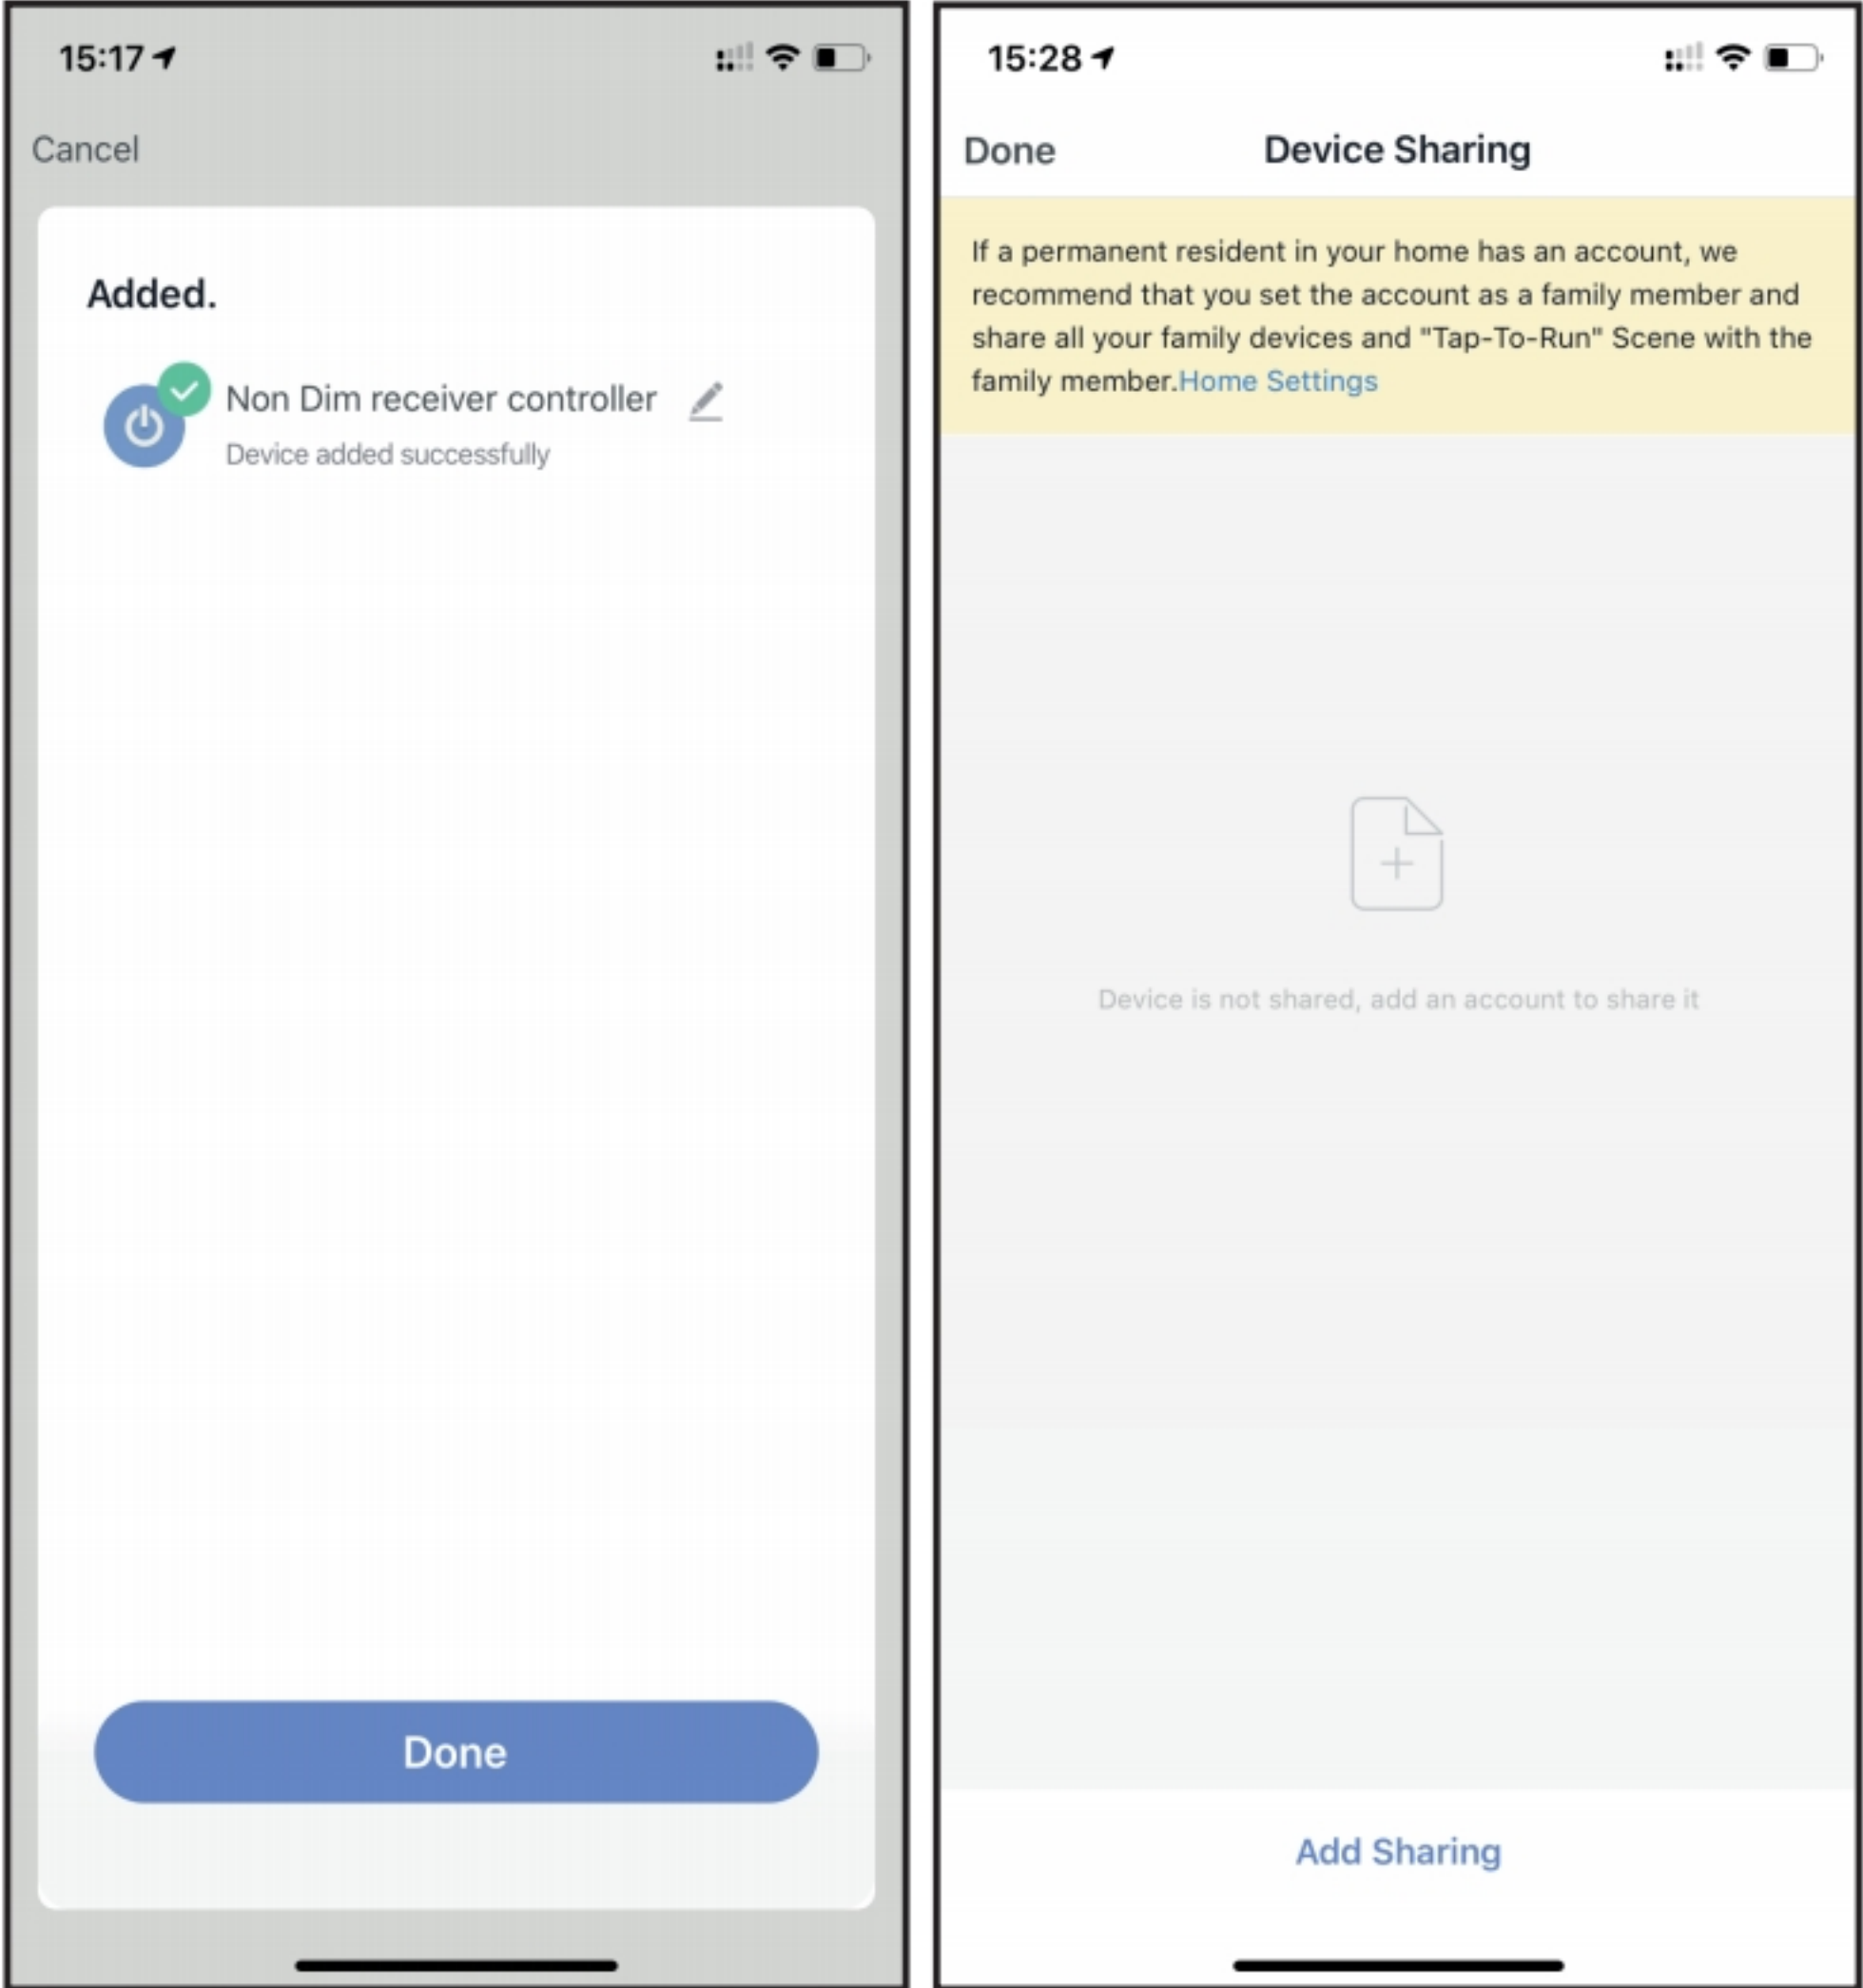

- 6 -
