FEATURES & BENEFITS

COOKING PRECISION

Our award-winning Gas on Glass Cooktops deliver total cooking precision with the latest burner technology. The consistent flame and heat distribution of the dual flame wok burner combined with highly responsive dials offer precise heat control.

DESIGNED TO MATCH

The black reflective glass, brushed stainless steel and polished metal trim blend elegance with durability and is designed to match the Fisher & Paykel family of appliances.

PRECISE CONTROL

Simply turn the dials to ignite the flame quickly and safely. Precise heat adjustment from very high to very low heat can perfect a slow simmer for sauces or an intense heat for searing steaks.

SAFE AND SOUND

The flame failure safety device automatically turns off the gas if the flame is accidentally extinguished. Eco-friendly ceramic glass, without arsenic or heavy metals, is used in the manufacturing process.

EASY CLEANING

Life is made a little easier with this easy to clean glass cooktop. The design allows you to simply remove the trivets, wipe down the glass and walk away.
