KVM Technology OVER IP - different possibilities 1 - 3 + Gateway2GO

1. DESCRIPTION

Windows App for live pics from the Switching System & Remote Workplaces

the flexible connection to the local kvm-tec switching system & for remote workplaces

Innovative user application in real time for all performant laptop or desktop - devices with Windows 10

In a local switching system, the performance is up to 60 fps without any delay

A special bandwidth management reduces the required bandwidth and allows remote work in near real time. Gateway2 go is connected to the internet via a VPN tunnel (for remote workplaces) and can thus be connected from remote workplaces to any PC in the Matrix Switching System.

for remote workplaces 70Mbit bandwidth

1. INSTALLATION

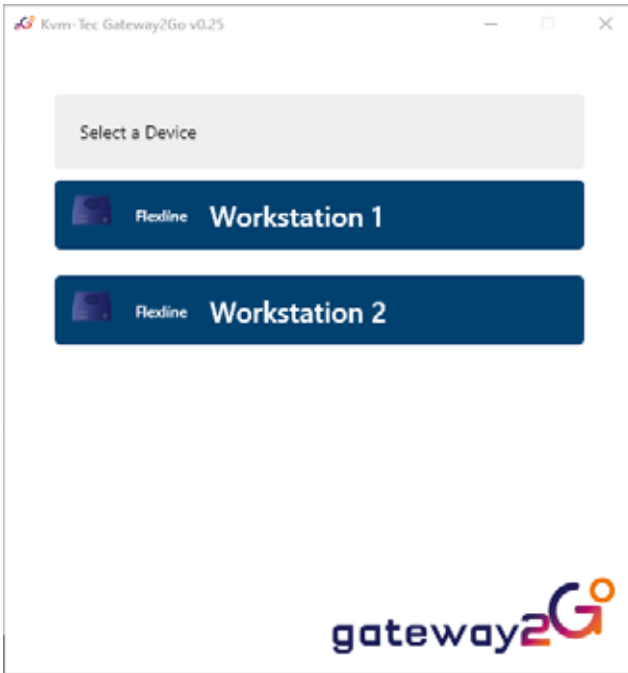

1. START APPLICATION

The application automatically searches for a switching manager or devices after startup.

When devices are found, they are displayed in a scrollable list.

1. INSTALLATION

To connect, simply select a device from the list, then click the Connect button.

1. INSTALLATION
