How to set up a Gmail connection in an AK-SM 8xxA?

Description

First action is to organize an email account.

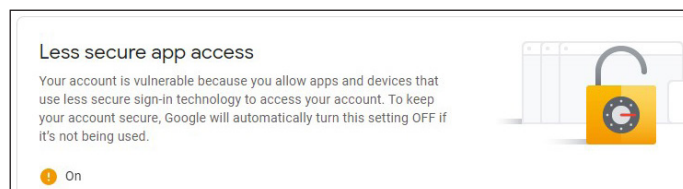

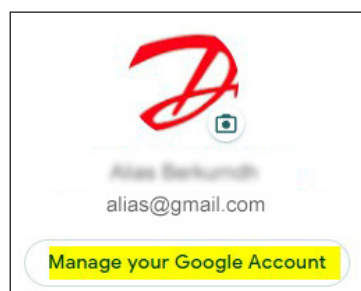

In the below example we have the following data (**Note:** the password needs to be replaced with a real one).

Server name : smtp.gmail.com
User : alias@gmail.com
Password : aliasadmin12345
Port : 465

Attention!

On your email account it is important that 3rd party devices, like the AK-SM 8xxA, are allowed to send messages.

Example: on your google account go to "Manage your Google Account" → "Security" and switch "Less secure apps access" ON:

If it is still not working use following [link](#) and follow the steps.

If you are accessing through StoreviewBrowser5 go to “Configuration” → “Alarms” and then “Connections”:
