

Quantum 24/150 Power Supply

Installation Guide for PN 701895-150E1

1. **Tools required:** Wire strippers, drill, and screwdriver.

2. **Supplies required:** Electrical enclosure for power supply, M4 pan head screws, PLTC cable, silicone, 3M™ Scotchlok™ connectors.

3. **Power Supply:** Identify primary wires, secondary wires, and location of mounting tabs.

4. **Mount Power Supplies:** Use mounting tab in corner to secure power supply.

5. **Connect Primary:**
CAUTION: Have a licensed electrician connect primary.

NOTE: Ensure adequate ventilation. Power supply operating ambient temperature is -40° to 60° C. Power supply may be mounted in an enclosure (i.e., transformer can/raceway). Power supply spacing to thermoplastic, wood, fiber, or other combustible type enclosure materials shall be 25 mm. Two or more adjacent power supplies shall not be mounted closer than 25 mm end to end or 102 mm side to side. Ensure power supplies are not overloaded by verifying output current is less than 6.25 DC Amps (each output). It is recommended to use photocells or light sensors to prolong life of power supply and to keep unit at maximum operating efficiency.

TROUBLESHOOTING

If sign is not functioning properly, check the following:

- Primary voltage is between 200-240 VAC
- Each secondary voltage is 24 VDC
- Each output current is 6.25 Amps or less
- Power supply is not overloaded (see power supply capacity chart in product installation guide or SloanLED.com)
- There are no shorts in secondary wiring
- All secondary connections are RED-TO-RED and BLACK-TO-BLACK

SloanLED products carry a limited warranty.
