

ARCHITECT Toaster panels

Instruction manual

Dualit®

Since 1945

⚠ CAUTION! Edges may be sharp. Use and clean with care.

Unplug the toaster and allow to cool to room temperature.
Risk of electric shock and scalding.

Place the toaster on its side on a soft cloth.

Using a Phillips screw driver (PH2), unscrew and remove panels.
NB. Do not operate the toaster with the panels removed.

Align the new panel with the screw holes on the body of the toaster.

Loosely screw in order of 1-4.

Tighten in place to secure, using the same order.
