Insert a correct SD card

Before turning on the camera, please insert the memory card. Please insert only brand name Class-10 or higher speed Micro SD card up to 256GB max.

Fake Memory Card Alert:

Do Not buy a memory card from eBay or any third-party sellers online; otherwise, you will most like going to get a Fake memory card. Fake memory cards and their packaging look identical to the genuine, but the difference is the speed and performance of the memory card.

Always connect to power

Now plug in to the power. The camera will turn on automatically as soon as it receives the power. Mini USB cable is short, it is used to transfer video to computer. We suggest you use supplied car charger to supply power for dash cam.

Make sure to keep your camera plugged into the power all the time because the internal battery is NOT meant to last more than 3-5 minutes when it is fully charged, battery is designed to save your personal settings.

Format SD Card

Before recording, please format sd card first. You need to press  button to stop recording (It means there is no red dot flashing upper left corner), then press  button twice to enter into system setting menu, and choose ok to format sd card.

WIFI Connection

(See the user manual on page 28)

1.Scan the QR code to download OKCAR APP(Or you can please search for “OKCAR” on APP store or Google Play and install it on your smart phone)

Scan the QR code to download App:

2.Turn on the WIFI function in setting menu of camera, the screen will show following images:

Have a good trip!

3. Find the WIFI spot named **Dash Cam B-T47*****, it is showed on the screen in your phone's WIFI list. Choose and input password **12345678**, and then wait for connection.

WiFi NameSSID ►	Dash-cam-B-T47_*****
Password ►	12345678

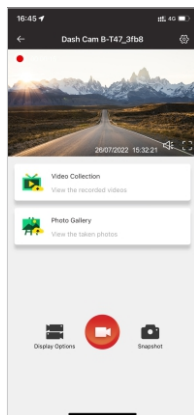

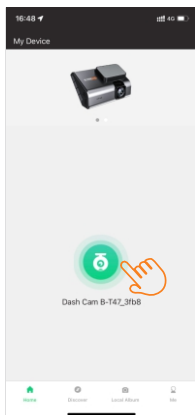

Find camera's wifi on phone

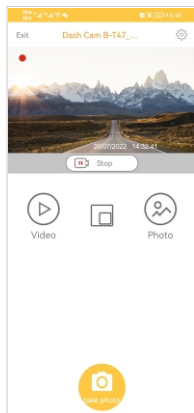

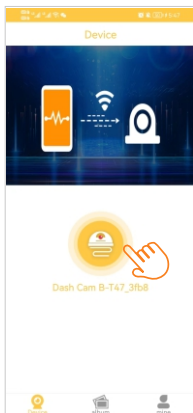

After Connected

	WIFI function not connected
	WIFI connected with smartphone

4. Open OKCAR APP, the camera will sync automatically. Then you can view live video or download video on smartphone.

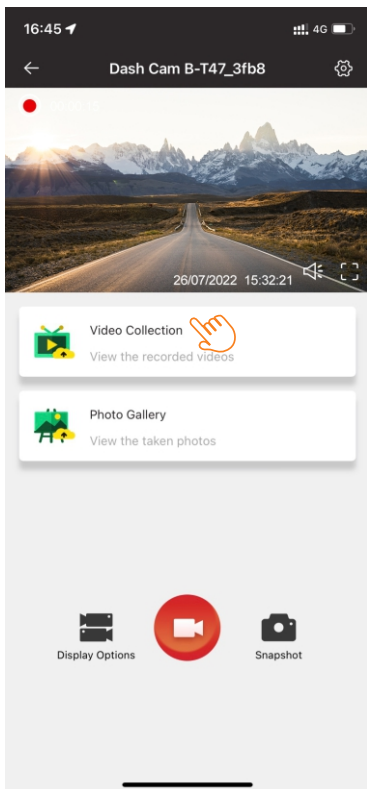

NOTE: If OKCAR APP is not suitable for your phone, you can also use "Roadcam" APP. You can please search it on APP store or Google Play.

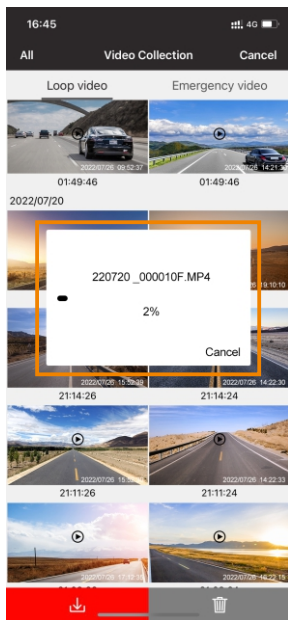

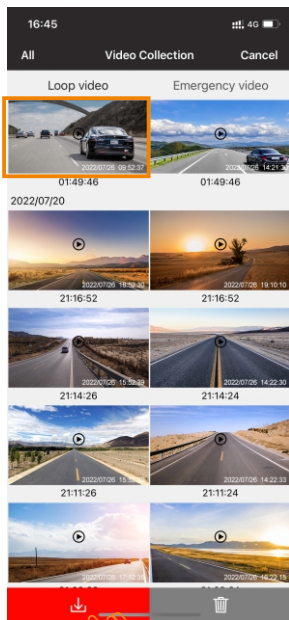

How to view video with GPS track on smart phone

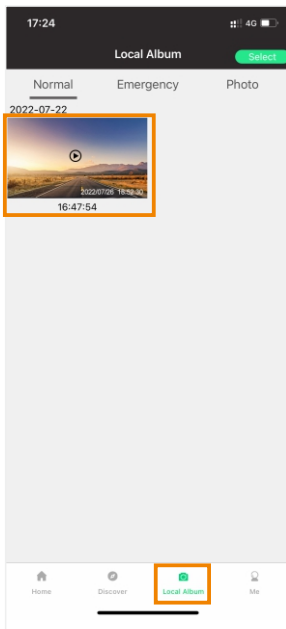

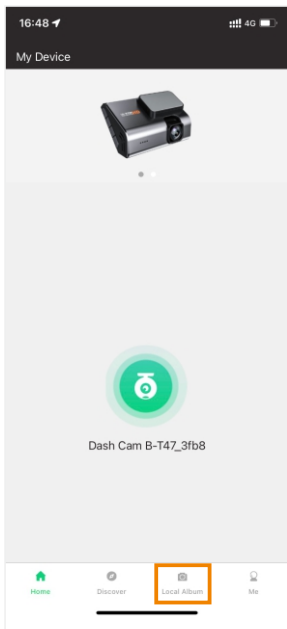

1. Click video collection.

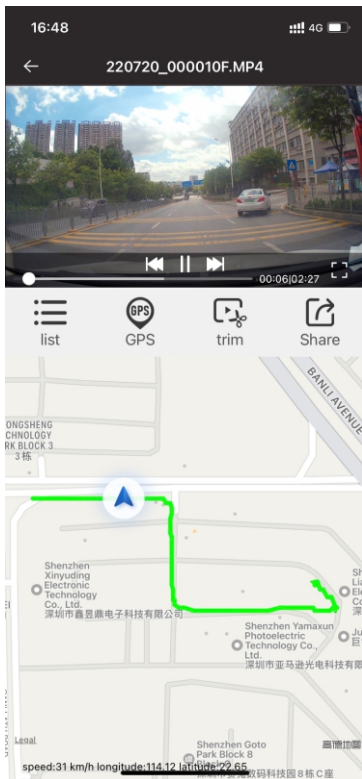

2. Choose the video that you want to view GPS track and download it to your phone's album first.

3.Exit the APP connection, and click Local Album.

4. Then you can play video with GPS track on OKCAR APP.

NOTE: If you want to view video with GPS track on computer, please read user manual on page 23.
