236L Top Mount Refrigerator

Model: ETM236S & ETM236W

Here's a little **Quick Start Guide** to help you start chilling with your new Esatto Top Mount Refrigerator — exactly what you need!

Esatto

236L Top Mount Refrigerator

Model: ETM236S & ETM236W

Let's get started!

Installation Tips

- Two person installation: Use two or more people to move and install the appliance. Failure to do so can result in back or other injury.
- Freestanding design: This appliance is designed to be freestanding only, and should not be recessed or built-in.
- Floor surface: This appliance must be properly positioned on a dry, sturdy, level surface that is strong enough to support it when it is fully loaded.
- Ambient temperature: The ambient temperatures must correspond to the climate class (T) indicated on the rating plate of the appliance: 16°C – 38°C
- Clearances: Ensure that air can circulate freely around the back of the cabinet, which is necessary to cool the compressor and condenser. Allow at least 10cm clear space at the back, 10cm at the sides of the unit and 30cm between the top and any surface above. If you are installing your refrigerator next to a fixed wall, leave sufficient space on the hinge side to allow for the door to swing open.

Note: For further installation instructions please refer to the user manual.

First Use

When starting up for the first time, keep the refrigerator still for 2 hours before connecting it to power supply.

Before putting any fresh or frozen foods in the fridge, ensure the fridge has run for 2–3 hours, or for at least 4 hours in summer when the ambient temperature is high.

Temperature Control

The temperature controls are located on the inside of the fridge.

To change the internal temperature of the fridge, press the Setting button to cycle through the various four temperature levels to select your desired setting.

Product Details

Size (mm) / **1522H × 545W × 610D**

Energy Rating / **3 Stars**

Warranty / **2 Years**
