

It all started with a chopping board.

Twin brothers, Antony and Richard Joseph, grew up in a family with a long history of design and manufacturing. Originally set up by their grandfather in the 1930s, the family business specialised in the production of glass components and the brothers spent part of their summers working in the factory.

In 1999, having both trained in product design, the twins embarked on their early careers. As a sideline to their jobs, and with the support of their father, they utilised the capabilities of the factory in Birmingham to develop their own range of contemporary glass chopping boards.

But what started out as a fun project soon became the seed of a new business idea. After early success with their bold, colourful designs their entrepreneurial spirit kicked in and, in 2003, the Joseph Joseph brand was born.

Whilst glass chopping boards were just the start, the brothers were also designing other innovative kitchenware products and this gradually developed into a broader range of housewares.

What quickly became a key foundation of the brand was a simple observation - many tasks around the home could be made much easier and more enjoyable with a little intelligent thinking. It was this problem-solving approach, and the ability to combine it with a distinctive design aesthetic, that created some of their most iconic kitchenware and has made Joseph Joseph one of the world's most progressive houseware brands.

There's something special about a Joseph Joseph product that sets it apart from the competition. First it engages you with its distinctive design; then it captivates you with its functional benefits; finally, it assures you with its high-quality materials and attention to detail.

Joseph Joseph's ability to blend innovative design, contemporary styling and a distinctive use of colour is unique within the industry. While many brands concentrate on just one of these aspects, Joseph Joseph focuses on the whole user experience - creating products that work beautifully and are a pleasure to have around the home.

Since 2003 the brand has expanded successfully into many product areas and it continues to explore new houseware categories. It may have all started with a simple glass chopping board, but Joseph Joseph is now one of the fastest growing companies in the worldwide housewares market and it continues to earn accolades and awards for its unique, innovative designs.

Fresh thinking for a changed world.

Home has never been more important than now.

The past 2 years have seen many of us forced to spend much more time inside than we would have ever thought possible.

Living rooms, bedroom and kitchens have become makeshift offices, trips away have been cancelled and staying-in has become the new normal for many.

If this has taught us anything, it's just how vital a well functioning home is and how important it is for the objects within it to perform efficiently.

At Joseph Joseph, we've always been passionate about inventing housewares that improve the simple, everyday tasks we all encounter.

Whether it's preparing a meal, organising the kitchen and bathroom or dealing with waste, we've always looked for ways to make these tasks easier or more enjoyable to do.

And this season is no exception.

We're excited to say we're launching GoRecycle, an exciting range of products designed specifically to make organizing and storing recycling at home hassle free. Comprising clever caddies and a smart recycling collector, the range is perfect for use in kitchens or utility rooms.

Add to this our existing range of inventive waste and recycling bins - along with the all-important liners and accessories - and you've got a comprehensive range of waste management solutions to choose from.

It's been a challenging period for all, with the retail and the housewares industries no exception. But at Joseph Joseph we believe that adversity also offers opportunities - the chance to challenge the status quo, to be creative and to do things better.

In short 'fresh thinking', which is at the core of our approach and which, we hope, delights customers and consumers alike.

Antony & Richard Joseph

Waste & Recycling

GoRecycle Portable recycling caddies

Design registered

We're all conscious of the need to recycle more, but the extra effort to separate, compact and store waste ready for collection can be a hassle and often creates more mess and clutter. That's why we created GoRecycle, a range of inventive products specifically designed to make home recycling quicker and easier.

It's easy to pre-sort, store and transport recycling with these smart, compact caddies. They are divided into two compartments allowing you to separate different types of recycling - such as glass and paper - with lids that close to hide the contents of each side. These lids, when opened together, create a handle making it very easy to transfer recycling to a larger bin kerbside or elsewhere. The two compartments can then be emptied independently by simply folding both lids to each side in turn, which traps the waste in one side as you empty the other.

Wash by hand with hot, soapy water. To help remove unpleasant odours, a solution of baking powder and water may also be used.

Available in two sizes -
14-litres (3.7 US Gallons) and
28-litres (7.4 US Gallons).

Lift lids to create a convenient carry handle

Dual compartments for easy separation

GoRecycle 28-litre caddy
(30110)
Dimensions H39.5 x D25 x W44 cm
(H15.6 x D9.8 x W17.3 inches)

GoRecycle Recycling collector

Design registered

Empty recycling less often with this simple but effective design. It comprises a large 32-litre compartment with a clip-on lid featuring one-way flaps that help trap items as they are pushed in, allowing you to fit more in without it popping back out again. Particularly suitable for a mix of plastic, card and paper waste, you can fit up to twice as much crushable waste inside, as a similar sized bin. If used with a plastic liner, the deep rim of the lid helps hide any unsightly bag overhang and also makes it very easy to carry. To empty, simply unclip the lid to tip into a communal bin or to remove a full plastic liner. Ideal for fitting a large amount of recycling in a compact space.

Wash by hand with hot, soapy water. To help remove unpleasant odours, a solution of baking powder and water may also be used. Not suitable for use with glass.

Capacity: 32-litre (8.4 US Gallons).

Holds up to twice as much crushable waste as a similar-sized bin

Totem Waste & recycling units

Design by PearsonLloyd
Design registered

Totem is an award-winning design that combines all your waste and recycling in one compact unit. It features two compartments arranged vertically, which saves space and makes them very easy to fill and empty. Each compartment has a removable bucket that can be fitted with a single standard liner for general waste or two smaller bags, using the integrated bag hooks, for separating different types of recycling. Breather vents in the bucket sides make removing a full liner easier.

Totem also features a ventilated odour filter in the main lid that helps reduce moisture and odour build up from waste. The design comes with a 3-litre (0.8 US Gallon) removable food waste caddy that can be stored in either compartment, or on the worktop. Stylish, practical and durable, Totem is available in two sizes - Totem Max (60 litres/15.8 US Gallons) and Totem Compact (40 litres/10.5 US Gallons). Custom-fit liners for the main compartments and compostable liners for the food waste caddy are available separately, as are replaceable odour filters. Stainless-steel versions feature a fingerprint-proof coating, whilst other models feature an easy-clean powder-coated steel finish.

Choose the right custom-fit liner: Totem Max (60L) - IW2 and IW6; Totem Compact (40L) - IW2 and IW7.

10-year guarantee. External surfaces: Wipe clean with a damp cloth and then dry with a soft, dry cloth.

Top and bottom buckets are interchangeable and feature angled corners to allow easy removal

Integrated odour control using a replaceable activated carbon filter

Removable bucket with liner retaining holes and carrier bag hooks

Totem Pop

Waste & recycling units

Design by PearsonLloyd
Design registered

Totem Pop combines all your waste and recycling in one compact unit and features two compartments arranged vertically, which saves space and makes them very easy to fill and empty. The top compartment has a removable bucket with breather vents in the sides that make removing a full liner easier. The bottom compartment can be pulled out completely and features a removable rim that hides any untidy liner overhang. Both compartments can be fitted with a single liner for general waste but also feature integrated bag hooks allowing you to divide the space with two smaller bags for separating different types of recycling. Totem also features a ventilated odour filter in the lid that helps reduce moisture and odour build-up from waste. Stylish, practical and durable, Totem Pop is available in two sizes - 60L and 40L. Custom-fit liners for the top compartment are available separately, as are replaceable odour filters. Choose the right custom-fit liner: Totem Pop (60L) - IW6; Totem Pop (40L) - IW7.

Titan

Trash compactors

Design registered

Titan is no ordinary waste unit. It features a patented, hygienic compaction system that enables it to hold up to 3 times more waste than a similar-sized domestic unit. Because Titan compacts your waste, it doesn't need to be emptied as often, which in turn reduces the amount of liners you use and also the amount of full liners that you have to deal with between collections.

Titan is built to last. Its compaction system and foot pedal have been tested over 100,000 times and are engineered to withstand repeated downward force. It's hygienic and mess-free too. The unique design ensures only the inside of the plastic liner touches the trash whilst compacting, leaving you with clean hands and a clean bin. It also features a replaceable odour filter for any unpleasant smells and a fingerprint-proof stainless-steel coating.

With Titan you can compact with confidence. It has an anti-tear design that won't stretch or pinch the liner and it has its own extra-strong, custom-fit liners for added peace of mind. It's also compatible with standard plastic liners.

A handy lid-stay feature ensures liner changes are quick and hassle-free, and it also includes a handle on the reverse to make moving easy.

Available in a range of sizes and finishes. 10-year guarantee.

Food waste caddy with odour filter

Design by PearsonLloyd
Design registered

This clever caddy has been carefully designed to help reduce the smell from collected food waste. It has a unique, ventilated design that allows air to enter and circulate inside the caddy, which helps to reduce moisture - the main cause of unpleasant odours from decomposing food.

In addition, it features a replaceable odour filter in the lid that works in tandem with the fresh air to help trap any smells that do occur. It has an easy-clean polypropylene body, a flip-top lid and a sturdy stainless-steel carry handle. A liner-retaining hole inside ensures any liners stay in place and the rim of the removable lid hides any untidy bag overhang. Perfect for storing on a kitchen worktop. Custom-fit, compostable liners (IW2) are available separately for the perfect fit.

Total capacity: 4L (1 US Gallon).
Wash by hand with hot, soapy water.

Store on the worktop

Compo™ 4

Easy-fill food waste caddy

Design registered

This slimline food waste caddy has been specifically designed to make collecting food scraps easier. It features a convenient flip-up lid and an extra-wide aperture, ideal for capturing food waste scraped directly from plates. An adjustable air vent in the lid can be opened to allow moisture to escape - thereby reducing odour build up - or closed to provide a barrier to insects in hotter climates. The slender design is perfect for storing on the worktop or inside a cupboard and it comes with its own bracket for mounting on a cupboard door. Suitable for use with Joseph Joseph IW2 custom-fit liners.

Wash and dry by hand.
