- ◆ Nintendo Switch, GoPro Hero 5, DJI Osmo Pocket Handheld 3 Axis Gimbal Stabilizer with Integrated Camera, and etc

Attention:

- Support 4K@60Hz video transmission.
- It's suggested to **be connected to a USB 3.0 port** for a faster data transfer speed. The transfer speed is slow and cannot reach a normal speed when the cable is connected to the USB 2.0 port.
- Cannot be used with chargers or electrical appliances without safety certification.
- Avoid contact with strong acid substances or long-term use in an acidic environment.
- Avoid using sharp objects to cut wires or metal parts.
- The outer quilt is damaged due to external forces such as aging, violent bending, sharp object cutting, etc. If the internal core wire structure is exposed, please replace it in time.
- The connector of your cable is a little bigger than the normal cable. Because we change the shape of the aluminum shell when we want to improve the quality of this cable. **If you can not charge your device when wearing a thick protective case, we suggest that you remove the protective case.**

Warranty:

If any of the products you've purchased from Rampow fail to function as promised, please use the Warranty Claim system to get the quickest resolution. We will come back to you ASAP.

RAMPOW Conditional Lifetime Warranty:

For the benefits of our customers, we extend the 12-month Warranty to Conditional Lifetime Warranty for customers who have registered their products on our website:

<https://www.rampow.com/warranty>

To extend and validate Conditional Lifetime Warranty for your purchases, you'll have to register your product with a valid email address and Order ID. Once registered, you'll receive a confirmation. If you fail to receive anything, please kindly check the junk mailbox or contact us.
