

INCLUDES

2x HEPA Filters
2x Copper Filters
2x Sets of Side Brushes
20x Aroma Pads
1x Roller Brush
1x Sweep Guard
2x Cleaning brushes

INSTRUCTIONS – FILTERS

- 1) Make sure HUVI is switched off, then remove the dust container.
- 2) Open the dust container and remove the old HEPA filter and copper filter components. Dispose of the old filters.

- 3) Align a new HEPA filter with the bottom of a new copper filter, then insert the assembled piece into the dust container.
- 4) Close the dust container, then attach the dust container to HUVI.

CARE & CLEANING – FILTERS

- 1) Remove and open the dust container.
- 2) Remove the HEPA filter and copper filter components.
- 3) Clean the dust container and filters with the cleaning brush or by hand.
- 4) Put the filters back together in the dust container, then reinsert the dust container into your HUVI.

INSTRUCTIONS – ROLLER BRUSH & SWEEP GUARD

- 1) Make sure HUVI is switched off.
- 2) Push the two release tabs to unlock the sweep guard, then lift the roller brush to remove. Dispose of the old sweep guard and roller brush.

- 3) Install the new roller brush by inserting the fixed protruding end first so that the brush clicks into place.
- 4) Attach the new sweep guard. Press down to snap the sweep guard into place.

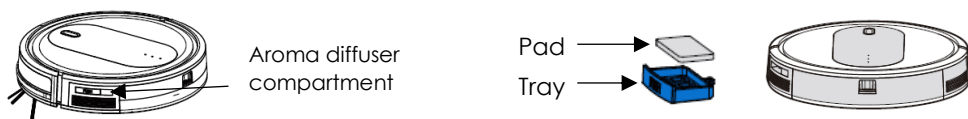

CARE & CLEANING – ROLLER BRUSH & SWEEP GUARD

- 1) Remove the roller brush and sweep guard.

- 2) Clean the roller brush as well as the suction intake with the provided cleaning tool or by hand to remove any debris or obstructions.
- 3) Reinstall the roller brush by inserting the fixed protruding end first so that the brush clicks into place.
- 4) Reattach the sweep guard. Press down to snap it into place.

INSTRUCTIONS – AROMA PADS

- 1) Push down on the aroma diffuser compartment until it softly clicks and opens.
- 2) Remove the tray and pad inside. Dispose of the old oil pad.

- 3) Place a few drops of aroma or essential oil of your choosing on one of the new pads.
- 4) Place the new pad inside of the tray, then reinsert the tray into the oil diffuser compartment until it clicks in place.

NOTE: Do not reuse or clean pads. A fresh pad should be used whenever oil needs to be replenished.

INSTRUCTIONS – SIDE BRUSHES

- 1) Make sure HU:VI is switched off. Gently but firmly remove the old brushes (**Fig. A**), then dispose of the old brushes.
- 2) Attach the new side brushes by pressing the brush into each slot until it clicks. Make sure to match the letter on the brush with the letter on HU:VI (**Fig. B**).

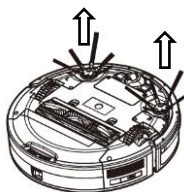

Fig. A

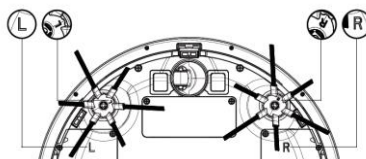

Fig. B

CARE & CLEANING – SIDE BRUSHES

- 1) Remove the side brushes from HU:VI. Carefully remove any debris wrapped between the main unit and the side brushes.
- 2) Use a cloth dampened with warm water to remove any dust from the brushes or to gently reshape them.
- 3) Allow the brushes to fully dry before reattaching.
