

8QT Quick Start Guide*

* See owner's manual for complete instructions and important safety information before using this product.

Step 1

Place Inner Pot into the unit.

Step 2

Add ingredients.

Step 3

Place Lid on Cooker with Handle and Recessed Valve pointed to the "10:00 o'clock" position. Rotate Lid counter-clockwise until you feel a click.

Step 4

Rotate Pressure Valve to the lock position.

Step 5

Follow your recipe for correct cook time.

Step 6

For easiest cleanup, wash Power Pressure Cooker parts immediately after cooking. Place dishwasher safe parts on the top rack only.

NOTE: The Power Cooker Plus will take 15 - 17 minutes to pressurize before it starts to cook.

Wash All Components Before First Use

Digital Control Panel — Overview

The Power Cooker Plus has up to seven basic cooking modes that may be used alone or in combination to produce an infinite variety of results. This Quick Start Guide provides Step-By-Step instructions.

WHEN THE UNIT IS FIRST PLUGGED IN, 0000 will appear on the LED Display. When a cooking process is selected, such as COOK, the default time will blink 5 times. Then, rotating double zeros may appear on the left side of the screen to signify it is building pressure. Once pressure is built, the zeros will stop rotating and begin counting down the time. The unit will beep, and the LED Display will be blank. Enter KEEP WARM mode once the time has expired until cancelled.

NOTE: Go to page 6 of the manual for complete control information.

MODE	DESCRIPTION
1  DELAY TIMER	DELAY TIMER Button — Delays the cooking start time. It will change in 30-minute increments.
2  CANNING/PRESERVING	CANNING / PRESERVING Button — Higher pressure setting used mainly for Canning & Preserves. It can be changed in 10-minute increments.
