Side Mounting

General Installation Steps & Maintenance

1. Drill the armature plate holes in the door using the sticker template provided.
2. Attach the armature plate to the door with the hardware provided as per the illustration.
3. With the door closed, mark the door frame at the edge of the armature in order to properly align the electromagnet to the armature.
4. Attach the mounting plate to the door frame using the self-tapping screws provided. Align the mounting plate with the mark from the previous instruction.
5. Insert the wires through the hole in the mounting plate and attach the electromagnet unit to the mounting plate with the allen head fixing screw.
6. Connect the power wires according to the instruction and test the system.
7. It is recommended that to apply a light coat of silicon lubricant to the mating surface on a monthly basis to prevent rust.

Wiring Instructions

IMPORTANT!

Before the power supply is switched on, set the wiring correctly.
