

INTRODUCTION

Before you begin to use this to use this trampoline, you must read all the information in this manual. Just like any other type of physical recreational activities, Participants can be in injured. To reduce the risk of injury is sure to follow the appropriate safety rules and tips.

Safety rules and tips.

- Misuse and abuse of this trampoline is dangerous and can cause serious injury!
- Trampolines are rebounding devices which propel the performer to unaccustomed heights through a variety of movements. So always use caution when playing on a trampoline.
- Always inspect the trampoline before each use.
- Proper assembly, care and maintenance of product, safety tips, warnings and proper techniques in jumping and bouncing are all included in this manual. All users and supervisors must read and familiarize themselves with these instructions. Anybody who choose to use this trampoline must be aware of their own limitations in regards to performing various jumps and bouncers with this trampoline.

Initially, you should get accustomed to feel and bounce of the trampoline. The focus must be on your body position and you should practice each fundamental bounce and until you can do each skill with bounce before moving on to more difficult and advanced bounces. Do not bounce recklessly on the trampoline, emphasis must be made on good control and the mastering of various bounce techniques.

No more than one person is allowed on the trampoline! Multiple jumper increase the risk of injury resulting from min-air collision
risk of injury resulting from min-air

Don't performs somersaults (flops) as this will increase the chances of landing on your head or neck.

TRAMPOLINE GUIDELINES

1. GENERAL INSTRUCTIONS

1.1 PURPOSE

- The product is intended for home/domestic use only and is not suitable for professional or medical uses.
- The maximum weight is 150kg. Overloading the trampoline above the recommended user's weight will cause damage the trampoline which is not covered by warranty

1.2 DANGER FOR CHILDREN

- Do not let unsupervised children near this product. Carry out the necessary safety precautions and supervise all trampoline activities. Be aware that the packing material is not suitable for children. There is a danger of suffocation!
- Trampolines over 51cm (20inch) in height are not recommended for children under 6 years of age. Children do not recognize potential dangers from this product. Keep children away from this product, it is not a toy. The product has to be stored out of reach of children and pets.

1.3 ATTENTION – PRODUCT DAMAGES

- Do not alter the product. Only use original spare parts. Repairs should only be carried out by qualified technicians. Improper repairs should only be carried out by qualified technicians. Improper repairs can compromise the safety of your trampoline. Use this product only as described in this manual. Protect the product against humidity and high temperatures.

1.4 ADVICE FOR THE ASSEMBLY

- The assembly of the product must be done carefully by at least two able-bodied adults. If in any doubt, ask a technically qualified person.
- Before you start assembling the trampoline, read all instructions in this manual.
- Remove all packing materials and lay down all parts on free space. This gives you an overview and simplifies the assembly procedure.
- Check with parts list that no parts are missing. Dispose of the packing material when the assembly is completed.
- Be aware that when using tools or doing technical work, there is always a risk of injury.
- Therefore assemble the product carefully.
- Create a danger-free environment. For example: do not let tools lie around the workspace.
- Store the packing material in a way that cannot cause any danger. Foils and plastic bags are dangerous for children (Danger of suffocation)!
- After installing the product according to the instruction manual, please make sure that all screws, bolts and nuts are correctly installed and tightened and all joints are tightly fixed.
- A clearance space of at least 7.3m is necessary above the trampoline. An appropriate clearance must be kept between the trampoline and possible source of danger, such as elastic cables, tree branches, playing devices, swimming pool and fences.
- The trampoline must be set up properly before use.
- Never set up the trampoline in rainy, windy or stormy conditions, especially lighting conditions...It is recommended that the trampoline be taken apart and stored in bad weather.
- The metal frame of trampoline will conduct electricity. Lightning, extension cords and all electrical equipment must never be allowed to come in contact with the trampoline.
- The trampoline must always be used in a well-lit area.
- Do not place any object under the trampoline.
- The trampoline in the vicinity of other leisure devices and constructions must not be used.

- When assembling or disassembling, please use gloves to protect your hands

1.5 ADDITIONAL TIPS

- For additional stability, you can place sand bags on the trampoline legs. This will prevent the trampoline from tipping over in event of any side ward's force.
- Do not use during pregnancy
- Do not use when suffering from high blood pressure.
- Jump with bare feet. Do not wear shoes; this will damage the jumping mat, which is not covered by the warranty.
- Not smoking
- Do not put cigarettes, Pet, sharp objects, or any other foreign objects, or any other foreign objects on the trampolines.
- Do not use trampoline whilst under the influence of alcohol or drugs
- Do not sit or lean on cover pads, as it needs to be feeble so it can move with jumping mat. Please do not allow small children to pull themselves up the trampoline by using the cover pads. Tears in stitching caused by obstructing frame pads are not covered by warranty.
- Place trampoline on level ground. Preferably on grass. Locating the trampoline on hard surface will add stress to the frame and overtime cause damage, which is not covered by the warranty. Placing the trampoline on uneven surfaces may result in the trampoline tipping over.
- Do not expose the trampoline to direct contact with open flammers.
- Secure the trampoline against unauthorized use
- Do not use if trampoline is wet
- Trampoline should be tied down with anchors during windy conditions or dismantled and stored away.

WARNING

1. Please ensure that the safety enclosure net zipper is 100% closed and all three entrance hooks are re-hooked before jumping.
2. Do not intentionally jump into the safety net, it is only designed to stop persons from falling off the trampoline to top over, or may damage your net. Abuse of the safety net is considered negligent use, which is not covered by the warranty, please refer to the disclaimer.

2. SAFETY INSTRUCTIONS FOR TRAMPOLINES

- All user of the trampoline need a supervisor. Regardless of the age and the experience of the user.
- The safety instructions of the trampoline should always be considered and obeyed.
- Somersaults must be avoided. Incorrect landings on the trampoline can lead to injuries, particularly to the back, neck or head. Injured may include paralysis. Or even death.

- Only one person should use the trampoline at a time. Multiple users on the trampoline will increase the risk of collision.
- The trampoline has to be examined for damaged, wearing or defective part before each usage, as it can impair the overall safety of the trampoline. The damaged, wearing or defective parts should be replaced immediately. In the meantime the trampoline must be restricted form access.
- No clothes with hooks or parts may be carried when jumping on the trampoline, in order to avoid hooks getting caught.
- The trampoline must be set up only on a flat ground and non-slippery surfaces.
- Strong wired can blow the trampoline away. If strong winds are predicted. The trampoline must be moved to a protected place, and taken apart. Or fastened to the ground with cords and herrings. At least three anchorages are necessary. It is not enough to anchor the pennants in the ground since the can tear out of the patch cords.
- Trampoline are jumping devices, enabling the user to jump to unusual heights as well as into a multiplicity of body movements. Jumping into the trampoline. Hitting the frame, cover pads or incorrect landing on the trampoline can lead to injury.
- Users should be familiar with the user manual. This manual contains assembly instructions... selected precautionary measures as well as recommendations for servicing and maintenance of the trampoline. In order to ensure a secured and fun use of the trampoline.
- Never use it near water and keep sufficient space around it as a safety precaution.
- Beware of moving parts. Which could catch your arms and legs?
- Do not stick any foreign objects in to the trampoline.
- Do not allow anyone or any object to go under the trampoline whilst someone is jumping on the mat. The jumping mat is flexible and downwards force create by someone jumping can cause serious injury to a person.
- Implement all a safety rules and make yourselves familiar with the information in the user manual.
- The trampoline can be only used, if the jumping mat is clean and dry. Worn or damaged jumping mats should immediately be replaced.
- Object, which could be dangerous to the used, should be vacated from the area.
- Avoid unauthorized and unsupervised use of the trampoline.
- Do not use the trampoline under influence of alcohol or drugs (inch medicines).
- Learn the fundamental jumping techniques thoroughly. Before trying difficult jumps. For more information. See section-fundamental bounce techniques.
- Climb on the trampoline. Do not jump on it directly. Do not use the trampoline as jump board for other articles. For more information, see section-accident categories: mounting and dismounting.
- For further information or exercise documents, you can turn to a trained trampoline teacher.

TRAMPOLINE ASSEMBLY

Refer to parts list for identification of parts.

WARNING: Two adults in good physical condition are required for the following assembly.

For your safety, you should wear proper shoes and clothing. Failure to follow these instructions and warnings may result in injury.

NOTE: Picture may vary slightly with different trampoline models.

1. Lay out the top rail in ground as shown in picture

2. Attach the two leg extensions to a leg base, repeat for all legs.

3. Attach all the top rails to form a large circle. Joining the last link may require two people. The second person should hold the opposite side, while you bring both ends of the circle together

4. Attach all leg supports you assembled in SIEP2 to top frame

5. At this stage, the trampoline should like the picture as the photo.

6. With stitching portion facing down, lay jumping mat inside frame and attached a spring into one of the triangle rings on the mat. Then attach the other end of the spring to the frame.

8. Repeat STEP6 directly across from where you attached the first spring. Then pull up two more springs half distance between the first two springs, directly across from each other. This will ensure tension is distributed between the springs.

9. Pull up all the trampoline springs by the spring fixing tools, and then it will be look like this on photo.

10. Lay the cover pads on the outer edge, the spring are covered. Tie all the cover pad's strings onto the top rail of the trampoline. Then proceed to testing the trampoline section of this manual before jumping on the trampoline.

ENCLOSURE PARTS LIST

ITEM.	MODEL	6FT	8FT	10FT	12FT	14FT	16FT
A	LOWER POLE	6	6	6	8	8	12
B	UPPER POLE	6	6	6	8	8	12
C	TRAMPOLINE SLEEVES	6	6	6	8	8	12
D	PLASTIC CAP	6	6	6	8	8	12
E	SAFETY NET	1	1	1	1	1	1
F	Screws for safety net poles	6	6	6	8	8	12
G	Fiber glass rod	6	6	6	8	8	12

SAFETY ENCLOSURE ASSEMBLY

Refer to PARTS LIST for identification of parts.

WARNING: Two adults in good physical condition are required for the following assembly. For your safety, you should wear proper shoes and clothing. Failure to follow these instructions and warning may result in injury.

NOTE: Picture may vary slightly with the different trampoline models.

1. Place the safety net on the mat

2. Thread the fiberglass rod with fastener through the net

3. Close the two ends of fiberglass rod with fastener, as shown in the picture

4. The net should now be as shown picture in the picture

5. Get one bolt, one upper pole and one lower pole, then connect them as shown in the photo, and next is repeat this step to all poles

6. Fix the pole cap to the end of the upper pole and secure it is tight enough for the pole cap. Repeat this step to complete all the poles

7. Prepare all the trampoline sleeves, then use the end of the trampoline sleeves through the end of safety net pole, and make it tidy enough.

Repeat this step to all the other safety net poles.
Make sure all the safety net poles have sleeve.

8. The next step is fasten the safety net poles to the trampoline legs. First, put the black plastic part to screw, and remember to check the direction of plastic parts. Ensure it is the same as on the photo, and then use the spanner to screw it.

Repeat this step to complete all safety net poles

And then change the direction of upper poles and make it face to the inside direction of the trampoline

9. After STEP 5, now all the safety net poles has been attached to the trampoline

10. Lift the net and put it in one side of the plastic cap on the top pole.

Repeat for all pole caps.

11. Then tie the netting securely to the triangle rings of the trampoline mat. Repeat this step to make sure all the plastic parts of the netting tie to the Rings. As shown in the photo.

12. Your netting is now fully fitted. Proceed to testing the trampoline section of this manual before jumping on the trampoline.

TESTING THE TRAMPOLINE

After assembly the trampoline, it is important that you perform the following safety checks:

Trampoline Safety Checks:

- Using a screwdriver, check if all the screws are tightly secured.
- Look underneath the trampoline and check all the springs are hooked securely to the frame and triangle rings.
- Move the trampoline around and check the sturdiness of the frame.
- Using your two hands, put your body weight on one section of the trampoline and release to check that the tension is even.
- Inspect the cover pads and check if they completely cover the springs and frame.
- Make sure the strings of the pads are tied securely.

Enclosure Net Safety Checks:

- Hold onto pole net jacked and check that all the enclosure poles are sturdy by shaking it.
- Check the enclosure net for any tearing in the stitching or material.
- Check the enclosure net zipper and entrance hooks function properly.
- Check to see if all safety enclosure hooks are attached to the triangle ring underneath the trampoline.

Once all the checks are performed and the trampoline has passed all initial tests (above), then your trampoline have one person test the trampoline by jumping on the center continuously for 5 minutes. If the trampoline feels sturdy then your trampoline passes the test. Congratulations, you have completed the trampoline assembly! Remember to abide by all the safety rules. Have fun, play safely.

FUNDAMENTAL BOUNCES TECHNIQUES

All trampoline users are recommended to understand and perfect these fundamental Bounces.

THE BASIC BOUNCE

- Start from a standing position, feet shoulder width apart with head and eyes on the trampoline bed
- Swing your arms forward and up and around in a circular motion.
- Bring feet together while in mid-air and point toes downward.

THE BRAKING MANEUVER

- Occasionally may lose control of their jump and bounce wildly. Performing the braking maneuver will allow the user to regain control of the jump and their balance.
- Start with a basic bounce.
As you land, bend your knees sharply and this will allow

THE HANDS AND KNEES BOUNCE

- Start with a low controlled basic bounce.
- Land on your hands and knees keeping your back straight.
- Emphasis should be directed at a good four-point landing. And not on jumping height.

KNEE BOUNCE

- Start with a low controlled basic bounce.
- Land on your knees keeping back straight. Body erect and use your arms to maintain balance.
- Bounce back to the basic bounce position by swing your arms up.

SEAT BOUNCE

- Land in a flat sitting position.
- Place hands on mat beside your hips.

Return to erect by pushing with your hands
