I PRECAUTIONS

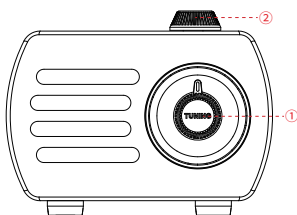

1. Don't get the radio wet or use it in a moist environment. E.g. Keep it out of rain and use carefully in bathrooms and kitchens.
2. Don't place any potentially damaging objects such as liquid-filled containers or lighted candle on the top of the radio.
3. Keep the radio away from sources of heat such as radiators, hot water pipes or fires. And do not leave it in full sun.
4. Keep the radio away from any solvents, such as white spirit, paraffin or petrol.
5. Keep the radio away from magnets and magnetic fields.
6. Place the radio in a well-ventilated place – leave a space of 5 to 10cm in front of and behind the radio.

turn OFF once fully charged.

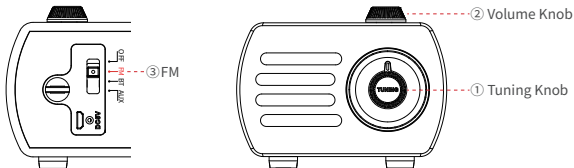

Tips :

- To protect the radio, please charge the radio with standard DC5V/0.5-2A charger (or other devices that can supply this type of power).
- To protect the battery, please stop charging the radio as soon as it's fully charged. Try to avoid charging the radio continuously for a long time, such as 24 hours or more.
- If an adapter is important for you, please send message "**PRUNUS Charger**" to
E-mail: wanwanus@outlook.com (reply in 1 working day) to get PRUNUS quality charger with indicator at **60%** discount.

IV HOW TO USE

1. Listen to FM

1) How to Get My Station?

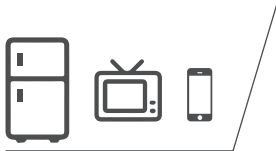

Step1: Turn the <③OFF/FM/BT/AUX> to “FM”.

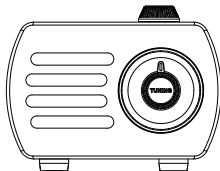

Step2: Tune the <①Tuning Knob> to the station you want to listen to.

Step3: Tune the <②Volume Knob> to your desired volume.

2) How to Get Better Reception?

Away from the electronic devices

- a. Rotate or reposition the radio.
- b. When you're indoors, approach the radio to the window and try to keep it away from the electronic devices, such as computers, TVs, refrigerators, mobile phones, etc.
- c. Hold the radio in hands, but the reception will be weak again when your hands are away. This is a common phenomenon called "Human Body Induction" among almost all the radios.

2. Music Playback

1) Played by Bluetooth

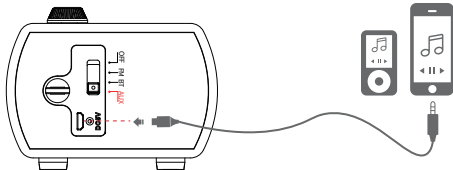

Step1: Turn the <③OFF/FM/BT/AUX> to “BT”. A “Ding Dong” sound means the Bluetooth connection is available and ready to be paired.

Step2: Switch on Bluetooth on your devices, such as mobile phone, iPod, computer, etc., then search for and connect the device named “FY-R818”. A “Dingdong” sound means the device has been connected successfully.

Step3: Open your music app/software and choose your favorite music.

2) Played by AUX

Step1: Turn the <③OFF/FM/BT/AUX> to“AUX”. Then the radio will give an “AUX Mode” sound, which means the AUX connection is available and ready to be paired.

Step2: Insert one end of the AUX cable into “AUX” jack of the radio and the other end into the earphone jack of your mobile phone or computer.

Step3: Open the music App / software to play the music.

V AFTER-SALES SERVICE

1.If the radio fails, please scan this QR code. Then click “Ask a question” and log into Amazon to contact us. We will provide you with the best service.
