IMPORTANT NOTES:

*Because the keypad uses a solid-state relay, you must install the enclosed diode—with the cathode (striped end —|—) toward the positive side—for DC powered locks and install the varistor (MOV, —|—) for AC powered locks and for electromagnetic locks *unless your lock has a diode/MOV built in*. Failure to use these as directed will void the warranty.

†Use the blue wire for fail-secure applications and the yellow wire for fail-safe applications. Use electrical tape to insulate the end of any unused wire.
