There is a security device on the upper part of the main unit. When putting any cup onto the main unit, make sure the three convex parts at the bottom are well fixed to the concave parts of the main unit. They have to engage for the Smoothie Maker to work.

**Important: Continuous operating period can not exceed one minute.**

The Smoothie Maker is equipped with one flat blade and one cross blade. The **flat blade** base is used with the **low cup** for crushing dried fruit items (rice, beans, sesame, dried pepper, walnuts, dried herbs etc). The **cross blade** is used with the **high cup** for processing vegetables, fruits, ice. The cross blade base can also be used with the large cup for making soya-bean milk, juices, fruit juice etc.

The Smoothie Maker also has a new large capacity chopper which can be used to chop meat, process vegetables and fruits.

Note: The food to be processed in the cup should not exceed 70% of the cup's volume.

### User instructions

**Use flat blade together with low cup for grinding.**

**Use cross blade together with high cup for blending.**

1. Put the food in the cup, making sure it does not exceed 100g.
2. Twist either the flat blade or the cross blade on the bottom of the cup and fix it on the main body. Turn the Smoothie Maker upside down.
3. Plug in the machine. Grinding/blending commences as soon as the cup is locked in place and should take about 30 seconds. (You might have to slightly push down the cup or twist and lock it to engage the lock.)
4. Unplug the machine once it has finished, then twist the blade and pour out the food.
5. Take out the cup in a clockwise direction.
6. With one hand grasp the cup, hold the blade in the other hand. Take out the blade in a clockwise direction and pour the food out.
7. If you do not want to use the food right away, fit the cover tightly to avoid the food spoiling.
