1. SAFETY WARNINGS	2
2. ELECTRIC SHOCK HAZARD	2
3. INSTALLATION	3
4. MAINTENANCE AND CLEANING	6

1. SAFETY WARNINGS

1. Never let children operate the machine.
2. The range hood is for domestic use, not recommended for barbecues, rotisseries or any other commercial purpose.
3. The cooker hood and its filter should be cleaned regularly to keep it working in good condition.
4. Clean the cooker hood according to the instructions in the manual and keep the unit out of danger of burns.
5. Prohibit direct cooking from the gas cooker.
6. Please keep the kitchen with good convection.
7. Before connecting the appliance, check that the power cord is not damaged. Damaged power cord only needs to be replaced by suitable personnel.
8. Adequate ventilation in the kitchen should be provided when using the cooker hood along with other gas appliances or other fuels.
9. The air should not be thrown by a pipe that is used to evacuate fumes from gas appliances or other fuels.
10. The regulations concerning the evacuation of air must be taken into account.
11. Do not place a flame of fire under the hood.
12. The cooker hood should not be installed on stoves having more than 4 burners.
13. This appliance may not be used by persons (including children) with physical, mental, or little or no disability unless instructed to use and supervise the person taking care of their safety.
14. Children should be supervised to ensure that they do not play with the appliance.
15. When the hood and appliances supplied with power other than the electric one are running at the same time, the negative pressure in the room should not exceed 4 Pa (4×10^{-5} bar).
16. Caution: Accessible parts may become hot by use of the appliance.

2. ELECTRIC SHOCK HAZARD

- Only connect this unit to an appropriate ground. If in doubt, consult a qualified engineer.
- Failure to follow these instructions can result in death, fire or electric shock.

3. INSTALLATION

- The hood can be installed as extractor or recirculation hood.
- The range hood should be placed at a minimum installation distance from the stove of 30"= 75 cm. From the cooking surface to obtain the best effect.
- Install the hook on a suitable place once the installation height is fixed, and keep it in line.
- Fix the outside chimney can be adjusted the height in it freely as. See Pic 2.
- Hang the range hood onto the hook plate and fix the chimney with 4 screws.
- Put on the external chimney and fix it with chimney holder. See Pic 3
- Finally, fix the external chimney to the wall. See Pic 4.
- Adjust the height of the inner chimney to the desired positions lightly widen the outer chimney and screw. See Pic 5.
- The extractor uses 2 lights of 1.5W
- **IMPORTANT:** the equipment must have a voltage protector.

NOTICE OF INSTALLATION

- Before installation, please ensure the area is clean to avoid suction of the remaining bits of broken wood and dust.
- It cannot share the same air ventilation tube with other appliance such as gas tube, warmer tube, and hot wind tube.
- The bending of ventilation tube should be $\geq 120^\circ$, parallel or above the start point and should be connected to the external wall.

After installation, make sure that the extractor is level to avoid grease collection at one end.

4. MAINTENANCE AND CLEANING

1. THE CLEANING OF THE CARBON GREASE FILTER MESH

The filter mesh is made of high-density stainless steel. Please do not use the corrosive detergent on it. Keeping this filter clean will keep the appliance running correctly.

The aluminum filters should be cleaned every 15 days with neutral soap, to give more life to the carbon filters.

Please strictly follow the guidelines below.

Method 1: Put the mesh into 40-50c clean water, pour on detergent, and soak for 2-3 mins. Wear gloves and clean with a soft brush. Please do not apply too much pressure, as the mesh is delicate and will damage easy.

Method 2: if instructed to do so, it can be put into a dishwasher, set the temperature at around 60 degrees.

2. NOTICE OD CLEANING COOKER HOOD

- To protect the main body from corrosion over a long period of time, the cooker hood should be cleaned with hot water plus non corrosive detergent every two months.
- Use recommended cleaners for this type of material, we recommend the following; WD-40.
- Please do not use abrasive detergent for it will damage the body.
- Keep the motor and other spare parts free from water, as this will cause damage to the appliance.
- Before cleaning the appliance please remember to cut off power
- The carbon filters shouldn't be please remember to cut off power
- Please don't tear open the fixed bar around the carbon filter
- If the plug or cord is damaged, please replace it with special soft cord.
