Battery: 3.7V, 300mAh x 2
Frequency Range: 100hz-16khz
Playing time: about 2-3 hrs (70% volume)
Charging time: about 2 hrs
Dimensions: 2.36"x 4.33" each speaker

Charging Directions & Use

- Fully charge the speakers before using them for the first time.
- Plug the included USB charging cable into the speakers.
- The LED light will light up red when the speakers are charging. When the speakers are fully charged the LED light will turn completely off (to save battery).

Speakers are compatible with any basic Micro USB Cable to be used for charging, but included splitter cable lets you charge both speakers while only using one USB port.

POWER ON:
Press & hold power button until blue LED goes on.

POWER OFF:
Press & hold power button until blue LED flashes and the device powers off.

PLAY/PAUSE:
While playing music, if you short press the power button on either speaker the music will pause. To resume playing, short press the power button again.

ATTENTION:

There is a protective foam border around the power buttons to prevent accidental powering on of the speakers while they are in a bag, surrounded by other objects, or in storage. You may remove the foam border if you like, but the speakers may power on if an item pushes against the power button.

Sound Prompts

PAIRING:
Speakers are in pairing mode.

CONNECTED:
Speakers are connected to your device

SINGLE BEEP SOUND:
Speakers are connected to each other.

DISCONNECTED:
Speakers are disconnected from your Bluetooth device.

PLEASE CHARGE:
Speakers need to be charged. Turn off speakers and connect to USB cables to charge.

Pairing

Turn on both speakers by holding the power button on both speakers for about 2 seconds until blue LED lights begin to blink. Both of the speakers will tell you when they are ready to connect to each other.

When pairing for the first time, please double click the power button twice on one of the two speakers to have the speakers connect to each other.

After pairing for the first time, the speakers will automatically pair to each other whenever powered on (just give them a few seconds to find each other)

Once they are connected to each other, they will then be ready to pair to your mobile device.

From your smart phone, tablet or computer, find a Bluetooth list of nearby devices and choose "PODS", the speaker will tell you when pairing is completed by saying "CONNECTED".

ATTENTION:

Your speaker will work best if it is within 30ft of your connect-ed device. You may experience sound briefly cutting off if you are out of range or if your Bluetooth connection is weak. If the speakers are not paired with a device after 5 minutes, they will turn off automatically. Make sure the Bluetooth setting is enabled on your smart phone, tablet or computer before starting the pairing process.

Using Each Speaker Individually

Both speakers are best used together but each speaker can be used separately. To do so just:

- Power on one speaker alone.
- Pair the speaker to your mobile device.
- Now you can do the same with the other speaker with different mobile device.

Connection & Standby

When the wireless speakers are turned on, they will connect automatically to the last connected compatible device within range and then it will automatically enter standby mode and will be ready for use.

LED Status

RED SOLID: Charging.

OFF(when charging): Speaker is fully charged.

BLUE FAST BLINKING: Speakers are in pairing mode.

BLUE SOLID: Speakers are paired with device.

Magnetic Base & Surround Sound

Speakers connect to each other magnetically and to other metal surfaces. Once you separate them you can place them on both sides of where you are sitting to experience surround sound with left and right channels. You can experience this while attaching them to metal surfaces or just placing them apart on a flat surface. You can even connect them to your computer or laptop to use as computer speakers.

ATTENTION:

Speakers do not attach to all metal surfaces. Make sure speaker attaches to metal securely before letting go of speaker.

One Year Limited Warranty.

FCC Statement:

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution: The user is cautioned that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

2. This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator and any part of your body.
