

Anywhere Niche LED Integration Guide

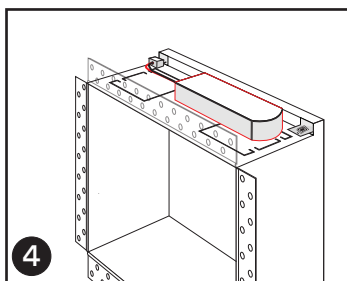

1
Line LED light strip along the inner top channel. Strip should not exceed channel width of $\frac{1}{2}$ inch.

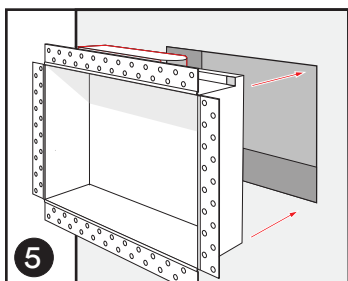

2
Cut LED light strip length to size.

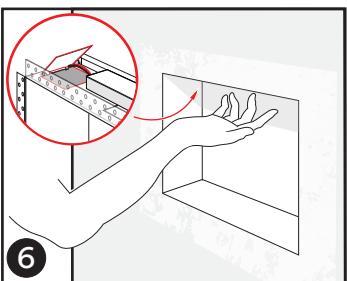

3
Use adhesive to secure the LED strip to the roof of the channel.

4
Connect the solderless clamp to the LED Strip, and attach the converter.

5
Lay the converter along the top support. Dryfit and connect power.

6
Maintenance post installation can be done through the concealed hinge doors.
