

Tyre Titan Compact Air Compressor k779 Instructions for Use

Please read and retain these instructions for future reference

v001: 16/03/22

Dimensions

5.5 x4.5 x20cm

- **KEEP IN YOUR GLOVE BOX**
- **PUMP UP TYRES OR SPORTS GEAR ANY TIME ANYWHERE WITH THIS CORDLESS AIR COMPRESSOR**
- **RECHARGEABLE BY USING THE USB CORD SUPPLIED**
- **ITS VERY POWERFUL ENOUGH TO INFLATE RAPIDLY UP TO 150 PSI.**
- **TURNS OFF AUTOMATICALLY AT THE PRESSURE YOU SET ON LED DISPLAY**
- **COMPLETE WITH 4 DIFFERENT NOZZLES**
- **FITS NEATLY IN POUCH SUPPLIED**

Technical Specifications

1. Input Voltage: USB Connector $\geq 5\text{VDC}$, 1A
2. Maximum Current: 5A
3. No-load Current: $< 2\text{A}$
4. Air Flow: 15L/min
5. Length of Exposed hose: $13 \pm 0.5\text{cm}$ / $5.1 \pm 0.20\text{inch}$
6. Net Weight: 462g/1lb

Battery type: Lithium battery

Voltage: 12.8V

Ampage < 2A

ASSEMBLY INSTRUCTIONS / INSTRUCTIONS FOR USE:

Unpack the components carefully. Please check all parts have been removed from the packaging.

1. Connect one end of air hose to the air outlet of the inflator and tighten clockwise, connect the other end of the hose to the tyre valve core and press the buckle.
2. Press "UNIT" button to switch four different units: PSI, BAR、KPA、 kg/cm^2 .
3. The "+" and "-" buttons are used for setting the pressure value. You can adjust pressure slowly by tapping the button, and you can adjust pressure quickly by pressing the button for a longer time. When it comes to the desired pressure value, the value will flicker for 4 seconds and be set automatically, or you can press the "UNIT" to set it.
4. Press the "Power" button and the inflator begins to pump up the tire. It will shut off automatically when the proper tyre pressure is reached.
5. After the inflation, remove the end of the tyre inflator from the air nozzle.

Notice

To prevent over inflation of a tyre, please refer to the recommended pressure value of the car's manual before the inflation. Or refer to the marking of a tyre on your bicycle.

Tyre Titan Compact Air Compressor k779 Instructions for Use

Please read and retain these instructions for future reference

v001: 16/03/22

Precautions

1. Make sure the inflator is fully charged before using it. It takes at least 4 hours for charging it fully the first time. It takes at least 2 hours thereafter.
1. This production is designed for occasional inflation. Prolonged usage will lead to overheating of the product and may cause damage to it. **Leave product to cool it down for 8 minutes after continuous working for 8 minutes.**
2. Please keep the product and its accessories away from children.
3. The inflator and its accessories are not toys, so do not play with them and insert them to ears, noses or mouths of any people or animals.
4. Please do not use the inflator nearby areas with inflammable, explosive liquids, or gases.
5. Please do not leave air compressor unattended whilst in use. Take note on its working status.
6. If there is an abnormal noise or overheating of the production during the inflation, please power it off immediately and let it cool down for at least 15 minutes. As the hose is hot after the inflation, please be careful with your hand while removing it.
7. Please do not expose the inflator directly to sunlight or the rain.
8. If you do not use the inflator for a long time, please keep it in a dry environment and out of the reach of children. It is recommended that the inflator should be charged once every six months.

Warning

For your and others' safety, please use the inflator and its accessories according to the operating instructions provided by the manufacture.

Power connection:

Insert the USB receiver into the energizing port and plug the other end into the power port.

This product is suitable for general USB interface line, which can be connected to mobile power supply, computer, ordinary and vehicle-mounted power supply, etc.
