

Jabra Engage 75 Mono

How do I connect my Jabra Engage to my Aastra Open Phone 63 or 65 desk phone so I have remote call control using my headset?

Prerequisites

- Jabra 8800-00-93 electronic hook switch (EHS) cable
- AZ adapter (from Aastra/DeTeWe)
- DeTeWe Open Phone 63 or 65
- OpenCom 100 from software 5.2
- OpenCom 1000 from software 3.2

To connect your headset:

1. Plug one end of the phone cable supplied with the headset to the socket marked with the blue phone icon on the Jabra base.
2. Plug the other end of the phone cable included into the headset port of the AZ adapter.
3. Plug one end of the Jabra 8800-00-93 to the AUX port on the Jabra base.
4. Plug the hollow socket connector to the socket marked with the bell icon on the AZ adapter.
5. Plug the 6-pin western connector into the second receiver socket on the AZ adapter.

To configure your headset when connecting to a desk phone for the first time:

- For the Jabra Engage 75, follow the onscreen setup wizard on the base.
- For the Jabra Engage 65, the initial setup is complete after connecting the cables.

See the user manual located in the **Technical Documents** section for more details about setting up the desk phone.

Use Jabra Direct, the computer application that is available free of charge, to learn more about your Jabra product. Use Jabra Direct to adjust features and functions according to personal preference or company requirements. Also ensure your Jabra product is updated to get the latest performance. Visit jabra.com/direct for more information.

Note:

Additional setup information for your Jabra products:

- EHS cable/adaptor type: GN1000.
- Clear dial tone switch: set to position "A".
- We recommend setting the microphone volume to "7" out of 13.

Phone settings:

- Activate the Remote Headset function on your Open Phone device.
- Navigate to **Menu>Settings>Peripherals>Additional device selection>Remote Headset**
