FARMS™

POTHOS NEON

Epipremnum aureum 'Neon'

LIGHT

Is adaptable to a variety of partial-light conditions. This houseplant prefers indirect light to keep its neon leaves bright and healthy.

WATER

Wait until the top inch or so of the soil has dried out before watering.

PROPAGATE

Simply cut a long vine off of the plant and place the fresh cutting in a cup with a little water.

Pothos Neon are hardy and easy to care for which makes it the perfect choice for beginner gardeners. This plant with neon green leaves, adds a vibrant touch to your home.
