IMPORTANT SAFEGUARDS

Basic safety precautions should always be followed when using electrical appliances, including the following:

1. **Important: Read all instructions carefully before first use.**
2. Do not touch hot surfaces. Use the handles or knobs.
3. Use only on a level, dry and heat-resistant surface.

1. A short power-supply cord is provided to reduce the risks resulting from becoming entangled in or tripping over a longer cord.
2. Longer extension cords are available and may be used if care is exercised in their use.
3. If a longer extension cord is used:
 - a.) The marked electrical rating of the extension cord should be at least as great as the electrical rating of the appliance.
 - b.) The longer cord should be arranged so that it will not drape over the counter top or tabletop where it can be pulled by children or tripped over unintentionally.

DO NOT DRAPE CORD!

KEEP AWAY FROM CHILDREN!

Polarized Plug

This appliance has a polarized plug (one blade is wider than the other); follow the instructions below:

To reduce the risk of electric shock, this plug is intended to fit into a polarized outlet only one way. If the plug does not fit fully into the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to modify the plug in any way.

TROUBLESHOOTING

Rice is too dry/hard after cooking.

- Depending on how dry your rice is, add ½ to 1 cup of water and stir thoroughly. Close the lid and select the **White Rice** function once more. When the cooker switches to **Keep Warm** mode, open the lid and stir the rice to check the consistency. Repeat as necessary until rice is soft and moist.

Rice is too moist/soggy after cooking.

- Use the serving spatula to stir the rice to redistribute the bottom (moist) part of the rice and to release excess moisture. Close the lid and allow the cooker to remain on **Keep Warm** for 10-30 minutes as needed, opening the lid and stirring periodically to release excess moisture.

Error Code Chart

If an error shows on the digital display, the following chart will help explain the next course of action.

Display Code	Meaning	Action
E1	Sensor open circuit	Contact Customer Service at 1-800-276-6286.
E2	Sensor short circuit	Contact Customer Service at 1-800-276-6286.
E3	Over-heating/high temperature	Turn off the cooker and allow it to cool for 5-10 minutes then restart. If problem persists, contact Customer Service at 1-800-276-6286.

Caution:

Before placing the inner pot into the cooker, check that it is dry and free of debris. Adding the inner pot when wet may damage the cooker.

Note:

- Because rice varieties may vary in their make-up, results may differ.
- Food should not be left in the cooker on **Keep Warm** for more than 12 hours.

Helpful Hints:

The provided rice measuring cup is equivalent to a ¾ standard U.S. cup.

RICE & GRAIN

1. Using the provided measuring cup, add rice or grain to the inner pot.
2. Rinse to remove excess starch. Drain.

9. The digital display will count down the final 10 minutes of cook time.
10. Once the cycle has completed, the cooker will beep and automatically switch to **Keep Warm**.

- To avoid rice sticking to the bottom of the inner pot, mix an additional ½ cup of water into the cooked rice if it will be sitting on **Keep Warm** mode for longer than 20 minutes.

Helpful Hints:

If you misplace the rice measuring cup, a ¾ standard U.S. cup is an exact replacement.

To add more flavor to rice, try substituting water for a favorite meat or vegetable broth or stock. The ratio of broth/stock to rice will be the same as water to rice.

For approximate grain cooking times and suggested grain/water ratios, see the "Rice/Grain & Water Measurement Tables" on pages 10-11.

DELAY TIMER (CONT.)

9. When finished serving, turn the cooker off by pressing (⏻) twice and unplug the power cord.
.....

Caution:

The cooker will not switch to **Keep Warm** mode until all liquid has evaporated. Follow your recipe carefully and do not leave the rice cooker unattended.

Do not use the provided serving spatula to stir soup, chili or stew. It is not intended to be used in contact with high temperatures. Instead, use a long-handled wooden or heat-safe spoon to stir hot liquids.

(1 Rice Measuring Cup = ¾ U.S. Cup)

Note:

- Cooking times are approximate. Altitude, humidity and outside temperature will affect cooking times.
- **Do not place more than 4 cups of uncooked rice into this appliance at one time.** The maximum capacity of this unit is 4 cups of uncooked rice which yields 8 cups of cooked rice.
- Rinse grains before placing into the inner pot to remove excess bran and starch. This will reduce the chance of rice browning and sticking to the bottom of the inner pot.

Note:

- When cooking barley, you must use the **Delay Timer** for 4 hours in combination with the **Brown Rice** function. The additional soaking time will ensure optimal flavor and texture.
- For best results when cooking barley or bulgur, let both grains sit on **Keep Warm** for 10 minutes before serving.
- If softer grains are desired, add an additional ½ cup of water or liquid.

STEAM

- Using the provided measuring cup, add 2 cups of water to the inner pot.
- Place the inner pot into the cooker.
- Place desired food into the provided steam tray, lower the tray into the cooker then close the lid securely.
- Plug the power cord into an available 120V AC outlet.
- Press (⏻) to turn the cooker on.
- Press **Steam**. The digital display will show a flashing "5" to represent five minutes of steam time.
- Press (+) and (-) to increase or decrease steaming time by one minute increments, up to 30 minutes. For suggested steaming times for meat and vegetables, see "Meat & Vegetable Steaming Tables" on page 13.
- Once the water reaches a boil, the digital display will begin to count down from the input steam time.
- After the selected steam time has elapsed, the cooker will beep and automatically switch to **Keep Warm**.
- Using caution, check to see that the steamed food is cooked. If finished steaming, carefully remove the food to prevent overcooking. Wear a protective heat-resistant glove to prevent injury as the steam tray will be hot.
- When finished steaming, turn the cooker off by pressing (⏻) twice and unplug the power cord.

STEAM & COOK

- To steam foods while cooking grains, begin cooking grain by following steps 1 through 8 of "Rice & Grain" on page 8.
- Place the desired food into the provided steam tray. Open the lid using caution, lower the steam tray into the cooker then close the lid securely.
- Cook food according to the "Meat & Vegetable Steaming Tables" on page 13.
- After the suggested amount of time has elapsed, open the lid to check steamed food for doneness. Use caution when opening the lid as hot steam will escape.

Helpful Hints:

Parchment paper or aluminum foil may also be used while steaming. Place the paper/foil in the center of the steam tray and ensure it does not create a seal along the bottom of the tray.

We recommend beginning to steam your foods towards the end of the rice cooking cycle. This will allow steamed food and cooked grains to be ready around the same time. See the "Rice/Grain & Water Measurement Tables" on pages 10-11 for approximate cooking times.

Caution:

Do not attempt to cook more than 2 cups of uncooked rice when steaming and cooking simultaneously.

STEAM & COOK (CONT.)

- If food is finished steaming, remove the steam tray. Wear a protective heat-resistant glove to prevent injury as the steam tray will be hot.
- Close the lid securely and allow the cooking cycle to continue.
- Once the cycle has completed, the cooker will beep and automatically switch to **Keep Warm** mode.
- When finished serving, turn the cooker off by pressing (⏻) twice and unplug the power cord.
