

INSTALLATION INSTRUCTIONS

ELEVATE CURLY CORD VER.

⚠ WARNING

This product must only be installed by a qualified electrician.

Disconnect power supply before removing the cover, connecting or disconnecting the product

Step 1.

Fasten the eye-bolt into the ceiling and loop and crimp the supplied SS cable around the eye-bolt.

Step 2.

Measure distance from eye-bolt to the desired height for the retractor module. Once decided, loop and crimp SS cable to the retractor module.

Note A: The retractor has approx. 1500mm lead-length to use the Elevate power module.

Note B: To adjust the resistance of the retractor, turn the adjuster clockwise to increase, and anti-clockwise to decrease to suit weight of Elevate unit.

INSTALLATION INSTRUCTIONS

ELEVATE CURLY CORD VER.

Step 3.

Fasten the clip from the retractor cord to the elevate module.
