

USER MANUAL

MODEL: Orbit Card FMN

Orbit Card is the same size of a standard credit card, making it the worlds thinnest Bluetooth tracker. Slip it in your wallet amongst your credit cards and never lose your wallet again. The built-in ultra thin battery will last for up to 3 years.

About the App

Orbit Card FMN works with Apple Find My APP in your phone.

How to use the Orbit Keys and App

1. Open the Find My APP. Select Items and Add Item to add the device into your app.
2. Then you can ring the device when it's in the Bluetooth range and find the current or last location on the map.
3. You also can use Notify when found after lost connection to get notification.

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
