

sound**Skins** 

Thank you for purchasing your very own Soundskins!

Soundskins have been snugly fitting Sonos speakers since 2017. Each textile cover is made with a unique 3D-knitting technique, developed by the TextielMuseum in the Netherlands and designed by Studio Truly Truly. Your Sonos speaker cover is completely acoustically transparent to ensure that no sound quality is lost: a feature tested by the Technical University of Eindhoven.

We would love to see your Sonos speakers suited up with Soundskins in your home! Share your picture with the hashtag #mysoundskins. We share the best pics on our own social media, so keep an eye out for yours!
