

You made an
excellent choice.

Model: METEOR ONE
Manufacturer: ULTRASONIC AG

Your Headphones:

- The latest audio technology provides rich bass and surround sound. Let you be immersive when playing games and watching movies.
- Powerful compatibility to connect smart devices (mobile phones, Notebook, tablet, desktop computer, TV, etc.).
- Wired and wireless background noise reduction microphone pole, so that teammates can only hear your voice, the ultimate gaming experience.
- The right ear shell is equipped with a TYPE-C bendable microphone stem.
- 40-hour battery life and comfortable imported protein earmuffs, allowing you to entertain you all day.

Bluetooth Pairing

The headphones work with any Bluetooth-enabled device - mobile phones, tablets, laptops, desktops, and TVs will connect wirelessly with the headphones.

Step 1:

Press and hold the oval button on the "L" side for 5s to enter pairing mode during power off.

You'll see an LED light flashing an alternating red and blue - this means that the headphones are ready to connect to your device.

Step 2:

Go to the Bluetooth menu in your device, and select "METEOR ONE". It may take a few moments to appear.

Keep in mind:

The headphones need to be in pairing mode to connect- you'll know this by a flashing red/blue light.

If you don't see this, power off the headphones. Then power them on again, but this time Press and hold the power button on the "L" side for 5s to enter pairing mode

Operate

Press and hold the oval button on the "L" side for 1s to power on, will automatically connect with the last successfully connected device.

Press and hold the oval button on the "L" side for 5s to enter pairing mode during power off.

Press and hold the oval button on the "L" side for 3s to power off.

Game Mode:

- Single click "+" & "-" button same time to game mode on/off.

Don't worry; you'll hear voice prompts so you know which mode you are in!

Charge

Your headphones arrive with a bit of juice. We highly recommend you give them a full charge prior to use. This will take about 1.5 hours.

You'll see a green LED light when the headphones are fully charged.

Please use the USB-C cable we provided.

Why? Not all USB-C cables will work with the ANC Headphones. There are different charging standards that are outside of our control.

For example: your laptop's USB-C charger will NOT charge the headphones.

If you need to use a third party charger, it should originate in a USB-A connection.

Music Playback and Volume Control

The Xspace Pro headphones have robust button controls built into the right ("R") ear-cup.

- Volume +: Click "+" during playing/calling Max volume will be prompt tone"dooloo".
- Volume -: Click "-" during playing/calling.
- When playing music, long press 1S "-" button to play the previous song.
- When playing music, long press 1S "+" button to play the next song.
- Press the "R" play/pause button to start playing, press again to stop playing.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
