

# Product End of Life Instructions

## 4703X IMFF MODULE

## Potential disassembly risks

The Circularity profile provides information about preparation for re-use and treatment. It identifies the relevant EEE components and materials as well as their location. Safety instructions for product dismantling and depollution are provided into the User manual or maintenance guide.

## End of Life Instructions

| Recommendation   | Number on drawing | Component / Material                                 | Weight (in g) | Comment                                                                         |
|------------------|-------------------|------------------------------------------------------|---------------|---------------------------------------------------------------------------------|
| To be depolluted | 1                 | Electronic Board (Communication) > 10cm <sup>2</sup> | 148           |                                                                                 |
| Other            | 2                 | Plastics and Other parts                             | 232           |                                                                                 |
| To be dismantled | 3                 | Metals and semimetals                                | 56            | IMFF Shell and other stainless steel parts should be dismantled at end of life. |

## Product description

|                                       |                                                                                                                                                   |
