SPECIFICATIONS

Model Name: RCH-NEORA-90BL

Total Power: 242W

Motor Power: 238W

LED Lamp: 2×2W

Voltage: 220-240V

Frequency: 50Hz

Control Panel: Sensor Touch Control

PRODUCT DIMENSION

Unit: mm

Dress the protective glove before you start to clean the hood. Remove the components gently during carrying out the clearance.

Never wash the control switch with water or other kind of liquid for the liquid might cause electrical problem to the hood.

To clean the motor fan should be undertaken by a qualified person, pay top attention to avoid any distortion of the fan during carrying out the clearance.

Never pull the plug out of the power supply by wet hand to avoid the possibility of electric shock.

Disconnect the cooker hood from the power supply if this appliance will not be used for a long time.

IMPORTANT SAFETY INSTRUCTIONS:

Do not connect the air outlet to chimney flues or combustion gas ducts.

Do not leave naked flames under this hood.

In case of any damage to power cable, replace the broken cable with a new one by qualified person.

Do clean the hood correctly in accordance with instruction stated or it might cause the possibility of fire accident.

To replace the bulb should be undertaken by a qualified electrician or a competent person. Always use the bulb no more than rating.

PRODUCT PARTS DIAGRAM

INSTALLATION REQUIREMENT

1. Do not install the cooker hood where there are many doors or windows in order to avoid affecting the exhaust efficiency of the hood caused by air convection. (refer Fig. 1)
2. Install the cooker hood right above the hob. The recommended distance between the hob and the lower edge of the cooker hood is minimum 300 mm and maximum 350mm. (Fig. 2)
3. In order to get the optimum performance, do not elongate the exhaust pipe too long, avoid over-bending of exhaust. Ensure the connection is airtight. (Fig. 3)
4. After hanging the unit on the wall, ensure the hood' level is vertically straight. (Fig. 4)
5. The air outlet must not be connected to chimney flues or combustion gas ducts. The air outlet must be under no circumstances, be connected to ventilation ducts in which fuel-burning appliances are installed.

key to turn it off.

When working 15 hours, there will be a reminder, the key will shine 10 seconds. That's a circulation.

Note: enter into the auto-cleaning function, all of the other functions are locked, operation is invalid, exclude the lighting function could be operated.

Touch to turn on/off the light.

MAINTENANCE

CAUTION: NEVER PUT YOUR HAND INTO THE AREA WHILE THE FAN IS OPERATING. TO GAIN OPTIMAL LEVEL OF HOOD PERFORMANCE, CLEAN THE COOKER HOOD SURFACE, FAN AND OIL FILTER REGULARLY.

1. Use only mild soap or detergent solutions to clean the cooker hood surface.
2. Clean the filter depending to usage or at least once a week. Press the buckle of the filter slightly, take off the filter and put it into warm soapy water using mild detergent, lightly brush the filter with soft brush. Place the filter back after it is dry.
3. Clean the fan motor and others internal parts twice a year or depending to usage by QUALIFIED PERSONNEL.
4. DO NOT clean the motor with water or other liquid.

TO REPLACE LED LAMP

CAUTION: The lamp may be hot! Wait until unit is cool. If the lamps malfunction, please replace it with a new lamp. Make sure all the control is switches off and the cooker hood is unplugged!

Please follow below instructions:

1. Take out the filters, and cut off the wire connection of the lamp.
2. Press the spring according to the arrow direction, then you can take off the lamp unit.
3. You can replace a new LED lamp unit no more than rating!
4. Then put the lamp unit to the hood in reverse direction. Connect the wire of the lamp.
5. Fit on the filters.

CHARCOAL FILTER INSTALLATION & REPLACEMENT

1. The charcoal filters should be replaced when it is noticeably dirty or discolored, usually after 6 to 12 months depending on the conditions of use.
2. These filters are not washable and cannot be restored. To ensure that this appliance functions effectively, regular maintenance is necessary as clogged filters restrict airflow and may cause the motor to overheat.
3. Removing and inserting the charcoal filter:
Take the baffle filter apart, hold onto the air intakes and turn slightly. Once the charcoal filter turns out of the screw, remove directly.

OPERATING INSTRUCTIONS

When it is Power-Up state, press this button into standby mode and the indicator lamp flashes; At the motor working state, press this button and the indicator lamp flashes, then the range hood continue to operate 3 min. After the delay, power will be cut off automatically; At the delay state, press this button and the power will be cut off.

Touch to select low speed.

Touch to select high speed.

When in standby mode, press this key to start the H² Meltz function, the function began to work (the heating module working 10 minutes, the blower/fan working 1 min), after the completion of oil melting, enter into off state automatically. When the auto-clean in working state, press "H² Meltz" key or "on/off"

INSTALLATION PROCEDURES

please carefully read the following diagram before installation, and install in accordance with the steps to ensure the smooth installation of the product.

According to the dimension of installing bracket, on the walls in the corresponding position to accurately determine the position of an installing hole, use a $\Phi 10$ impact drilling out the mounting holes, and firmly buried expanding tube, then use the M5x50 wood screws fastening the installing bracket to the wall.

Remove the pan head screw with the air outlet cross slot at the top of the box, and then fix the hole position of the outlet component, and fasten the outlet component on the box with the removed screw respectively.

Embed the clasp on the outlet joint with a step at one end, then align the clasp on the outlet and press the clasp to the bottom.

Pick the cooker hood up, the hanging hole at the back of the box assembly is aligned with the hanger on the installing bracket, and the limiting screw in the accessory bag is fixed on the hole of the installing bracket to prevent the accidental fall of the hood.

Matching the hook to the holes of the inner duct cover and fix it well with M4 screws.

Insert the inner duct cover into the outer duct cover.

Fasten the perforated end of the Outer telescopic duct to the screw on the top plate and gently push the Outer telescopic duct back, then connect the Outer telescopic duct with the hood and fix it.

If you need connect the common flue, please do not put the exhaust pipe too deeply, so as to not affect the effect.

If you connect the exhaust pipe to outdoor, please push it out of the wall at least 30mm, the air outlet should be slightly adown, to avoid rain water intrusion.

Installation confirmation: after installation, check the hood whether it is solid, turn the power on and test it, examine the function whether it is normal and whether there is abnormal vibration of the body, after confirmation, can be used.
