

XMS Edge

Plug & Play server gateway to cloud device management of ClickShare and wePresent units

- On premise installation
- Simple configuration wizard
- Single access to XMS Cloud Management Platform
- Secure and easy integration in existing IT networks
- Smooth management of ClickShare and wePresent units in the company network
- Reliable enterprise platform, designed for 24/7 operation

The XMS Edge enables a secure server gateway to the XMS Cloud Management Platform and offers more possibilities for IT managers who own a large install of ClickShare and/or wePresent wireless collaboration devices: user-friendly device management, a guaranteed straightforward user experience and useful analytics to drive the Digital Workplace.

The challenge to easily maintain, manage and monitor devices, often distributed over a number of different buildings and locations is perfectly addressed by our XMS Cloud Management Platform.

To access that XMS Cloud Management Platform, a gateway needs to be installed in the company's IT networks. Therefore we offer the XMS Edge, a hardware appliance as single gateway to the Cloud and the XMS Virtual Edge, a free software download (OVA file).

Be in control, everywhere, from anywhere

With XMS Cloud Management Platform, IT managers are always in full control of all Base Units in the network. They can securely access and configure units, check their health status and update these with just a few clicks to the most recent firmware. Upgrading software does not mean meeting downtime, since the update can be scheduled after office hours. Notifications - via mail, text message and on the dashboard - on the status of devices even optimize the maintenance and offer the chance for swift trouble-shooting, even before meeting room users are aware of an issue. With access to the real-time information on all wireless collaboration devices, IT managers can make sure their users are always enjoying the greatest meeting experience throughout the entire enterprise.

Unbox, connect and go

The empowered XMS Edge helps you save time, to help you focus on things that really matter as an IT-manager. The set-up of this preinstalled management server is a breeze. You just unbox the server, connect it to your network and start configuration. Get the central management solution up and running in no time. Barco XMS Edge is an enterprise grade appliance that hosts ClickShare and wePresent fleet management.

XMS Edge connects the on premise devices to the XMS Cloud Management Platform, allowing remote access and control from any location, with the highest security possible. Access your live cloud dashboard for the status and monitoring of all your connected devices, maintenance and issue solving and analytic. System administrators, integrators and managed service providers (or anyone who was granted access) can enjoy unlimited flexibility and offer improved service capabilities.

If device management via our cloud solution is not possible, there is the option to use XMS Edge as a local management node. Only a subset of functionalities will be available for this on premise management. The analytics and reports will not be available when working with XMS Edge only.

If you prefer to work with a software gateway to the XMS Cloud Management Platform, explore our XMS Virtual Edge.

PRODUCT SPECIFICATIONS**XMS EDGE**

Dimensions	
Dimensions (HxWxD)	60mm x 190mm x 190mm
Dimensions (packaged)	230mm x 260mm x 308mm
Weight	Appliance: 2.2kg Power Supply: 0.7kg
Packaged weight	4.5kg
General specifications	
Operating system	Linux
Hardware configurations	Intel Core i5, 7th generation 8GB RAM 128 GB Industrial SSD
AC power	Input: 100 – 240Vac, 2A, 50-60Hz
Power consumption	83W (typical); 109W (max)
Heat dissipation	283 BTU/h
Noise level (@ 20°C -68°F)	32 dB(A)
MTBF	47478h
Operating conditions	0°C -40°C, up to 80% humidity, non-condensing
Package content	■ 1x P110 Server ■ 1x Power supply ■ 1x Region specific mains cable ■ 1x Mounting bracket set ■ 1x Vertical stand
Accessories	VESA kit (R9811098) Rack mount (R9811099)
