When using electrical equipment, basic safety precautions should always be followed, including the following:

- Read all instructions carefully before installing and save for future use.
- Make sure all connections are in accordance with the National Electrical Code and local regulations.
- To avoid possible electric shock, be sure the power supply is turned off before servicing or installing the fixture.
- Service should be performed by qualified personnel.
- These instructions may not cover all details or variations. If additional information is needed, please contact Visa Lighting.

STANDARD INSTALL

FIXTURE NUMBER	MOUNTING CENTER
CB5518	26-1/32"
CB5520	38-1/32"
CB5522	50-1/32"

*NOTE: FIXTURE DEPTH OFF WALL = 4"

1. Secure mounting brackets to wall or junction box (JBC option) at mounting center locations, shown on table with hardware (by others). The mounting may be different than what is shown above, depending on which fixture/option is ordered.
2. Make wire connections. If mounted directly to the wall, connections should be made in the fixture ends, otherwise make connections in the junction box (JBC option).
3. Slide fixture over mounting plates and tighten mounting set screws.

When using electrical equipment, basic safety precautions should always be followed, including the following:

- Read all instructions carefully before installing and save for future use.
- Make sure all connections are in accordance with the National Electrical Code and local regulations.
- To avoid possible electric shock, be sure the power supply is turned off before servicing or installing the fixture.
- Service should be performed by qualified personnel.
- These instructions may not cover all details or variations. If additional information is needed, please contact Visa Lighting.
