4. One-to-two mode

M7 headset is able to be connected to two Bluetooth enabled devices(computer, tablet, mobile phone, etc) at the same time.

① Connect the headset to device A(the first device): Press and hold the multi-function button of M7 for 3 seconds to turn it on and enter the pairing mode. The indicator will flash alternately in red & blue. Enable the Bluetooth function on the device A and search for the headset. Click "M7" to connect once it appears on the Bluetooth pairing list. After the headset is successfully connected, disable the Bluetooth function of the device A. M7 headset will be automatically in the pairing mode again.

② Enable the Bluetooth function of the device B(the second device), connect the M7 headset to the device B in the same way as the device A. After they are paired successfully, enable the Bluetooth function on the device A again, and tap on M7 to connect it. If connection is successful, one-to-two pairing function of the headset is activated.

* Only music from one device can be played in one-to-two pairing mode. To play music from another device, music from the previous device should be paused or turned off. The same is true for calls.

5. Charging

The red indicator flashes when the battery power of M7 is low, please charge it immediately. The indicator will turn red when the headset is being charged, and blue when it is fully charged after about 2 hours of charging.

Please connect the Type-C charging cable to the charging dock or directly to the M7 headset to charge it.

*Note: Please use 5V1A wall charger to charge the headset (When M7 is not in use, please charge it at least once every 2 months)

8. Precautions and Q & A

A. How to reset the headset? (clear the pairing record)

In the pairing mode(The indicator of headset flashes in red & blue alternately) , press and hold the multi-function button and volume “-” button for 5 seconds simultaneously to clear the pairing record(reset the headset). When the purple indicator light flashes once, that means the pairing record has been cleared and M7 will be not reconnected to the previously connected device any longer.

***When various connection exceptions occur, please try to clear the pairing record.**

B. How to reconnect? What to do if I can't reconnect?

After M7 headset and your device are connected successfully , it will be automatically reconnected to your device once it is powered on.(in the Bluetooth available range)

If it can't be reconnected, please try to pair and connect them again.

C. What is the pairing password?

If a prompt for password input pops up when some devices are connected to M7, you can try to enter 0000 (four zeros), 8888 (four eights), 1111 (four ones), or 1234.

D. Which devices can M7 be charged with?

Please charge it with 5V1A charger.

E. How to realize the three-way calling function?

①When another call comes in during a call, click the Multi-function button to answer the new call and hang up the current call;

②When another call comes in during a call, double-click the Multi-function button to answer the new call and hold on the current call;

③When another call comes in during a call, press and hold the Multi-function button for 2 seconds to hold on the current call and reject the new call;

④During a three-way calling, double-click the Multi-function button to switch between the current call and the held call.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Safety instructions

- Do not place the product and its accessories at extreme temperatures, otherwise it may cause hazards such as product failure, fire or explosion.
- Protect the product from strong impacts or jolts, so as not to damage the product and its accessories, thus avoiding product failures.
- Do not disassemble or modify the product and its accessories by yourself. Contact us for after-sales service when the product fails.

Old electrical appliances must not be disposed of together with the residual waste, but have to be disposed of separately. The disposal at the communal collecting point via private persons is for free. The owner of old appliances is responsible to bring the appliances to these collecting points or to similar collection points. With this little personal effort, you contribute to recycle valuable raw materials and the treatment of toxic substances.

- Risk of explosion if the battery is replaced by an incorrect type, disposal of a battery into fire or a hot oven, or mechanically crushing or cutting of a battery, that can result in an explosion.
- leaving a battery in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas.
- a battery subjected to extremely low air pressure that may result in an explosion or the leakage of flammable liquid or gas.
