Quick Guide for Android/iOS

🚩 This guide is valid for **iOS 13**, **Android 9** later version. If your android phone no work, refer to **"Deep-Dive"** guide.

1. Move slide switch into "iOS" mode", 3rd position

2. Power off and on again S5

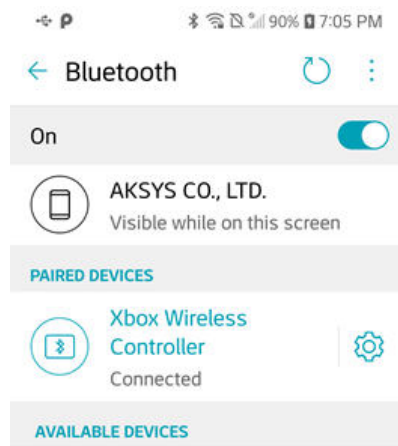

3. Press BT log button for 3 seconds more.

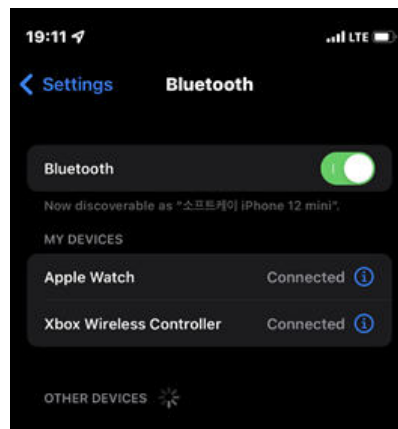

4. Search BT device on your Bluetooth setting menu. Find "Xbox Wireless Controller" (this is pre-set name, can't changeable)

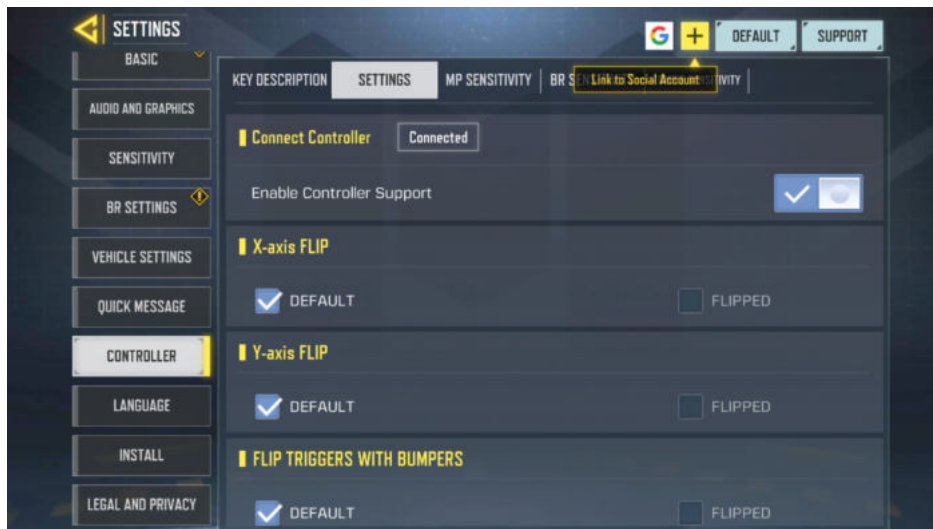

안드로이드 블루투스 설정 화면

(ex, iphone screen)

5. Run CoD-M

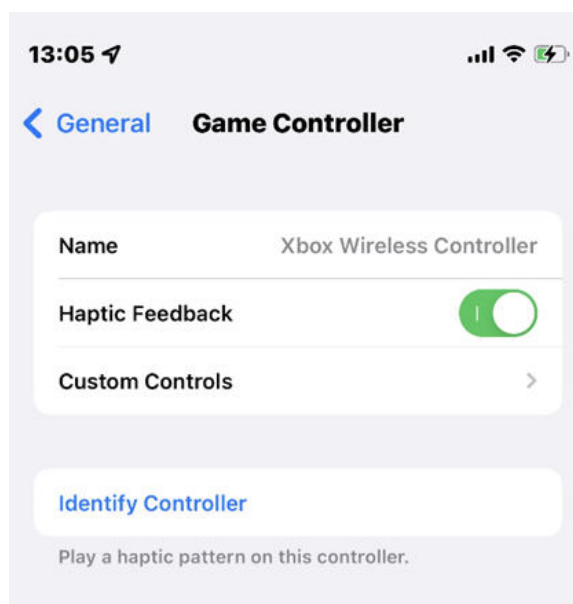

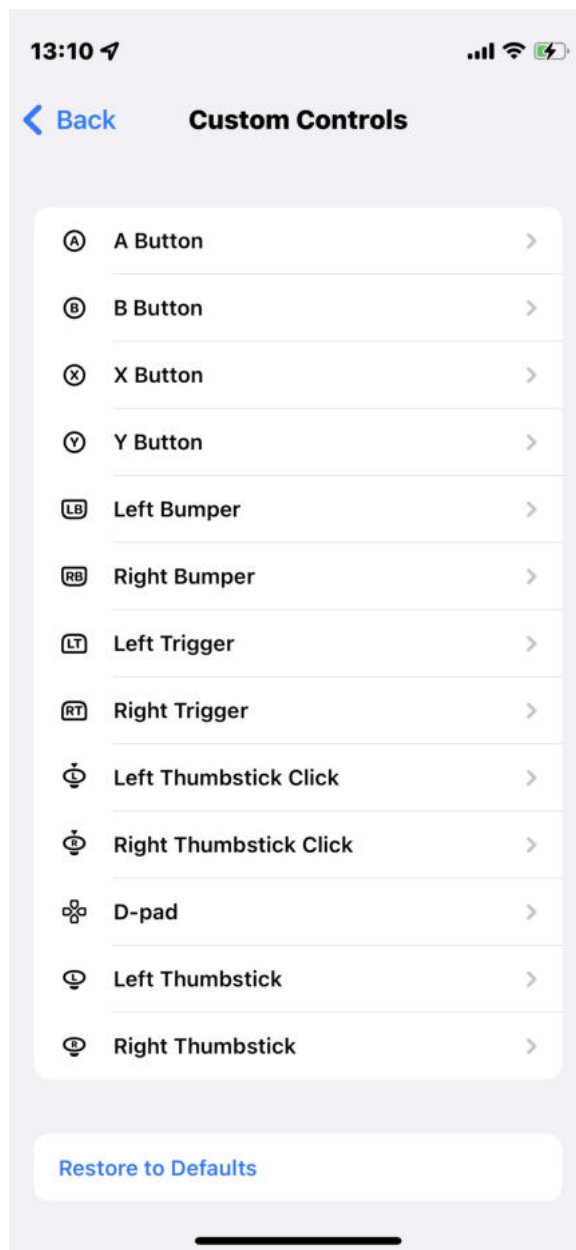

Deep-dive Gudie for iOS/iPadOS

i The pairing process, please see above. This is to show how to personalize button layout

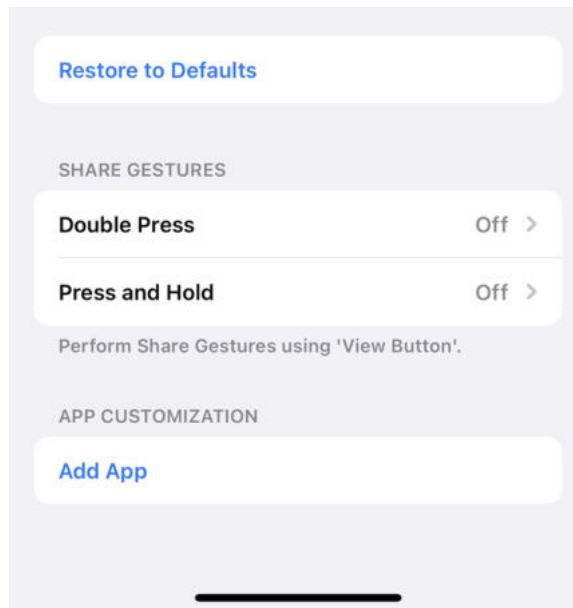

1. Go to iOS "Game Controller" Menu. Select "Custom Controls" to modify layout and feature.

2. By pressing "Select" button, you can see the map. If it does not pop up quickly, set "off" status of Double Press, and Press and Hold.

Deep-Dive Gudie for Android player

- This guide is to use the following features along with Shaks Gamehub application
 - Back - one touch
 - Home - one touch

Select "Xbox Wireless Controller" to pair from your phone BT setting

Android Phone BT setting

10. Run CoD-M and enjoy

Deep-Dive : playing with Andorid User by Mapping

This method is playing with android player using screen touch control.

1. Move mode switch into Mapping, the 4th position

2. Power off and on again S5

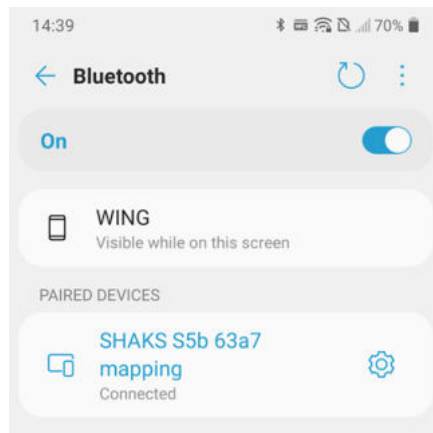

3. Press BT button for 3 sec longer

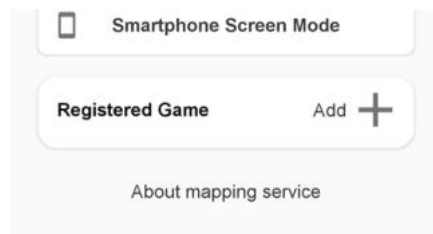

4. Open your android phone and search 'S5 xxx mapping" and click to pair. If no that name display, search again.

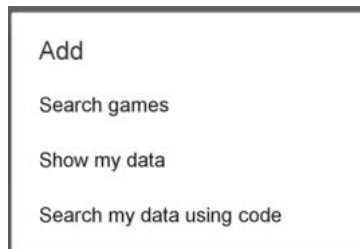

5. Run SHAKS Gamehub application
6. Select S5 and move to "Mapping" menu
7. Press **Add**.

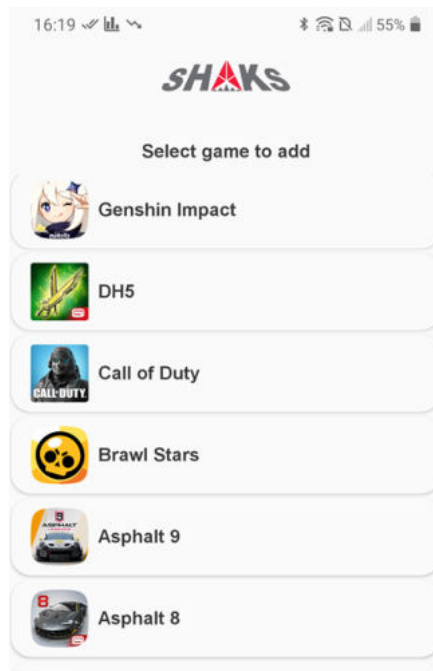

8. If show popup, press **Search games**.

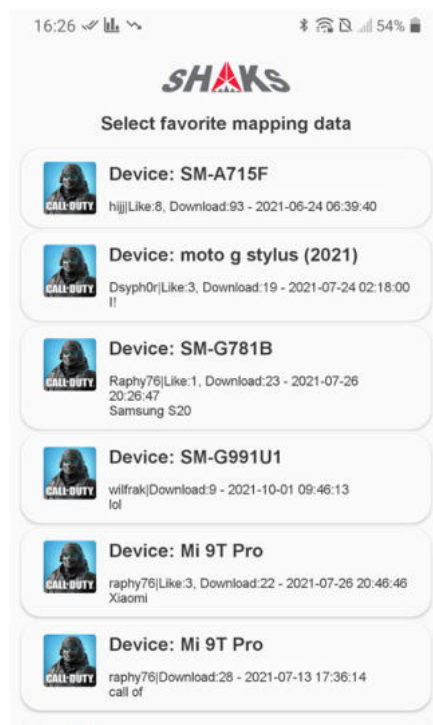

9. Search and select "**Call Of Duty**".

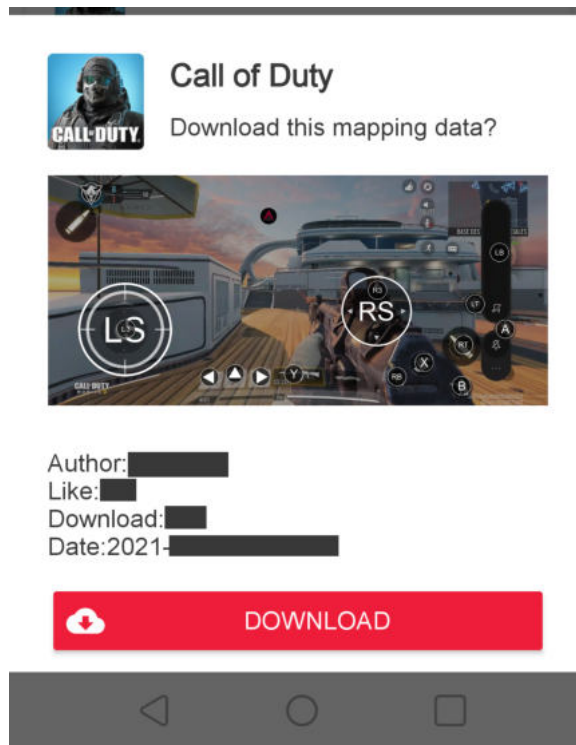

10. Select "preset mapping data" among 10 according to your device type.

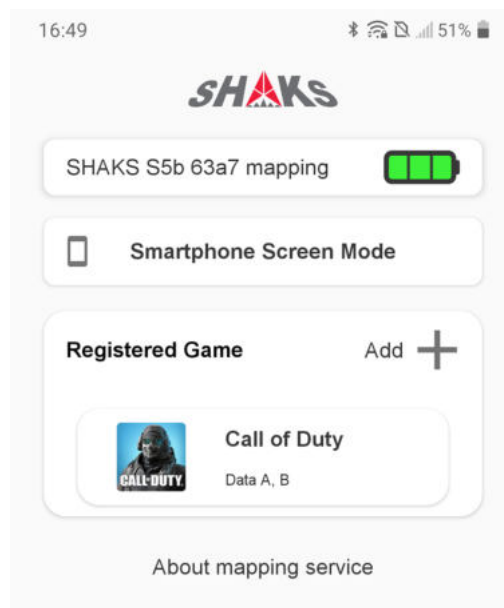

1. Check the mapping data detail. If OK, select Download

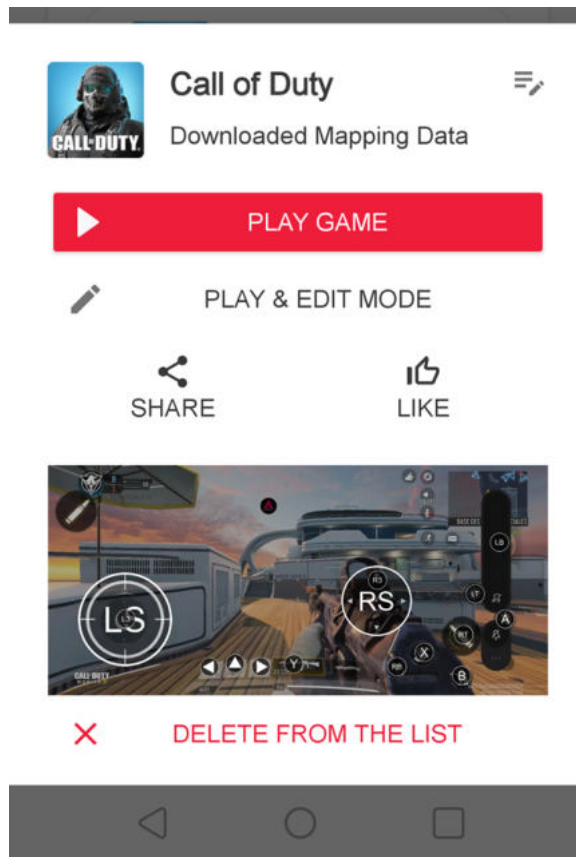

2. Download and Store mapping data file

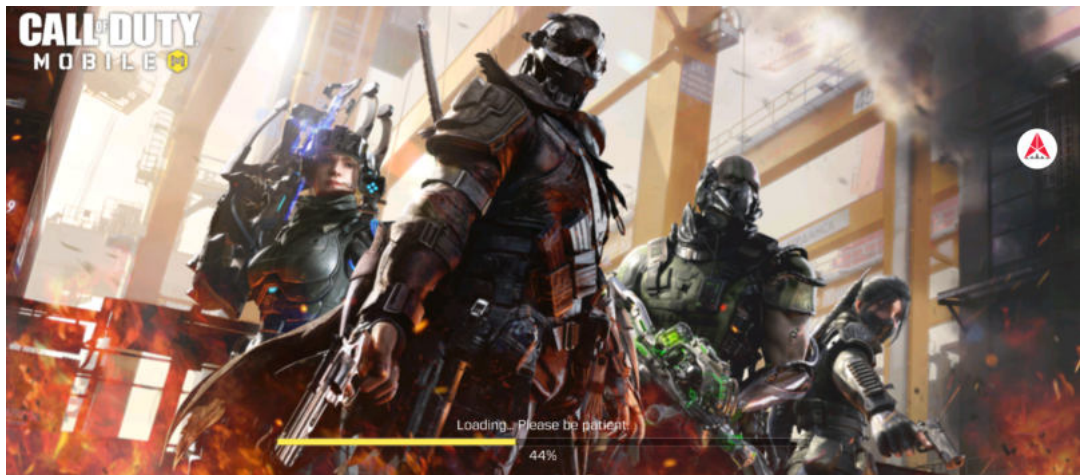

11. Select data and play game

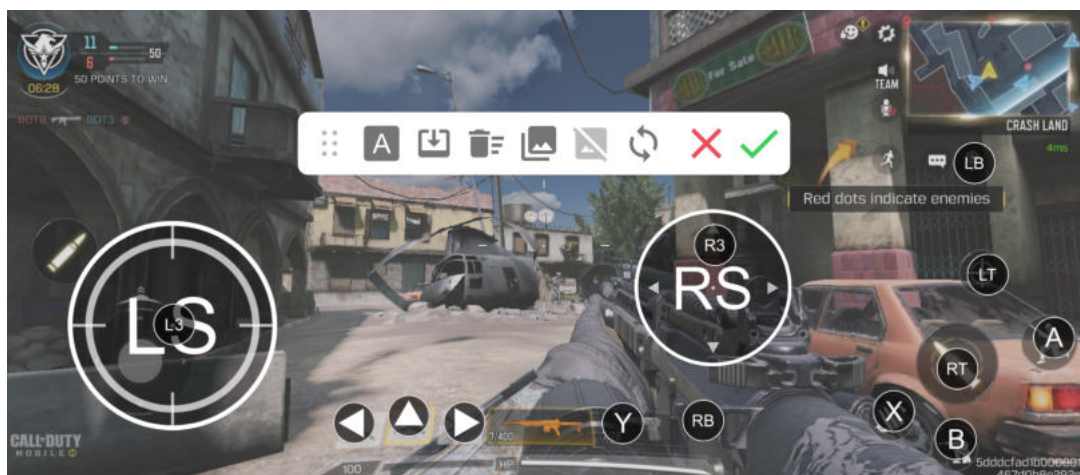

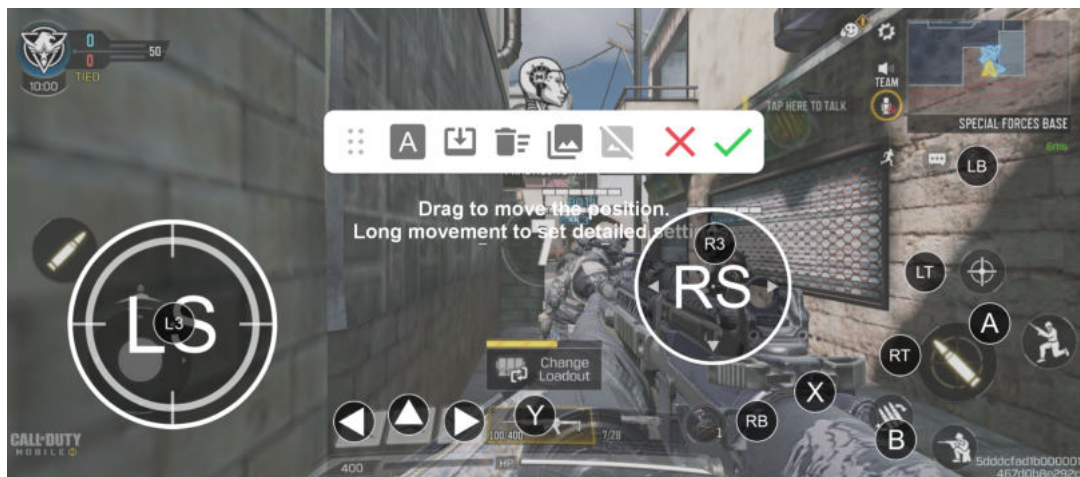

- a. PLAY GAME → Send mapping data to your cloud and run game
 - b. PLAY & EDIT MODE → Edit it more according to your game style
- Check Shak icon pops up

- Select Practice vs. AI and prepare test play

- Adjust mapping position according to your phone screen resolution.

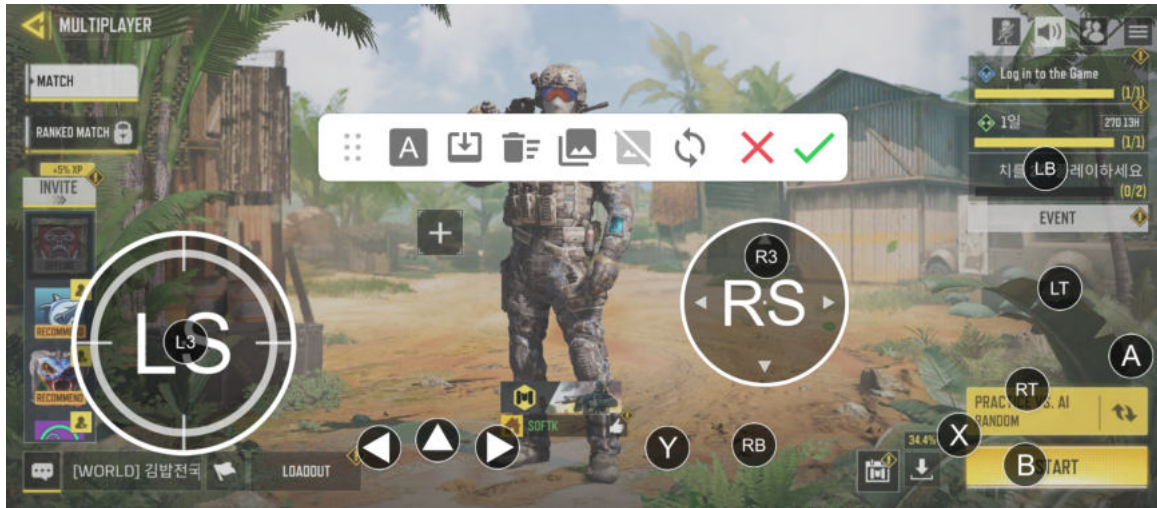

- Click "check ✓" to save and continue test play

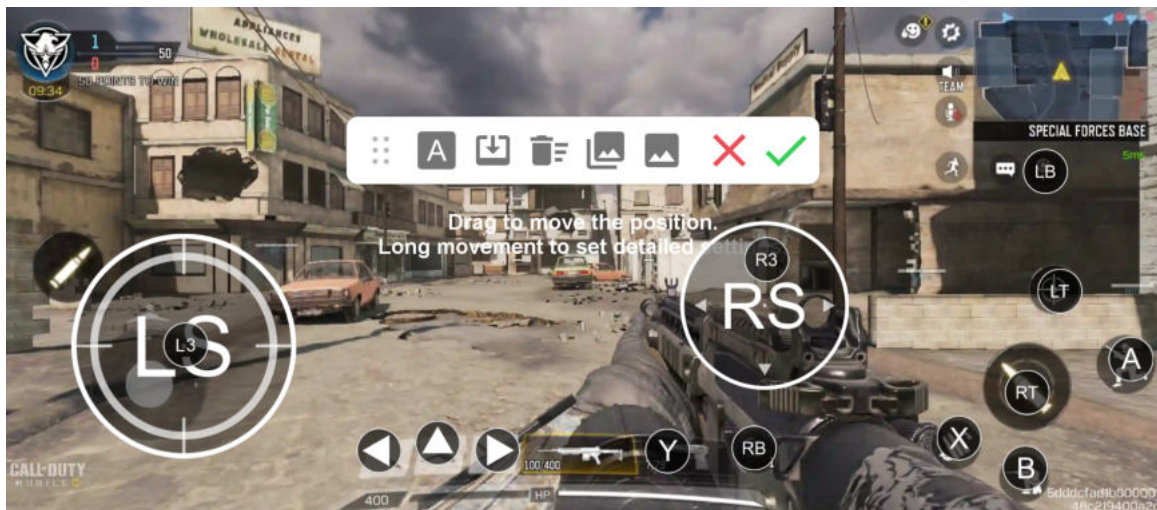

Tips) Edit mapping with "pre-captured screen layout"

1. If you are not play more than 30 seconds, you might become unactive status by the game rule. or some smartphone become idle mode. in this case, you can use "pre-captured screen layout"

Captured screen picture

2. Open the mapping edit screen at lobby

3. Call the picture by clicking "4th position picture".

4. Edit and save by "check ✓"

Any trouble please check

- Your Android phone must allow "Appear on Top Permission":
- Off "Power Saving Mode: or "Do Not Disturb" mode
- Vibration is on or off according to the game itself. S5 has a vibrator inside
- Any trouble, please contact Shaks service center via message or contact in user manual
