Functions Description

This massage gun is a professional impact muscle massage device. Whether you are a professional athlete, fitness enthusiast, or a general person, this lightweight and convenient gun can meet your requirements. relieving your fatigue, making your body more flexible and move more freely.

Visual eight gears adjustment touch switch. Different gears are suitable for different parts of your body. You can complete the massage independently.

Instruction for use:

Distribution guide of switches, indicators and batteries

Show current machine status:

When no display, the machine is in standby

One light is on: The current slap gear is 1 level

Two lights are on: The current slap gear is 2 level

Three lights are on: The current slap gear is 3 level

Four lights are on: The current slap gear is 4 level

Five lights are on: The current slap gear is 5 level

Power and gear adjustment switch button:

Press this button for 2s to switch on the main power supply.

Each time you press it, the gear shifts up one gear

Press it and hold for more than 2s, the machine stops the current action and returns to the 0-gear standby state.

At the standby state, press it for 2s to switch off the main power supply.

Display the current battery level

All four lights are on: the battery is fully charged

Three lights are on: 70% power

Two lights are on: 40% power

Red light is on: Less than 10% power, please charge in time.

Charging Port:

Insert the Typ-C plug of charging line into the hole, and then plug the other end into a USB power socket to charge the machine.

Operation instruction

- ① Press the power switch button for 2s to switch on the main power supply.
At the moment the battery indicator is on, showing the current battery level, the machine is in standby.
- ② Press the button again, one light of the gear indicator is on. At the same time, the massage head begins to move back and forth according to the strength of "1" gear.
- ③ Press the button once again, the slap strength gradually increases, and the number of gear indicator changes from "2" to "5". Which the highest is 5 gear.
- ④ When it reaches the highest gear, you can press it again to return to level "0". Then the massage head stops moving and the machine is in standby. You can press it again to repeat in the sequence above.
- ⑤ Press the adjustment switch on any gear for more than 2 seconds, when all the gear indicator are off, the massage head stops moving, and enters standby state.

- ⑥ After using the machine, please press the power switch button for 2s to switch off the power supply. At the same time, all the indicators are off.
- ⑦ If you don't use the machine for 3 minutes, the power supply will be off automatically.

Charge :

- ① When charging, insert the Typ-C charging plug into the charging port on the bottom of the handle, and then plug other end into a USB power socket. The battery indicator flashes to show normal charging, the number of battery indicators show the current battery level.
- ② When charging, the power is off and the machine can not be used normally.
- ③ When charging is completed, the battery is all on.

Message head :

- ① Connect the message head: Push the message head into the head of the machine arm to connect. To remove it, just unplug the message head.
- ② If the message head can not be smoothly pushed into the machine, it is mostly caused by the misalignment of the silicone fixing ring in its corresponding groove.
- ③ After the message head is replaced, if there is a strange noise from the machine, it is because the message head is not installed to the end. Squeeze the message head slightly to install it.
- ④ Message head specifications: This product provides you with four different shaped message heads for different muscle groups, pain types and diseases

Fork shape

Neck, both sides of spine and achilles tendon

Large-ball shape

Large muscle groups such as arm, waist and back, arm and calf

Bullet shape

Massage deep tissues such as palms and soles of feet.

Plate shape

Relaxation and shaping of various muscle parts
