

ACCESSORIES TPOLEAJ-01

Lightweight Adjustable Steel Distance Pole for 1 3/8" (35 mm) Pole Sockets

TPOLEAJ-01 is a lightweight, adjustable steel distance pole for mounting mid/high loudspeakers above a subwoofer, with adjustable height from 3' 3" to 5' 3" (1.0 m to 1.6 m). TPOLEAJ-01 connects to 1 3/8" (35 mm) pole sockets at both ends and features a friction screw and locking pin for stable height adjustment.

To deploy TPOLEAJ-01, follow these steps:

- 1 Place the subwoofer on a stable surface.
- 2 Insert the pole downward into the subwoofer's pole socket until secure. The main, thicker section of tubing should be at the bottom (the thinner, adjustable section of tubing should be at the top).
- 3 Remove the locking pin from the upper section of tubing.
- 4 Loosen the friction screw by turning the knob counterclockwise.
- 5 Adjust the upper section up or down until you find an acceptable height (use the locking pin holes as a guide).
- 6 Insert the locking pin into the hole on the upper tube nearest your chosen height setting. The locking pin will then rest against the lower section's knob assembly to help maintain your chosen height.
- 7 Guide your mid/high speaker down onto the upper part of the pole until the pole is securely seated in the mid/high speaker's pole socket.
- 8 If necessary, remove the locking pin and adjust the upper section of tubing until you find your desired height, and then place the locking pin back into the upper tube.
- 9 Tighten the friction screw to secure the pole's height setting by turning knob clockwise until secure.
