anko Microwave Steriliser

IMPORTANT! READ AND FOLLOW THESE INSTRUCTIONS CAREFULLY AND KEEP FOR FUTURE REFERENCE.

1

Parts:

1.Lid

2.Bottle/Accessories Rack

3.Base

4.Tong

2

WARNING!

- Always add 200mL of water before each use. Use only clean water.
- Do not use bleach or chemical sterilising solutions in the microwave steriliser.
- Do not carry steriliser using lid handle.
- If microwave oven has a grill or hot plate, ensure that it has had time to cool since it was last used. Steriliser and its contents may melt or burst should they come into contact with hot surfaces.
- Always follow loading instructions, ensuring that steam can effectively circulate in and around all surfaces of the items to be sterilised.
- Do not touch the steriliser immediately after it has finished its cycle. Steriliser will be hot and may scald or burn.
- Allow unit to stand for 10 minutes or until sufficiently cooled before removing from microwave.
- Escaping steam will be hot and may scald or burn. Open unit carefully.
- Keep out of reach of children.
- Ensure hands are clean before handling sterilised items.
- Do not put metallic items into the steriliser for microwave heating.

after

Microwave Sterilisation Instructions:

All bottles and accessories should be washed thoroughly in warm soapy water before first use and immediately after every use in addition to the sterilisation process to remove feed deposits.

1. Fill steriliser with 200mL of clean water.

2. Place bottles, accessories and tong into the steriliser.

Loading wide neck bottles:

- Place the bottles upside down in the bottle holder on the rack.
- Place the teats in the teat holders and place the caps above the teats.
- Place locking rings on the side.

4

Loading narrow neck bottles:

- Insert the bottles rim into the notch of the bottle holders.
- Place the teats in the teat holders.
- Place the caps and locking rings on the side.

3. Reattach the sterilisers lid and clip the side catches.

Ensure the lid is locked securely.

4. Microwave on full power for time shown on the following table.

Wattage	Sterilising time
1100-1850W	2 minutes
850-1000W	4 minutes
500-800W	6 minutes

5

5. Allow unit to stand for 10 minutes or until sufficiently cooled before removing from microwave.
6. Open the unit carefully after sterilisation is complete. Use steriliser tong to remove items. No rinsing is required after sterilisation.

Cleaning

1. Wash steriliser with warm soapy water. Rinse with clean water.
2. Dry thoroughly and store safely away from children.
