

PRODUCT END-OF-LIFE NOTICE

This EOL is after the streamlining of Nordic ID product portfolio.

As there is a large base of installed Nordic ID Sampo S2 WLAN devices, we have made sure that the transition to the new device will be completely transparent to existing deployments, as they will share the same APIs and communication interfaces.

We realize that a product discontinuation may cause some inconvenience to our customers. Our sales and technical support teams are ready to help during the transition and answer any questions about our products and solutions.

And of course, if there is still some need to purchase Sampo S2 WLAN devices to make this transition smoother, we will be still delivering those until 31.01.2023 (see EOL timeline below).
