DESCRIPTION

Note: Due to popular demand, there might be some delay in shipping products containing Pi Zero!

Note: As of Monday, May 16th, this product is now shipping with Version 1.3 of the Pi Zero!

Remember those cereal commercials that would always say, "part of a complete breakfast"? Well the Pi Zero's a lot like that bowl of cereal - while it's great on its own, you need a lot of accessories to make it a complete meal.

The **Pi Zero Budget Pack** is almost everything you need to get going with your Pi Zero and make it a complete meal. [Check out our writeup on the Pi Zero over at the Adafruit Learning System](#)

This pack includes:

- **Raspberry Pi Zero** - the type of low cost game-changing product Raspberry Pi's known for - a super light, super lean microcomputer
- **Mini HDMI to HDMI Adapter** - Will let you convert the little port on the Zero to a standard sized HDMI jack. You can get 1080P HDMI video + audio out of this little computer!
- **USB OTG Cable** - Lets you plug in a normal USB device such as WiFi dongle, USB hub, keyboard, mouse, etc into the Zero.
- **8GB SD Card** - May come blank or pre-burned with NooBs!
- **5V 1A Power Supply & USB A/Micro B Cable OR 5V 2A Power Supply w/ Micro USB Cable** - the best way to power up your Pi Zero with a stable 5V power supply that won't vary or sag.
- **2x20 Male header strip** - Solder this in to plug in Pi HATs, GPIO cables, etc as you would into a normal Pi. (We also have a [2x20 Female](#) and [2x20 Female right-angle style](#) for more exotic connecting)

DESCRIPTION

LEARN

parts and pieces to make your Pi Zero

computing experience easier (THESE ARE NOT INCLUDED!)

- **Pi Zero Protector** - Keep your Pi Zero safe while handling with this simple sandwich-style acrylic case.
- **USB Console cable** - if you're not going to stick an HDMI monitor on there, then this is essential, [you connect the wires to the GPIO pins and log in over a serial console](#). Its the easiest & fastest way to get on your Pi
- **USB Powered Hub** - So you can plug in any kind of USB devices without overloading the Zero's power supply. (You can also, ironically, power the Zero from the hub itself by plugging in a micro USB cable into the hub)
- **WiFi dongle** - this chipset is the most common one used for the Raspberry Pi, works great!
- **Mini Wireless Keyboard w/Trackpad** - Requires only one USB port, which makes it a great match for the Pi Zero
- **Wireless Keyboard + Mouse set** - Also requires only one USB port, but for everyday use.
- **Pi Cobbler** or **T-Cobbler** - When paired with the male or female 2x20 pin header, you can use your Zero with a breadboard to connect sensors, LEDs, motors and more!
- **Ethernet Hub and USB Hub w/ Micro USB OTG Connector** - One can never have enough socks, or USB ports. Add some more USB and Ethernet capability to your Raspberry Pi Zero!
