Press the fourth button once: Turn on the voice control mode;

Press the fourth button (the second time): Turn off the voice control mode.
Wi-Fi Mode

A. Wi-Fi Mode Settings:

(1) Check whether you have turned on your mobile Wi-Fi function to avoid connection failure;

(2) Enable the location permission on your mobile phone to avoid the issue that it fails to show the Wi-Fi name that has been connected;

(3) Connect your mobile phone to 2.4GHz network. Not support other frequencies;

1. Download the APP: You can directly scan the following QR code to download the APP (please note that the following APPs come with same functions. Just take "Smart Life" as an example).

Smart Life

Tuya Smart

2. Android: Search "Smart Life" via Google Play

IOS: Search and download "Smart Life" in the APP Store

3. Create a New Account and Login to Your Account

1) Turn on "Smart Life";

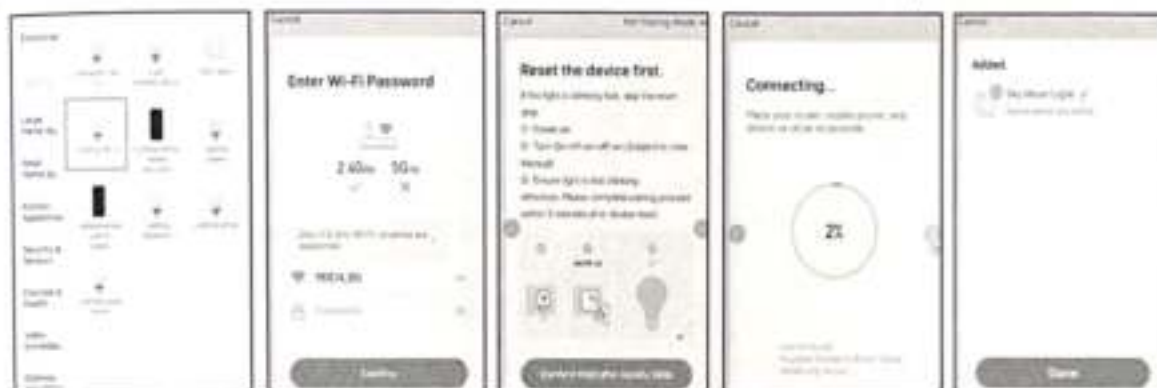

2) Enter your login and password. It requires to create a new account for your first use.

4. Configuration

1) Connect the product to the power, then it will automatically power on;

2) Connect to a Wi-Fi network: Turn on the product, then long press the main switch. At this time, the indicator flashes quickly. Have a long press until the indicator flashes;

B. Open "Smart Life" – click "Add Devices" – select "Lighting-lighting (Wi-Fi)" – Enter password (if applicable) – click "the Next Step" (please ensure that your mobile phone has been connected to 2.4GHz network, instead of 5GHz Wi-Fi network).

C. Continue the configuration process, then a message shows that the device has been successfully added, indicating a successful connection to the 3-in-1 Sky Moon Light.

APP Function Descriptions:

1. Click "Sky Moon" icon to enter the APP, then click "Power Switch" to switch on or off the light;
2. You can adjust its color, brightness and saturation in the color interface.

3. Timer Function: Countdown and timing function, that is: set or turn it off according to your actual demands

4.Voice Control Function: The light is off when it is turned on, and it flashes when a sound is made (please note that only sound with strong music rhythm can create better effects, and the voice source should be kept within 1m);

How to Connect to Amazon Alexa:

(1) Android: Search "Smart Life" via Google Play

IOS: Search and download "Smart Life" in the APP Store

(2) Open the APP to create a new account or login to your account that has been created;

(3) Open "Smart Life" and connect;

(4) You can use "Smart Life" to rename the device. For example, if the 3-in-1 sky moon light is renamed the lamp in the living room, then it will gain the same name after echo. Connect the device in the 9th step;

(5) Download "Amazon Alexa" in the Amazon market, Google Play or App Store, and connect "Echo" to "Alexa" APP;

(6) Search "Smart Life" in the Alexa Skills;

(7) Click to open "Smart Life", then enter your user name, password and area;

(8) Authorize Alexa to login to your "Smart Life" account that has been created, then say to Echo: "Alexa, please search devices". After completion, Echo will say: "Complete the search";

(9) Try to call with Echo, and control your device via voice after all settings are completed.

The following shows all voice commands of Smart Life:

Alexa, turn on "Sky Moon";

Alexa, turn off "Sky Moon";

Alexa, set "Sky Moon" to 20%;

Alexa, increase the brightness of "Sky Moon";

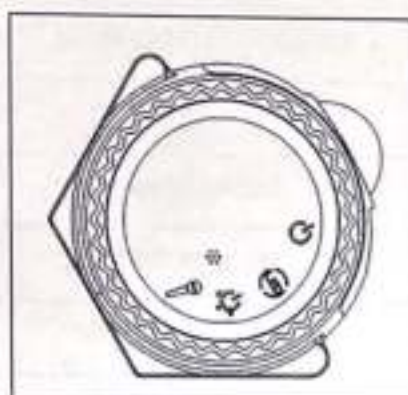

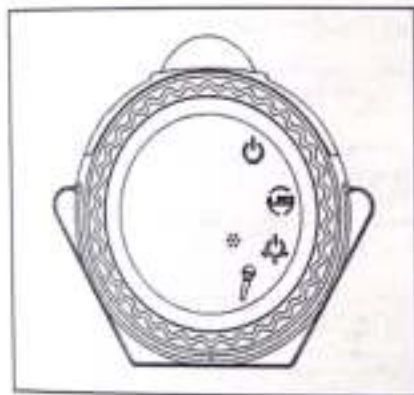

Alexa, decrease the brightness of "Sky Moon";

Alexa, set "Sky Moon" as green

Troubleshooting Tips for Network Connection

1. Verify the Wi-Fi password via the following methods: Open the Wi-Fi network list on the phone – click the Wi-Fi name to forget – connect again and enter password to check whether it is connected successfully. Please enter the correct Wi-Fi password in case of connection failure;
2. Fail to show the Wi-Fi name during connection. Please check whether "Position Information" has been enabled on your mobile phone;
3. Check whether your mobile phone has been connected to 2.4GHz wireless network;
4. Wi-Fi name shouldn't contain Chinese characters, special characters and spaces;
5. Wi-Fi password can't be empty (up to 58 characters). Do not use any special character;
6. Please move your product close to the router when it is connected to Wi-Fi (suggested distance: 5m)

How to Put Sky Moon Light

Specifications

Shell material	ABS
Input rated voltage	5VDC
Maximum power	7.5W
Maximum working current	1.5A
Projection light source	LED light bead source
Projection light source wavelength	Red light beads (620-625nm), green light beads (520-525nm), blue light beads(460-465nm), white light beads (color temperature 1500-15000k)
Projection distance	2-10M/6.56ft-32.8ft
Projection area	The projection area is 40 square meters at a distance of 5M, 160 square meters at a distance of 8M
Motor	Supply voltage is 3V, with 1-4 r/min
Power input	100-240V AC 50/60HZ 1.5A(when used with a power supply transformer)
Operating temperature	-20 ~ 50 °C / -4 ~ 122 °F
Storage temperature	-20 ~ 60 °C / -4 ~ 140 °F
Product model	SC511
Laser level	Class1(ClassI)
Laser power	<1mw
FDA login number	2020434-000
Use and maintenance	Indoor use; maintenance-free
