

GPS Dual Dash Cam installation instructions

Contents

- **1. How to install this gps dual dash cam**
- **2. Before using the car camera**
- **3. How to view video of GPS path**
- **4. FAQ**
- **5. After-sales service & Warranty**

Front camera installation:

Stick the GPS module close to the windshield top to receive better signal

Connect the car charger with camera, then hide extra cable into interior panel.

2 way of run the wire for rear cam

(1)

(2)

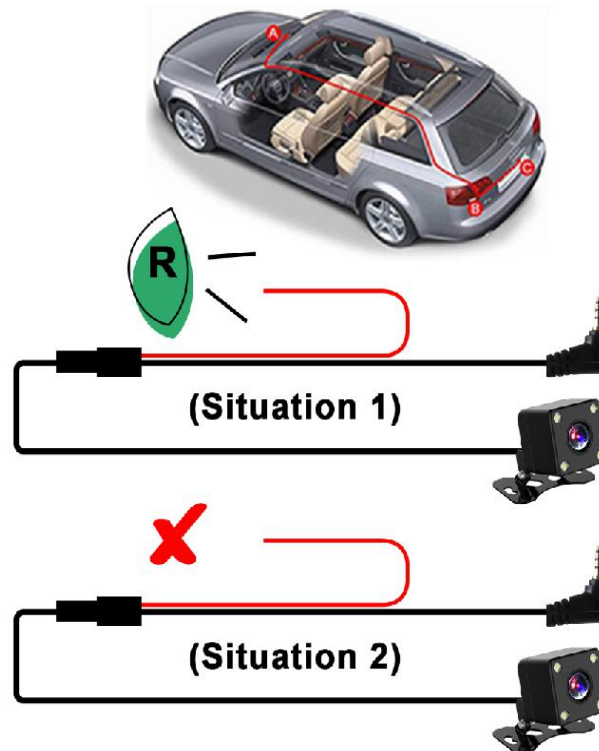

2 way of install rear cam, inside of car & outside of car

**After wired the rear cam cable,
then connect rear cam
with rear cam cable**

2 situation you may meet

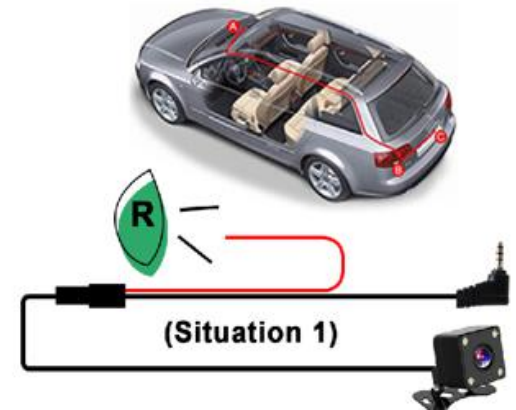

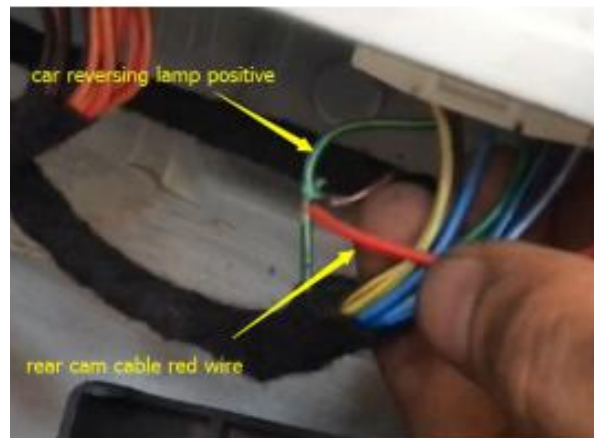

Situation 1: If your car **do NOT** have built in reverse system monitor display screen, need this dash cam reverse function, please connect rear cam cable **red wire** to car reversing lamp positive terminal. When you reverse car, the display screen will switch to full screen of rear view.

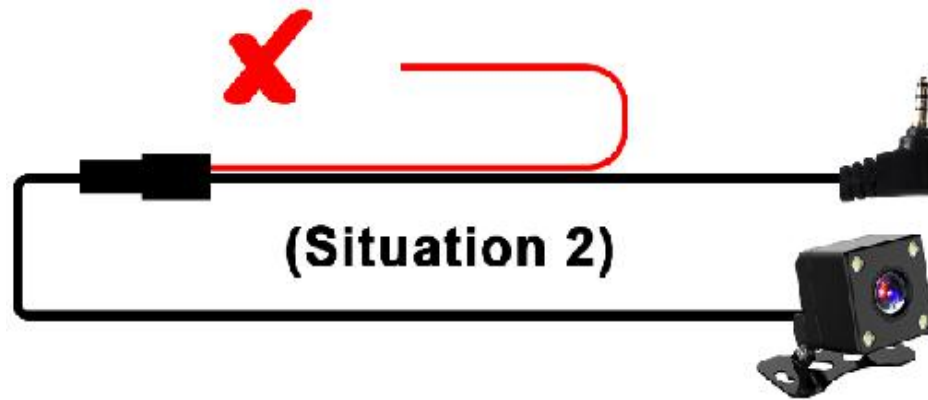

Situation 1

1. Find out the car reversing lamp wire,
2. Connect red wire to car reversing lamp positive electrode.

Situation 2

Situation 2: If your car **already have reverse system** display monitor, just need this dash cam record rear view when you are driving, please ignore the rear cam cable red wire, it no need connect to anywhere. When you drive forward or reverse car, the dash cam display screen will always show picture in picture of both front and rear view.

Fix the rear cam above licence plate

Footage picture

Before use the car camera you should know

- 1.Find a 32GB,class 10 micro SD card,
- 2.Charge dash cam 2 ~ 3 hours,
- 3.Select your local time zone in settings,
- 4.Insert card first (poke the card with a slim needle or credit card deeply till it clicked in the card slot),then power on camera & format card on it,

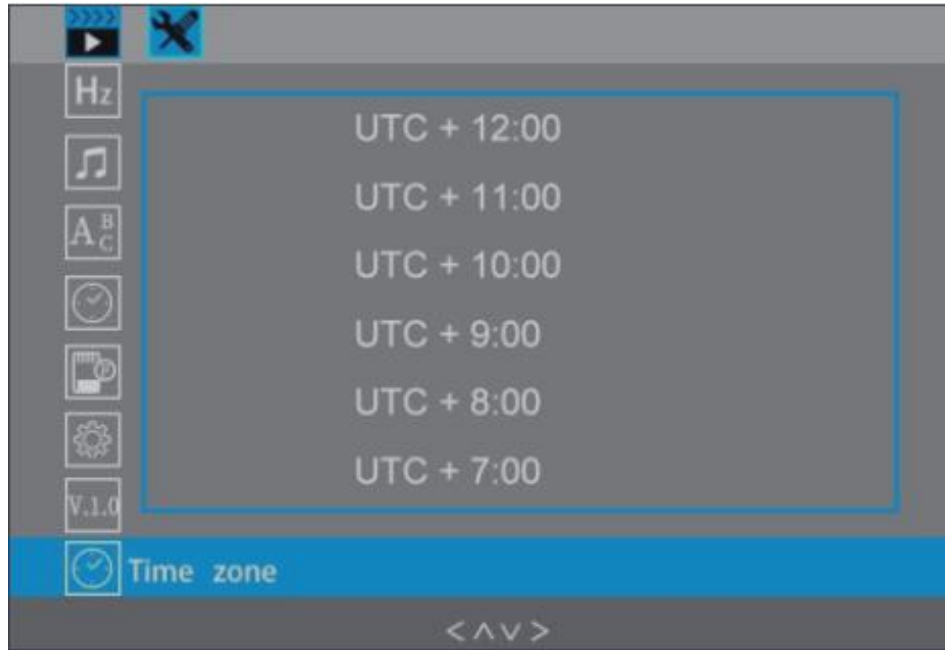

Warm tips:

If you **need view video GPS path**,
you could follow below steps to install
GX player.

If you just need view normal video,
no need track GPS path, you could ignore
next page information. Just download a VLC
video player is OK.

Select your time zone

SD card

Click here go to setting,you could select **Language**,**Speed unit** or **Maps**

C:\Users\Admin\Desktop\VID_190.MOV

The interface displays a dashcam video of a road with a white truck in the center. The video player includes a progress bar at the bottom with a timestamp of 00:00:39 / 00:01:00. Below the video, there are coordinates: X: 0.00, Y: 0.00, Z: 0.00. On the right side, there is a settings panel titled 'Base Setup' with options for Language (English), Speed unit (kmh), and Maps (Google Map). A red arrow points to the settings gear icon in the top right corner. A red text overlay on the Maps section says 'Please stop playing,otherwise can't change the map successfully!'. Below the settings panel, there is a 'soft service' section with the version 'gx.v3.01.06' and a 'Detection Update' button. At the bottom of the settings panel, there is an 'Infomation' section with contact information for Shenzhen Guoxing Beidou Technology Co.,Ltd, including a website and email address, and a warning about unauthorized use of reverse engineering.

Question:How to enter setting page?

Video setting page

System setting page

Answer:Click the middle button of the screen to enter video setting page,click twice of this button to enter system setting page

Long press down button could turn On/Off parking mode

FAQ

1. How to view playback video on dash cam ?

Answer: Click OK button to stop recording first, then click M button to enter playback video file, scroll up/down button to select the front video you want to view on dash cam.

Long press down button to enter rear cam playback video file.

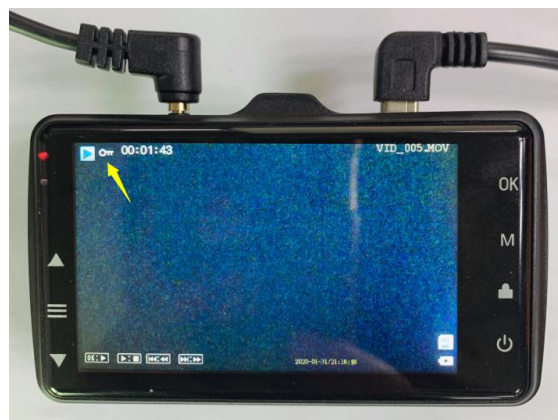

1. Click OK button to stop recording

2. MOV is front camera video

3. AVI is rear cam video

4. The lock icon is locked video

2. Why my dash cam saying “card full”/turn off randomly ?

Answer: If you turn on G sensor and parking mode, too many locked file will result card full, just turn off G sensor, motion detection & parking mode is fine.
Camera turn off randomly is because card full, there is no space to store new file, so it turn off to remind you format card. We suggest you format card monthly to extend card life span.

3. Why my dash cam do not save time setting, every time i need reset time before use?

Answer: Because the camera default setting is Beijing time zone, Beijing and USA have 13~16 hours time difference, If you never select time zone, every time you start car it will need you to adjust time. So before the first time you use this camera please select your local place time zone then each time when you start the car, the dash cam will switch local time zone automatically.

4. Dash cam keeps on and off when i am driving, what`s happend?

Answer: It`s might be the power connection is not stable, please make sure connect power cord cigar lighter car charger tight with car cigar lighter socket, and keep continuously power supply. If well connected but still have this situation, it`s the power cord car charger defective, just contact us and we will send you a new charger replacment.

5. Camera saying “ please insert a C6 card” after inserted a card, why?

Answer: there are 2 reason will result this problem,

- 1): the card is low speed or bad quality card,
change a high speed good quality card is OK,
- 2): insert card when camera turn on, dash cam could not recognize card,
just turn off camera and insert card, then turn on camera is OK.

6. The camera could not turn on?

Answer:there are 3 reason will result this problem,

- 1). the dash cam need continuous power supply,just check power connection if it is OK,
- 2). the camera need reset,just connect power supply and click reset button,then start camera is OK,
we attached bwlow 2 picture for your better understanding,

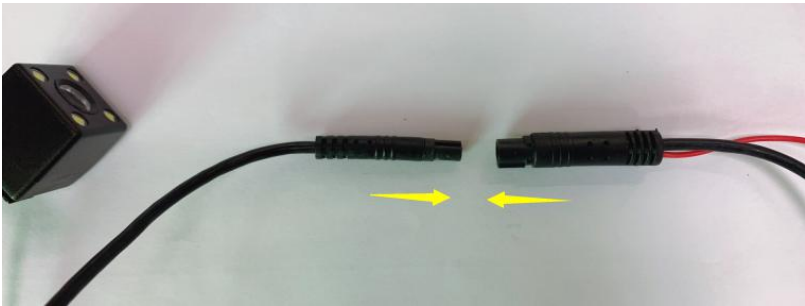

- 3).the card defective will result camera could not turn on,just take out card or change a new card to insert camera,

7. The rear cam does not work?

Answer:there are 2 reason will result this problem,

- 1). the rear cam wire is not well connected,just check all wire connection part and make them connected tight.
- 2). the rear cam or rear cam wire is defective,please kindly contact us to get a new wire or rear cam,
