

TRUE WIRELESS EARBUDS

STEPS FOR WEARING THE EARBUDS

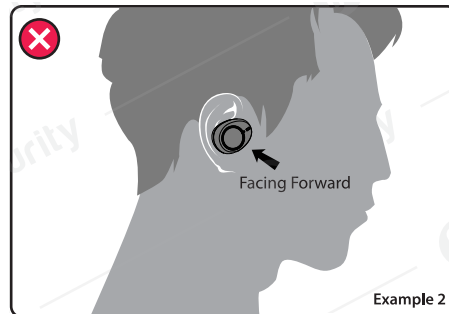

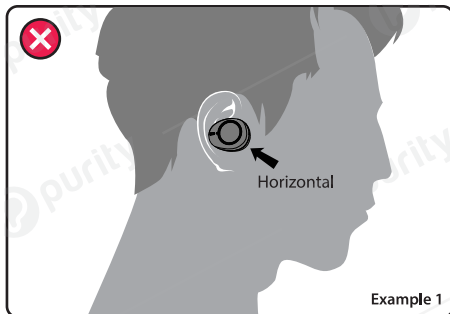

STEP 1: Place the Purity Earbud inside your ear.

STEP 2: Then, rotate Earbud, back and away, to find a snug and comfortable fit. (Earbud fitting varies due to ear size).

EXAMPLES OF IMPROPER FIT

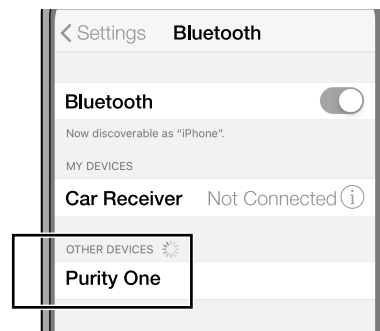

Do Not Rotate Earbuds Fully Horizontal (doing so WILL cause Earbuds to fall out).

Pairing

1. Take out both Earbuds. To pair Earbuds, go to Settings, then Bluetooth, and select **"Purity One"**.

⚠ ATTENTION: Earbuds will be activated if removed from the Charging Case or if the Charging Case reaches 0% battery. They can be turned off manually by holding the MFB buttons for 3-4 seconds.

2. Purity Earbuds are now paired successfully.

**ACTIVATE VOICE ASSISTANT
(SIRI, GOOGLE ASSISTANT)**
Tap the MFB 3 times

Factory Reset

Perform a Factory Reset to clear pairing history.

	Step	Action	Result
1	Turn Off	Hold MFB buttons for 3 - 4 seconds.	LED Lights will blink signalling the Earbuds are OFF.
2	Reset	Hold MFB buttons for 10 - 15 seconds.	The LED Lights will turn on, continue to blink repeatedly, and eventually stop. The Earbuds are RESET and Powered OFF.

FAQ

Q: What if I cannot find "**Purity One**" in the Bluetooth Page?

Reason 1: Earbuds are paired to another device.

Solution: Turn OFF Bluetooth on the mistaken devices to disconnect the Earbuds. Then, pair to your preferred device.

Reason 2: Earbuds reached 0% battery life.

Solution: Place both Earbuds into Charging Case and close it. Then, charge Earbuds for 5 mins. If Charging Case has low battery, use Micro USB Cable to charge it as well.

Reason 3: Earbuds are OFF.

Solution: Press and hold MFB's for 3-4 secs. to turn ON the Earbuds.

Q: Why won't the Left and Right Earbud synch? Why is sound only emitting from one Earbud? What if there are 2 "**Purity One**" choices on the Bluetooth page?

Solution: Complete the following process: Turn OFF Earbuds (hold MFB's for 3-4 secs.). Turn ON Earbuds (hold MFB's for 5 secs.). Voice prompt will say "Pairing". White & Red LED Lights will flash slowly. Double tap MFB's (both L/R). LED Lights will flash faster. Once LED Lights flashing slows, the synching process is complete.
