

SMALL BASKET QUICK START

How to correctly install your small basket

MAX Weight Capacity- Front Rack: 30lbs Rear Rack: 75lbs

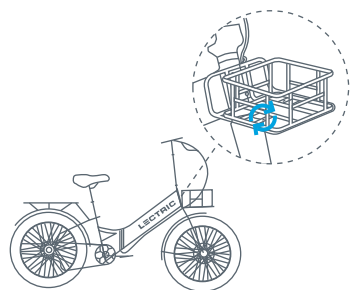

STEP 1

Place the small basket above the front rack while aligning the screw holes above the insertion points of the front rack.

STEP 2

Line up all screw holes and insert screws/washers. Begin finger tightening each screw/washer until all are snug in place. Use a 4mm allen wrench to tighten the screws/washers, connecting the rear basket to the rear rack.

STEP 3

Baskets are interchangeable with front and rear racks. The basket may be placed perpendicular or parallel to the rear rack, depending on personal preference.
