16L THERMAL CIRCULATOR

STAINLESS STEEL INTEGRATED BATH SYSTEM

ADVANTAGE Precision Control

Our unique, integrated system circulates water to precisely maintain the selected temperature.

WHAT IS SOUS VIDE?

Sous vide (French for “under vacuum”) is a cooking method that uses precise temperature control to achieve perfect, repeatable results which are nearly impossible to replicate using any other cooking method. Simply season food, seal in a food-grade vacuum bag, and place in a water bath to cook. Sous vide achieves the exact desired level of doneness while maximizing food’s natural flavors and texture. Precise temperature control and slow cooking time consistently produce evenly cooked steaks, vibrant vegetables and tender, juicy chicken breasts.

EXPECT PERFECTION

Consistently produce results that are nearly impossible to achieve through any other cooking method. No dry edges and no underdone centers. Juices and flavors don't escape. Food is cooked to order, perfectly moist and tender, every time!

DO YOUR THING

No monitoring required. Once food is submerged in the sous vide bath and temperature is set, there is nothing left to do. Food cannot be overcooked or undercooked, regardless of how long it remains in the bath. It's always at the ready. Just sear and serve!

BE PREPARED

Prepare and cook countless portions to perfection, then safely store cooked food in refrigerator for up to 48 hours. Or quick chill in vacuum-sealed pouch and freeze – food stays "fresh" up to 3 months. Reduces spoilage and eliminates freezer burn to decrease food costs.
