Cleaning & Maintenance

Please unplug the machine if not being used.

1. Clean the body

- 1) Use a soft cloth to remove the stain.
- 2) Stubborn stains that cannot be easily erased can be wiped with a moderate amount of neutral detergent on a soft

Note: Do not scratch the machine casing with hard objects during maintenance.
When removing the front cover, please follow the instructions and do not damage the machine parts.

2. Cleaning and replacement of the filter

- 1) The filter replacement is reminded by the built-in program. However, due to the different degree of pollution in the actual application environment, the use cycle of the filter will be different, and it can be replaced in time according to the size and smell of the sound generated by the machine.

- 2) When the surface of the composite filter is dusty, use a vacuum cleaner to clean the surface dust to extend the filter's life expectancy. (It is recommended to clean every 1 month)

	Replace time	Condition
Composite Filter	Replace it approximately 6 to 12 months	Absorption of 6 cigarettes per day

- ※ Depending on the place of use and the method of use (for example, households with a large number of smokers), the cycle of filter replacement may be shortened. If the effect is not good, please replace it in time.
- ※ Please use the used filter as non-burnable waste.

Common Problem

Common Problem

Fault phenomenon	Possible causes and solutions
The machine does not start	1.The power plug is not plugged in; replug the power plug. 2.Check if the front cover is in place.
The outlet is very small	1. The bag of the filter is not removed; remove the bag and reinstall the filter. 2. There is a foreign object blocking the air inlet or outlet; remove the blockage. 3. The filter is dirty; clean or replace the filter.
Dust removal and purification effect is not significant, air quality is not significantly improved	1. The machine is not equipped with a filter; install a filter. 2. The window or door of the room is often opened. In a room with slow air flow, it takes longer to purify the indoor air due to the entry of external dirty air. 3. The machine is placed in a small place or there are obstacles nearby, which affects the purification effect. 4. the filter is dirty, affecting the purification effect: clean or replace the filter.
There is smell in the air outlet	1. In the room, due to the smoking or barbecue of many people, a large amount of odor is generated; it is recommended to ventilate the room. 2. the filter has been seriously dirty; replace the new filter

Note: If you can't solve the problem after the above inspection, please contact the service network or technical service center provided by our customer service center. Do not disassemble and repair it yourself to avoid danger and damage to the machine.

Technical Specifications

The Main Technical Parameters

Product name	Air purifier	Model name	KJ800
Rated voltage	100~120V	Rated frequency	60Hz
Rated input power	80W	Noise	≤66dB(A)
CADR (particles)		470 CFM	
Unit size		17*17*30.9 inch	
Net weight	27.33 lb	Gross weight	32.18 lb

Air Quality Indicator

Color	Air Quality	Digital
Green	Excellence	0-50
Blue	Good	51-100
Yellow	Normal	101-150
Red	Bad	151+

Speed Noise & Power

Speed	Noise	Power
Sleep	39.62 dB (A)	5W
Speed 1	43.76 dB (A)	13W
Speed 2	49.29 dB (A)	18W
Speed 3	55.70 dB (A)	26W
Speed 4	60.75 dB (A)	39W
Speed 5	64.64 dB (A)	62W
